BANK HOLIDAYS.—A short Bill has been introduced into Parliament by Mr Watkin Williams and Mr Locke to make the law uniform as to the time when bills and notes falling due upon holidays shall be payable. It is stated in the preamble of the Bill that by the Act 7 and 8 Geo. 4, c. 15, all bills and notes falling due upon Sunday, Christmas Day, Good Friday, and any fast or thanksgiving day appointed by royal proclamation, shall be payable on the day *preceding*, while by the recent Bank Holidays Act bills and notes are made payable on the day *following* the holidays thereby established. The enacting clause proposes to secure uniformity by adapting the practice sanctioned in the recent statute to the older holidays—so that when there is a holiday or Sunday, bills should always be payable the day after. Desirable as uniformity may be, we have no hesitation in saying that a measure like this ought to be very carefully considered. The change will be a very considerable one, as the older holidays, including Sundays, are ever so many more than the one or two new holidays established. If mere uniformity in an indifferent matter were the object, the change, we should think, ought rather to be in the direction of assimilating the practice with the new holidays to the former practice. The practice followed with the new holidays however was avowedly urged on the House of Commons in order to provide for exceptional cases in which the holidays would occur on a Monday or a Saturday; yet it is now proposed to make the provision for the exception the rule. This is certainly an extreme case of getting in the thin end of the wedge, and driving it home. On the whole question we are disposed to think that the arrangements as to bills falling due on holidays had better remain as they are. As much can be said at least for making them fall due on the day preceding as on the day following, the creditors who receive payment having theoretically as much interest in getting paid the day before as the debtors who pay have in paying the day after, and having, we believe, a larger practical interest in anticipating payment than the debtor in postponing it for a day. The matter at any rate is not to be settled off hand in deference to a mere craving for uniformity.

SUEZ CANAL.—The following is officially given as the traffic of the Suez Canal in the month of April last:—

	francs	c
Passage dues on 55 ships	627,406	98
Passage dues on small craft	12,249	26
Transit of merchandise	2,102	6
Transit of passengers	7,836	19
Total	649,594	49

At 25*f* to the pound, 25,983*l* 15*s* 7*d*.

At this rate the Canal would yield 312,000*l* a year, with about 20,000*l* besides for rents from property. The amount, even *without* deducting working expenses, would be miserably insufficient for the interest of the debt which has been created, and which interest must be met before the shareholders can get a farthing. It is now quite evident from experience that the glowing anticipations of traffic which were indulged in before the opening, and which we denounced at the time at the risk of being reckoned "enemies" of the enterprise, were in fact gross delusions. There never was any real doubt about the matter.

BANKRUPTCY WITHOUT CAUSE.—The case of Johnson *v.* Emerson and Sparrow, which was an action of damages against a firm of solicitors for getting the plaintiff made a bankrupt without reasonable or probable cause, has now come before the Court of Exchequer, upon an application for a new trial by the defendant Sparrow, against whom the verdict had been entered. The peculiarity of the case, it will be remembered, was this, that although there would have been little doubt about the liability of Sir R. Harvey, for whom the defendants

Digitized by Google

acted as solicitors, yet it was necessary, in order to establish the liability of the latter, to show that they had taken independent steps, or had been acting upon undue and improper motives, in order to please their clients. The whole question resolved itself into one of evidence as to the facts bearing on these points, and though the defendant Emerson was relieved, the jury gave a verdict against the other defendant. The case was a most interesting one, as there can be few matters of legal policy more important than to prevent the abuse of the bankruptcy process in a case where the alleged debtor honestly disputes the claim. In the present stage however the case is interesting as another proof of the mischief of a deficient court. The Court of Exchequer was exactly divided — Barons Martin and Bramwell being for making the rule absolute for the defendant, and the Lord Chief Baron and Baron Cleasby being for maintaining the verdict entered at the trial. The practical conclusion come to therefore was to facilitate an appeal to the Court of Exchequer Chamber, and for that purpose Baron Bramwell withdrew his judgment, thus throwing the balance of opinion against the defendant, who however, in the special circumstances of the case, is relieved of the necessity for giving security for debt and costs, which would have amounted, it is stated, to nearly 4,000*l.* These successive hearings and appeals are undoubtedly most costly, and whatever the ultimate decision may be, this will probably be one of those cases in which both parties would have been wiser to suffer the extremest injury at first proposed to be inflicted on them by their opponent rather than vindicate their rights at law.

PRELIMINARY EXPENSES OF LENDING.—The Court of Queen's Bench, in the case of Gibson *v.* Wright, has decided that if a party offers a certain security for a loan, and the lender is dissatisfied with either the value or the title, the latter has no claim to be paid the expenses of the inquiry in the absence of an express contract. The Lord Chief Justice stated that the rule in a sale is different, because the vendor then undertakes to sell and make out a good title, whereas in a mortgage he only offers the security to guarantee the repayment of a loan, and there is no contract until the security has been accepted. The decision is one which should be attended to, the business being clearly such that a special preliminary contract ought to be made; but we rather think that there is a closer analogy between a mortgage and a sale than the Lord Chief Justice allows. Very often in a mortgage the security is the only thing, the personal obligation of the lender being never considered. In these cases the undertaking to give security is like the undertaking to sell; and if the borrower pretends to offer more value than he really does, or cannot show a title, he is exactly in the position of a seller who cannot give what he pretended to sell, and who is consequently held bound to pay the vendee's expenses. Those interested however will now understand that when a loan negotiation has reached the point of a tender of security, the intending lender should take care to secure himself by a preliminary contract against any expenses he may incur if the security should not satisfy certain prescribed conditions.

PRINCIPAL AND SURETY.—A case of some interest bearing on this subject has just been decided by Vice-Chancellor Malins. The case was that of the Oriental Financial Corporation, Limited, *v.* Overend, Gurney, and Company, Limited—being one of the many litigations arising out of the Overends' collapse. The object of the plaintiffs was to be released from all liability upon certain bills of exchange for 10,000*l.*, which they had accepted for the accommodation of one M'Henry, and which he had discounted with Overends. Their plea was that M'Henry had deposited securities with Overends to provide for the bills, and that they had been included in a settlement of large bill transactions between M'Henry and the defendants. At any rate the defendants, by giving time to M'Henry, had released the plaintiffs. On the other hand it was contended for the defence that the alleged settlement between M'Henry and the defendants was only an agreement to hold over the bills until the securities had been realised, and that the bills had never really been provided for. Vice-Chancellor Malins adopted the latter view, and also held that the plaintiffs were not released in consequence of delay having been given to M'Henry. The plaintiffs were the apparent principals, as they had accepted the bills; and although it was a rule of law that giving delay to the principal released the surety, yet the corresponding rule—that giving time to the surety released the principal—"was one which, though settled, had not met with "general approbation by the Judges, and was not to be ex "tended." Moreover the giving time must be by a binding contract, and as this was not so in the present case M'Henry having simply induced the defendants not to press the plaintiffs, there was no case for extending the rule of law to such circumstances. The plaintiffs therefore failed in obtaining the declaration that they were not liable upon the bills.

RAILWAYS AND CARRIERS.—The Court of Common Pleas in the case of Parkinson *v.* The Great Western Railway Company, has decided that a railway company, being bound to give delivery of goods at the various stations, and having no right to insist upon being itself the deliverer, is bound to attend to a general order from merchants authorising a certain carrier to receive and deliver all the goods coming to them. It was contended for the railway company that they were entitled to a specific notice in the case of each parcel of goods but the plaintiff succeeded in establishing that it was only reasonable facility that they should attend to the general orders of his customers. Unless they were made to do so they would place him at a disadvantage in carrying on his own business, and they were expressly prohibited from giving them selves such a preference.

DEFICIENT INCOME TAX RETURNS.—The striking passage in the report of the Inland Revenue Commissioners two years ago, on the subject of defective returns under Schedule D will not have been forgotten. The same subject is glanced at in the fourteenth report which has just been issued, and which contains the following comparison of specimen "returns" and "assessments":—

Return.	Assessment.	Return.	Assessment.
£	£	£	£
nil	7,217	1,000	5,00
1,925	8,485	5,000	10,00
4,560	8,000	750	2,00
4,500	9,366	1,700	5,50
140,207	184,224	6,000	10,00
76,420	95,627*	13,957	24,00
40,612	40,000†	3,000	8,00
239,334	287,780	1,950	5,00
190,513	254,150	3,500	16,00
nil	5,285	1,800	5,00
7,068	18,272	25,000	35,00
120,000	178,300‡	2,500	8,00
104,565	130,411	1,450	9,00
14,596	25,000	7,500	11,50
7,675	15,000	18,249	29,23
7,500	12,000	250	3,50
104,618	126,025	16,330	22,00
6,209	10,000		
17,500	22,003	1,181,838	1,650,88
4,160	10,000		

* In this case duty was paid on 19,482*l.* on profits not returned in the previous year.
† Duty on 17,500*l.* paid in respect of the previous year.
‡ Duty on 28,977*l.* paid in respect of the previous years.

According to these specimens, the people who make defective returns under Schedule D are ascertained to omit on the average one-third of their income, if not more; and as only a small portion of the deficiencies can be discovered, we may imagine what the leakage is. The tax has the misfortune of being inquisitorial, but at least those who are made to pay full duty are not devoid of good reasons for wishing to make the tax more inquisitorial than it is. Each penny would become more productive, and it would be possible to charge fewer pennies on the honest payers.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, June 8.

Even the manufacturers of Roubaix, though always bitterly hostile to the Treaty of Commerce with England, were moved at the announcement of the intention of the Government to tax the raw materials of textile industries. But a moment's reflection would have convinced them that it only began with materials to have a pretext for taxing still more heavily the manufactured products of foreign countries. This was indeed distinctly declared to them in a letter which M. Ozenne, one of the principal officials of the Ministry of Commerce, was ordered to write to them on 30th May last. He said—"In case it should become necessary to tax raw materials imported,

Digitized by Google

it has always been understood that the duties would be restored in the form of drawbacks on the export of the manufactured products, and that the amount of the drawbacks, augmented by a sum representing the indirect charges that weigh on manufactures, would be added to the import duties on products manufactured abroad."

The Treaty of Commerce between France and Belgium, which is substantially the same as that with England, was concluded on 1st May, 1861, for ten years. It consequently expired on 1st of last month. But like the English treaty, it contained a clause that in the event of its not being formally denounced by one or other of the parties twelve months before the expiration of the ten years it should continue in force; and no denunciation was made. It is expected, however, in Belgium that the French Government will soon manifest a desire to see it cease; but even in that case it will exist for a year afterwards.

The well to-do-people who fled from Paris, on pretext that they did not like the Commune, but in reality from cowardice, have returned *en masse*. With them has come back the troop of Bourse speculators; and among the latter are many of the Germans, chiefly Israelites, who for years made Paris the centre of vast operations. The consequence is that the Bourse has become almost as much thronged as in the palmy days before the war, and already have transactions assumed a certain degree of activity. For the moment, however, discussions take up more more time than dealings, the object being to ascertain the situation of things, and to calculate the turn they are likely to take. The new loan is of course the principal subject of the conversations, and great confidence is manifested to see the precise conditions of it published. An expectation prevails among some people that it will be in 5 not 3 per cent. stock, and that the price of issue will be about 82 or 83. Another matter of much interest is the situation, present and prospective, of the Credit Foncier. Many of the houses mortgaged to it, both in the provinces and in Paris, have been bombarded or burned into ruins, and many others have suffered from shells or fire; whilst almost everywhere, from the non-payment of rents and the long depression of trade and agriculture, the recovery of the annuities due to it is likely to present difficulties.

The following is a comparison of principal Bourse quotations of the week:—

A drawing of the bonds to be paid off of the Ottoman loan of 1863 and 1865 has taken place to-day at the Credit Mobilier.

PARIS, June 13.

In the National Assembly at Versailles yesterday, the Minister of Finance, M. Pouyer-Quertier, presented his plan for the augmentation of taxes, which the disastrous war has necessitated, and it is as follows:—

REGISTRATION DUTIES AND STAMPS.

Double tenth (*decime*) on registration duties and various receipts	francs. 31,000,000
Double tenth on stamps	15,500,000
Succession duty after death on foreign securities	5,000,000
Repressive measures and registration of leases	15,000,000
Tax on fire and maritime insurances	15,000,000
Tax on newspapers	8,500,000
	90,000,000

CUSTOMS.—NET YIELD OF NEW TAXES AND SURCHARGES.

	francs.
Increased duty on foreign and colonial sugar	14,000,000
Coffee	2e,300,000
Petroleum	10,000,000
Textile materials	70,000,000
Raw materials, &c.	100,000,000
Manufactured goods	10,000,000
Export duties	15,000,000
Navigation dues	5,000,000
	244,000,000

INDIRECT TAXES.

	francs.
Increased duty on native sugar (beetroot)	19,000,000
Do. on circulation of wines, cider, &c.	16,000,000
Do. on the consumption of brandies and spirits	58,000,000
Do. on beer	4,500,000
Do. on licenses for public houses	5,000,000
Do. on playing cards	1,500,000
From tobacco	20,000,000
Tax on lucifer matches	10,000,000
Tax on manufacture of paper	10,000,000
Tax on chicory	5,000,000
	149,000,000

POST OFFICE.

	francs.
Revision of the charge for carrying books and printed papers	500,000

The total of these new imposts is 483,500,000f, making 19,340,000*l*. As regards the first chapter, it may be necessary to explain for some readers that in France it is the custom to augment or diminish certain direct taxes by tenths of a franc (*decime*), about a penny, and that "repressive measures" means the infliction of fines for attempts to evade the Stamp Laws. Under the head of Customs the item of 100,000,000f translated "raw materials, &c." stands in French "matieres brutes *et autres*," which is terribly comprehensive.

After presenting the preceding detail, M. Pouyer-Quertier called on the Assembly to remark that it did not add a farthing to the land tax, to the trade tax (licenses), or to the two other direct taxes called "personal" and "furniture," and he remarked that the new taxes would be collected without additional expense. Adding the savings proposed to be effected to the increased revenue from new taxes, he said that the country would improve its resources by about 660,000,000f a-year (26,400,000*l*).

What will be thought of M. Pouyer-Quertier's scheme in England is not difficult to divine. It is the exact contrary of that which Sir Robert Peel and our Parliament devised for relieving the country from embarrassments infinitely less serious than those in which France is plunged; and I fear not to say that it is the exact contrary of that which the situation of France calls for. To set industry free in order to benefit the working classes, and by means of an income tax to make "the rich" contribute their fair share to the public burdens—this is the *desideratum* of France, as it was with us some thirty years back. Instead of that, M. Pouyer-Quertier proposes taxes which, striking at commerce and industry, will lessen the demand for labour, and will at the same time render the expense of living greater to all, especially to the working man and the peasant, and he leaves the possessors of acquired wealth untouched. "The poor will become poorer, and the rich richer." In no country would such financial policy be just or wise; in France where "the poor," that is, the working classes, are angry about the distribution of wealth, and where they have just shown in what terrible fashion they can use cannon, and muskets, and petroleum, it is purely and simply madness.

PARIS, June 15.

The expectation that the conditions of the new loan would be promptly promulgated has been disappointed, and up to the present moment we know them not. The loan itself is, as may be imagined, the subject of conversation in every financial circle, and all manner of theories about it—that is, as to whether it had better be in 5 or 3 per cent. stock; be conceded in the lump to bankers or offered, in the fashion of the Empire, to public subscription; be in part or wholly accompanied with lottery prizes, &c., &c.—all these theories are expressed. It would be a waste of time to recapitulate what is said, and to examine "their ideas" put forward. But as foreign, and especially English, capitalists are to be solicited to take part in the affair, perhaps it may be well to observe that the system of taxation proposed by M. Pouyer-Quertier to meet the charges of the loan requires the gravest consideration from them. If there be any truth in Political Economy, any truth in the experience of England, that system will cripple industry and commercial enterprise, and will consequently render the payment of those charges extremely difficult. In times of peace France could hardly bear the financial burden of the Empire; how can she sustain an infinitely heavier one when, after fearful disasters, the degree of commercial liberty she enjoyed under the Empire is taken away? In a purely political point of view too what M. Pouyer-Quertier proposes is simply monstrous: it will press more heavily on those who work than on those who possess acquired wealth, and will consequently maintain, and even aggravate, the *economic* grievance which had a great part in, and was in truth at the bottom of, the terrible events that have appalled the world.

The country has not yet had time to study the scheme of its Protectionist Minister of Finance. But that it will protest energetically against it may be considered certain. Lyons, which on hearing speak of a duty of 20 per cent. on raw silk—the material which gives bread to its working population—sent a deputation to say that such a thing ought not to be, is

Digitized by Google

about to forward a message still more energetic. Marseilles sees that several of its industries, and its shipping interest, will be injured, and is preparing to act. Havre, which would suffer terribly from the proposed duties on cotton, coffee, and other things, is on Saturday to have a grand meeting of its merchants to complain. Bordeaux, which understands and appreciates what is called in this country free trade (though in truth no such thing exists), because it knows that in order to sell its wines abroad it must consent to buy the goods foreign countries have to sell,—Bordeaux is preparing to give M. Pouyer-Quertier and his chief, M. Thiers, a lesson which will be peculiarly disagreeable to them, and that is, to send M. Rouher and M. de Forcade la Roquette to the Assembly in the approaching elections. Political considerations would certainly, at the present moment, make Bordeaux prefer to be represented by other men than these two distinguished upholders of Imperialism; but they contributed largely to the commercial reforms of the Empire, and Bordeaux is grateful for the past, and thinks they will be useful against a Protectionist Government in future. Last, but not least, M. Michel Chevalier, who is the real author of those reforms, as Cobden was of that in England, has already begun to raise his voice in the College de France in defence of the cause to which he has devoted talent of a lofty order, and the labour of a life; and though he only now speaks from a Professor's chair, he will be heard throughout the land.

Not only is M. Pouyer-Quertier's plan radically wrong in principle, but it is open to grave objections in detail. The taxation of paper and of newspapers will, for example, be almost ruinous to the paper trade, and will at the same time naturally be injurious to the printing trade, and to all the callings dependent thereon. And why, if it be right to tax playing cards, are not billiards and dominoes, in which the French people waste an infinity of time, taxed also? And if the spread of public-house is to be checked by means of taxes, why should *cafés*, which are in reality public-houses of a superior order, be spared? Again, would it not have been right to put a stamp on invoices and receipts? And considering the childish manner of the French people for "decorations"—the privilege of wearing a bit of ribbon in a buttonhole—would it not have been well to make it produce money, especially as decorations are given in nine cases out of ten not for public merit, but from private interest? Many other sins of commission and omission in the scheme might be pointed out, but these for the moment must suffice.

The anxiety in Paris to see "something done" about rents and bills is very great and very general. The Government and the Assembly have legislated thereon with the *légèreté* that characterises the French, but which is really unpardonable in serious things, and a better plan is demanded. A number of the leading merchants and traders have held meetings at the Comptoir d'Escompte to discuss the bill question, and their conclusion is, that larger delays than those accorded are necessary. The difficulty of paying rents, of which nine months are due, is greater than that of bills.

M. Ernest Picard, nominated Governor of the Bank of France, has resigned. He could not do otherwise. The directors of the Bank flatly refused to accept him, and public opinion was outraged at seeing a man who had passed twenty years of his life in denouncing the abuses of the Empire, thrust himself into a sinecure of about 4,000*l* per annum.

In addition to the loan of the Government, there will have to be one for the city of Paris. The city is in reality bankrupt, having suspended payment of interest on its debentures for some time past; but it will be able to obtain new credit. A curious question is the extent of its responsibility for the damage done to private property by the bombardment of M. Thiers and by that of the Commune.

A member of the Assembly has presented a Bill for raising the 2,500,000,000*f* required by the Government, by the issue of five series of bonds of 500,000,000*f* each, the bonds being of 50*f*, 100*f*, or 1,000*f*, and bearing 6 per cent. interest, but with power to the subscriber to transform them into other bonds at 3·60 per cent. interest, to which lottery prizes of 1,250,000*f* per annum for each series will be attached. The project is based on the theory that as lotteries are extremely popular among the French, the Government has the right to use them as a cheap way of getting money.

The Government of the National Defence decreed that the making and sale of arms should be completely free. The Assembly has just passed a Bill which subjects anew the arms trade to the severe control of the Government. A deputy pointed out the extreme desirability of leaving this industry, like all others, free, and that freedom produces in other countries not only great commercial advantages, but constant improvement and new inventions. But he spoke in vain. So it is in France—continual revolutions, never a reform.

The Society for the Development and Influence of Commerce and Industry of Marseilles—a self-constituted but very intelligent and active body—has complained to the Government that the Courts of North Germany have decided that bills on France which have remained unpaid, in virtue of laws and decrees granting delays, cannot be made the subject of actions against endorsees residing in Germany because they were not protested in due time. The society, after pointing out that the decision is disastrous to French commerce, and after expressing the fear that it will be imitated in other countries, argues that it is unjust, for the reasons that the delays granted in France, though extending to months, ought to be considered only an extension of days of grace, and that it is an established principle that bills payable in a country are subject to the laws and usages of that country.

An English company is proposing to different towns in France, among them Nantes and Bordeaux, to construct tramways for them.

The *Journal des Fabricants de Sucre*, organ of the beetroot sugar trade, thus sums up an article on the situation:—"The approaching season promises to be very active, and the sugar industry does not appear to have suffered much from the invasion and the war." Another sugar journal, the *Bulletin Commercial*, says that England has made such large purchases recently that prices have risen, and that she has given orders for execution from October to January.

The Bank of France, as is known, accepts for a moderate charge the care of *valeurs* of all kinds—Government stock, shares, bonds, &c. In a letter of the sub-governor, M. de Plœuc, published a few days ago, it was stated that the Commune had not touched these things; but nevertheless it appears that the possessors of them are uneasy. Accordingly the Bank has had inserted in the *Official Journal* a declaration that the fears are entirely unfounded, and that though the Commune made requisitions on it, they "did not extend to the securities deposited, or to the funds of private persons."

On the Bourse transactions have resumed activity, and they will no doubt become more so when the conditions of the new loan are known. The Threes, which on the 8th were 53*f* 45c, are to-day 53*f* 52c, and the Italian has fallen from 57*f* 90c to 57*f* 40c. In the other quotations of to-day are the Bank of France, 2,920*f*; Comptoir d'Escompte, 630*f*; Credit Foncier, 905*f*; Société Générale, 528*f* 75c; Lyons Railway, 855*f*; Southern, 630*f*; Northern, 965*f*; Orleans, 800*f*; Western, 536*f*; Parisian Gas, 737*f* 50c; Suez Canal, 236*f* 25c; Spanish Exterior, 32½; United States, 5-20's, 102¼.

The "Imperial Ottoman Government" notifies, through the Comptoir d'Escompte, that the delay in the payment of calls of the 1869 loan, which "circumstances" necessitated, cannot be prolonged, and that if they be not paid up before 1st August, the sale of obligations, for which provisional scrip has been given, will be proceeded to on the Bourse. The Comptoir, on its part, makes known that beyond 30th June no further delay can be granted for the payment of calls due on the mortgage bonds of the Viceroy of Egypt of the 1870 issue, and that the bonds on which they are not paid will be sold.

Messrs Erlanger and Co. announce the payment from 1st July of the interest on Portuguese loans of 1848, 1853, and subsequent years.

The directors of the Credit Industrial Bank announce that the dividend of 1870 will be 12*f* 50c. Of this sum 2*f* 50c were paid in November. On the shares only 125*f* have been called up.

The directors of the Southern Railway Company, in the approaching annual meeting, will propose the payment of 25*f* per share in addition to the sum already distributed.

The Compagnie Générale d'Eclairage par le Gaz (Lebon and Co.) is paying 30*f* on half-a-year's interest of 1,000*f* bonds, and 7*f* 50c on those of 300*f*.

The Company des Chemins de Fer Normand is paying a coupon of interest due 1st June.

The Company of the Railways of Saragossa to Pampelona and Barcelona is about to pay (date not yet fixed) the coupons of bonds of the Pampeluna line due 1st October and 1st April.

The Bank of Belgium announces the payment from 1st July of 40*f* per share as second dividend of 1870.

The Banque de Credit et de Depots des Pays Bas informs shareholders in France that the balance of the dividend of 1870, 22*f*, is now in payment. A sum of 20*f* was distributed in November.

The annual meeting of the French Transatlantic Company is fixed for the 3rd July; that of the Western Railway for 30th June; that of the Suez Canal for 20th July. The assembly of the Lyons and Mediterranean Railway will have to be postponed, owing to the destruction of books and papers in the fire of its premises.

The provisional issue of 88,000 obligations of the North-East Railway Company, made in 1869, is by authority of the Government declared definitive, and interest on them is to be paid 1st April and 1st October. In other words, the certificates of subscription that were given as a temporary measure are held to represent bonds. No call is made.

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on June 3	4,088,450	973,725	5,062,175
— June 10	4,523,837	1,068,654	5,592,491
Increase	435,387	94,929	530,316

The other receipts to date were 85,370*l*, the other payments were 59,671*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs, a copy of a despatch from Her Majesty's Consul at Manilla, stating that in accordance with the instructions contained in a decree issued at Madrid on the 29th December, 1868, the differential duties will no longer be levied on goods arriving in foreign vessels at the port of Manilla; this change in the Customs' regulations coming into force on the 12th April last.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the first week of June, 1871, and of the corresponding week in 1870 :—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresponding Total in 1870.
	Adults and Children	Adults.	Children under 16.	1st week June, 1871.	
West district	5,036	7,187	4,926	17,139	17,874
North district	6,946	10,531	7,881	25,358	26,306
Central district	6,252	6,755	5,115	18,122	19,841
East district	6,735	8,991	8,609	25,806	29,310
South district	8,144	16,699	14,389	39,232	40,905
Total of the Metropolis	33,113	51,173	40,991	125,277	134,096

Total Pauperism of Metropolis.—Population in 1871, 3,251,801

Number of Paupers.		Indoor.		Outdoor.		Total.
First week of June,	1871	33,113		92,164		125,277
— —	1870	32,212		101,884		134,096
— —	1869	33,187		96,560		129,747
— —	1868	32,963		96,977		129,942

Vagrants relieved in the Metropolis on the last day of the first week of June, 1871.

Men.	Women.	Children under 16.	Total.
1,029	365	94	1,488

In the first quarter of the year 1871 duty was paid on 5,763,867 gallons of home-made spirits for consumption as beverage in the United Kingdom, being an increase of 347,635 gallons over the corresponding period of 1870. The foreign spirits entered for home consumption here comprised 1,116,977 proof gallons of rum, 895,814 proof gallons of brandy, and 271,943 proof gallons of other spirits; and all these items also are larger than in the first quarter of 1870.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during May, 1871 :—

Imports.

By Sea.	Ships.	Tons.	By Railway and Canal.	Tons. cwt.
Newcastle	196	103,534	London and North-Western	79,222 15
Seaham	26	7,322	Great Northern	90,717 0
Sunderland	104	55,793	Great Western	34,945 0
Middlesborough	13	5,510	Midland	129,356 0
Hartlepool	89	27,457	Great Eastern	58,219 13
Scotch	12	3,070	South-Western	4,076 3
Welsh	6	1,456	London, Tilbury, & Southend	18 2
Yorkshire	34	3,569	South-Eastern	954 12
Small coal	3	1,023	Grand Junction Canal	707 5
Cinders	5	437		
Total	488	210,986	Total	398,256 13
Imports during May, 70	488	218,914	Imports during May, 1870	313,153 0

Comparative Statement, 1870 and 1871.

	Ships.	Tons.
By Sea.—Jan. 1 to May 31, 1871	2,598	1,186,934
— 31, 1870	2,830	1,276,940
Decrease in the present year	232	83,126
		Tons. cwt.
By Railway and Canal.—Jan. 1 to May 31, 1871		1,483,362 11
— 31, 1870		1,628,005 1
Increase in the present year		205,357 10

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during May, 1871 :—

Exports.		
1. Railway-borne coal passing "in transitu" through district	tons	51,579
2. Sea-borne coal exported to British Possessions, or to foreign parts, or to the coast	tons	39,911
Ditto beyond limits by railway		11,981
Ditto by canal and inland navigation		4,245
		55,837
3. Railway-borne coal exported to British Possessions, or to foreign parts, or to the coast		25,830
Ditto by rail beyond district		504
Ditto by canal and inland navigation		112
		26,236
4. Sea-borne coal brought into port and exported in same ships		320
Total quantity of coal conveyed beyond limits of coal duty district during May, 1871		133,982
Ditto, May, 1870		90,340

Digitized by Google

The advices from South Australia are dated April 24. There was a considerable export of cereals; four vessels had cleared for England, and the total value shipped to all parts since the 1st of January had reached 502,954*l*, the business being not less than 43,000 tons. The prospects of the vintage were good. The Government had consented to receive defaced silver coin at a discount of 5 per cent. for remittance to England. New land regulations are issued providing for occupation licenses in connection with mining, also for leases of land supposed to contain coal, oils, and other valuable produce. The overland telegraph was progressing satisfactorily. A pass has been discovered through the M'Donnell range, and thus far those in charge of the enterprise, with weather in their favour, had surmounted all obstacles. Gold has been found near Port Elliot, and diamonds are reported to have been met with 700 miles north of Adelaide. Mining affairs show the following features:—The Burra is improving under the new system; the Moonta has paid another dividend, and has large accumulating funds; the Yelta and minor undertakings are productive, but as yet do not yield a profit. The growth of flax and hops was engaging attention. Wheat had fallen from 5s 8d to 5s 6d per bushel; flour was 12*l* 10*s* per ton; copper, 70*l* per ton. The banks sold drafts on London at 60 days' sight at 1 pm., and bought at 1 discount.

A Bill now before Parliament, introduced by the Chancellor of the Exchequer, with regard to the borrowing powers of the Metropolitan Board of Works, proposes to enact that trustees may invest in the stocks issued by that Board, unless forbidden by the will or other instrument under which they act.

According to a statement from Messrs C. and C. J. Coles, the official Customs' returns of the stock of sugar in bond in the United Kingdom at the end of May for this and last year, have excited much attention, owing to their making the stocks of each year nearly equal, whereas the returns of the stock of sugar in the public warehouses of the four principal ports of Great Britain at the end of May showed a deficiency of 41,000 tons this year as compared with last. It appears that the discrepancy is owing to the change of system this year, requiring the weight of sugar to be estimated and stated in the warehousing entry, which weight is now immediately carried to account on the day of entry, whereas last year it was not taken into account until the real weight was ascertained. A difference of at least a fortnight has thus been created.

An annual return shows that in the year 1870 30,220,268 gallons of proof spirits were distilled in the United Kingdom; 7,479,422 gallons in England, 14,483,744 gallons in Scotland (nearly half the production of the United Kingdom), and 8,257,102 gallons in Ireland. Duty was paid in the year on 23,452,240 gallons, amounting, at 10*s* per gallon, to 11,726,120*l*. The consumption of British spirits in the year is stated at 22,613,490 gallons—viz., 12,940,083 gallons in England, 5,501,987 gallons in Scotland, and 5,170,700 gallons in Ireland. 1,633,219 gallons were removed in the year from Ireland to England and Scotland, and no less than 4,258,097 gallons from Scotland to England and Ireland; 125,337 gallons from England to Scotland and Ireland. At the end of the year there were 16,941,140 gallons of British spirits in bonded stores in the United Kingdom ready to supply thirsty souls in 1871.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 14th day of June, 1871.

ISSUE DEPARTMENT.

	£		£

Wednesday	11,023,000	.....	11,499,000	.....	33,952,000
Total.....	68,106,000	.....	86,586,000	.....	85,281,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, June 15, 1871.

The total since the 4th of January, 1871, is 1,927,924,000*l*, compared with 1,768,684,000*l* for the corresponding period last year, showing an increase of 159,240,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding date with the present week.	June 19, 1861.	June 17, 1868.	June 16, 1869.	June 15, 1870.	June 14, 1871.
Circulation, including bank post bills.....	£ 19,743,718	£ 23,940,460	£ 23,083,975	£ 23,977,029	£ 24,222,745

In 1861, there was still little business in the money market, but the open market rate was still nearly up to the Bank minimum. The shipments of gold to America continued. The want of cotton was already much felt on account of the blockade of Southern ports established by the North. The South had also prohibited the export of cotton, except through Southern ports.

In 1868, the 2 per cent. period continued with little prospect of a break, gold continuing to arrive. It was expected that the price of wheat would now tend downwards. The Abyssinian campaign had closed successfully.

In 1869, the tendency of money was downwards. Some movement upwards was anticipated from the payment of the money for the purchase of telegraphs by the Government, but only a slight movement, as the payment could make no change in the total supply of money. Mr Forster had carried the Endowed Schools Bill through the chief stages in the House of Commons.

In 1870, the Bank was apparently stronger than it had been, but this was stated to be owing to the fact of an unusually large demand for discount a day or two previous to the account, and of the borrowers not yet having drawn out the amount borrowed. Large purchases of wheat were being made on French account.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,638,945*l*; in 1868, an excess of 1,293,356*l*; in 1869, an excess of 469,001*l*; and in 1870, a deficiency of 2,867,177*l*. In 1871, there is an excess of 1,826,999*l*.

DISCOUNT AND MONEY MARKET.—The Bank directors, at their meeting on Thursday, took the unprecedented course of

Digitized by Google

reducing the minimum a quarter per cent., viz., from 2½ to 2½. There is no doubt that, under any other circumstances, a fall in the Bank rate would have taken place some time ago; but while a reduction is not much disapproved of, considering the remarkable strength of the Bank, the great accumulation of money in London, and the low amount of the private securities, the expediency of a reduction of one quarter per cent. only is very much criticised. The change is considered too minute to affect business materially, and unless this is to be done, the Bank effects nothing towards employing the surplus money which it desires to use.

Prior to the reduction, there was no particular change from the condition of the money market which we noticed last week. For a day or two indeed there had been a little extra demand on account of the Stock Exchange settlement, and if anything the preparations in view of an approaching dearer market were on the increase. Since the change, which was quite unexpected, there has hardly been time to make a market; but the rates nominally quoted are at least an eighth all round less than they were last week, and still so far below the Bank minimum as to make sure that no large amount of fresh business can be acquired at the Bank by the change. The quotation for short-dated paper is 2 to 2½, against 2½ ⅜ last week; but it will be understood that the dealings at 2 per cent. are only for the very best paper at short dates.

The principal changes in the Bank account for the week are—an increase of 1,134,000*l.* in the reserve, an increase of 705,000*l.* in the bullion, an increase of 499,000*l.* in the public deposits, and of 456,820*l.* in the private deposits; and a decrease of 420,000*l.* in the circulation, and of 164,000*l.* in the private securities. The proportion of reserve to banking liabilities is 60 per cent.—the reserve being 17,208,000*l.*, and the liabilities 29,042,000*l.*

We subjoin our usual quotations for mercantile paper having various periods to run:—

Bank bills—2 and 3 months	2 ⅛	per cent.
Do 4 months	2⅛	per cent.
Do 6 —	2⅛ ¼	per cent.
Trade bills—2 and 3 months	2⅜	per cent.
Do 4 months	2⅜	per cent.
Do 6 —	3 3½	per cent.

The joint stock and other banks and discount houses have reduced their allowances for money to correspond with the reduction in the Bank rate, and the quotations now are—

Joint Stock Banks at call	1¼ per cent.
Discount houses at call	1¼ per cent.
Do with seven days' notice	1½ per cent.
Do fourteen days'	1½ per cent.

The discount quotations current in the chief continental cities are as follows:—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6	2½	...

Brussels	2½	4	2½	3½
Madrid	5	5	5	5
Hamburg	...	...	2½	3½
St Petersburg	6	8	5	6

THE STOCK MARKETS.—Business this week has been of rather a mixed character, the earlier movements in the principal stocks being almost all in a downward direction, but having been subsequently recovered from, so that in many instances there is an advance for the week. English Government securities have especially improved; foreign stocks have also derived some benefit from the continued postponement of the French demands; and in English railways the fortnightly settlement, which occurred this week, has also acted favourably on prices, owing to the deficiency of stock which was apparent. It is noticeable in most of the markets that there has been a considerable absorption for investment, and the settlement, though a comparatively small one in total amount, has been remarkable for the large proportion of investing business. Money being superabundant and the savings of the country accumulating, it is likely enough that the tendency of investors will continue to be in the same direction; but the great amount of demands which may be anticipated both from France and other foreign countries will have no small effect in preventing any material rise. As it is, the purchases of investors barely suffice to take up the sales for realisation by foreign bankers and others who are making provision for eventualities.

ENGLISH GOVERNMENT SECURITIES.—Consols fell ¼ last Saturday, as compared with the closing price the previous day; but since Saturday the tendency has been upwards, and has been steadily maintained. The closing price is 92⅝ ¼, both for money and the account, showing a rise of ⅛ for money and of 1/16 for the account. The characteristics of the market have thus been entirely different from what they were the previous week, the change indicating a reaction against heavy bear operations, and being stimulated by the postponement of the French loan operations, and perhaps to some extent by the improved prospects of the ensuing harvest. There are, however, a good many bear accounts still open, and it is hardly possible, if anything like a settled government is set up in France, but that it will be difficult to maintain the price at its present high level.

Subjoined is a list of the highest and lowest prices of Consols every day:—

	CONSOLS.				
	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	91½	91¾	91⅝	91¾	par to 5s pm
Monday	91⅝	91⅞	91⅝	91⅞	par to 5s pm
Tuesday	91⅝	91⅞	91⅝	91⅞	par to 5s pm
Wednesday	91½	92	91⅝	92⅛	par to 5s pm
Thursday	91⅞	92⅛	92	92⅛	par to 5s pm
Friday	92	92⅛	92⅛	92⅜	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

FOREIGN GOVERNMENT SECURITIES.—It will be seen from the usual list which we subjoin, that as the result of the week the course of transactions in the foreign market has been very nearly even. Towards the close the tendency has been firm, and prices are well maintained, but still only sufficiently so to counteract the drooping tendency of the early part of the week. On the whole too the symptoms of depression preponderate. The most decided changes for the week have been falls in Turkish, Egyptian, Spanish, and Peruvian stocks, which are all of a class that has been largely held by French capitalists. As we pointed out last week in our remarks on the money market, this class of persons is disposed to realise, and the movement in the stocks we refer to confirms our suspicions of what the market would be. The disposition of the public to invest, and the great abundance of money, enable them to realise to advantage; but the sales are nevertheless on so large a scale as to prevent any buoyancy in the market. It is not impossible that there may be a reaction as soon as the present movement has reached a limit, especially if the French demands should again be indefinitely postponed; but in the meantime there is little likelihood of any considerable improvement.

A Reuter's telegram from Versailles, received this afternoon, states that the New French Loan will be issued as a 5 per cent. stock, and the amount will be 80,000,000*l.*, instead of 100,000,000*l.* as originally fixed.

The Costa Rica loan is now at 2⅜ ⅜ pm., a fall of ½ for the week, and the Spanish National Land Certificates at ⅜ ⅜ pm., a fall of ¼.

The French National Defence loan is almost without change for the week.

With regard to the new Turkish loan, a *Times* telegram from Constantinople states that the "definite contract for a loan was signed on Saturday between the Turkish Government, the Crédit Générale Ottomane, and Mr Edwards, with his associated English, French, and German capitalists. The nominal amount of the loan is stated to be 5,700,000*l*, and the Firman and contract will be deposited with the Bank Poleterre." This confirms what we stated last week, that the previous announcement related only to an unratified arrangement. The past statements as to the terms of the intended loan must therefore be subject to ratification.

With regard to the recent action of the Committee of Turkish bondholders of 1862, the following statement is made by the *Levant Herald* of the 7th inst. :—

On Tuesday, May 30, Messrs Courtenay, Hanson, sen., and Heald, the gentlemen forming the syndicate recently appointed by the London Committee of the bondholders of this loan, had their first "official" interview with the Grand Vizier. Mr Hanson, though only one of the *adjoint* members of the triumvirate, was the spokesman of the occasion, and in stating to his Highness the object for which the syndicate had been formed, said that he had himself been induced to accept a place on it in no way by the few hundreds a-year attached to the office, but purely out of a desire to render service to the Porte itself, whose credit would, he said, be benefitted by such an increased confidence on the part of the English holders of its stock as it would be the aim of this syndicate to promote. With one of his peculiar smiles, and after taking counsel for some seconds with the loss of his beads, Aali Pasha thanked Mr Hanson and his colleagues for the friendly concern of the Imperial Government, but he hoped that, in the future as in the past, this would continue to rest on the sufficiently firm foundation of both the ability and the honest good will of the Porte to meet all its obligations. With reference to the particular loan of 1862, its bondholders, his Highness believed, had hitherto had no reason to complain of the punctuality with which their coupons had been met, and the Treasury needed no pressure whatever to secure to them a continuance of this good faith. After a few further verbal courtesies, Mr Hanson and his colleagues withdrew. In connection with this matter, we learn than an effort has been made to induce the Porte itself to authorise the deduction from the coupons which the Ottoman Bank has refused to sanction, but unsuccessfully—the Mahish having neither the will nor the legal power to impose any tax whatever on the stock of the loan.

ENGLISH RAILWAYS.—As we have already stated, there has been a very general improvement in this department. Among the leading railways the only decline is in London and Brighton, and in this the fall is but slight; and while prices have been stationary in one or two other cases, there is in the vast majority a perceptible rise for the week—the change being most marked in Metropolitan, Metropolitan District, and North-Eastern. The rise hardly compensates the fall of the previous two or three weeks, but it denotes a turn of the market, which is only natural after the steady decline which had set in. The course of the settlement, as we have hinted, had much to do with this change. The contangoes were much lighter than on the previous occasion, and it was in fact discovered that bears had oversold, and were under the necessity of buying back to close their accounts. Much of the stock recently put upon the market has been quite taken off it, and the weak bulls and bears having both been crushed, there is now a comparatively strong tendency to better values from the natural progress of investment. Probably this tendency is partly temporary, being largely due to the continued postponement of the French demands; but though cantion is needed, it is also true that such is the natural growth of English railways, a prudent investor might very safely select his investment and lock up the stock he purchases for a steadily-improving market.

The rise in the Metropolitan and Metropolitan District lines is especially accounted for by a report that some arrangement of their differences has been come to. This arrangement, it is stated, will be less favourable to the Metropolitan than the existing one, but much better than the reckless competition with which the shareholders were threatened.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending June 10 to 747,524*l*, being a *diminution* of 43,496*l* on the corresponding week of the previous year [Whitsun week]. The aggregate receipts of the half-year to date are now 15,879,946*l*, being an increase of 875,487*l* on the corresponding period of last year. The principal decreases for the week are—Lancashire and Yorkshire, 16,339*l*; Midland, 14,896*l*; Great Eastern, 6,589*l*; South-Eastern, 5,634*l*; Manchester, Sheffield, and Lincolnshire, 3,906*l*; and Brighton, 2,647*l*. London and South-Western has increased 3,015*l*; Great Northern, 2,017*l*; Caledonian, 1,458*l*; and North British, 1,671*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

American Securities.—The tone of the market has continued firm, though the amount of business transacted in either Government or State bonds has been limited. The leading fluctuations on the week are shown below. Advices from New York report but little progress in the issue of the Funding loan, of which only 100 millions (dollars) have been taken.

Joint Stock Banks.—The changes in the quotations for joint stock bank shares have not been numerous, and have been variable in character. Egptian Bank shares have declined 1 and Agra B ½; on the other hand, there is an advance of 1 in Standard of South Africa; ½ in English, Scottish, and Australia, Chartered Mercantile, and Hong Kong and Shanghae; and of ¼ in Anglo-Egyptian.

Telegraphs.—The tendency in value of cable shares has been in favour of holders, but the improvement has not been in any case important. Anglo-American and French Cables have advanced ½; West Indian and Great Northern ¾; British Indian Submarine, ¼. China Submarine, however, have given way ¼. A reaction of 2 has taken place in Silver's India Rubber Company, which closes 2 higher on the week; but Hooper's and Telegraph Construction show a fall of ¼.

Advices from Madrid state that the privilege to lay a submarine cable between England and Corunna has been withdrawn.

Mines.—The following are the principal changes in British mining shares:—A fall of 10 in South Caradon, 2 in East Lovell, 2½ in Van, and 1 in West Chiverton. Tin Croft has risen 2, and Asshteon ¼. In the foreign market there is a decline of ¼ in Cape Copper and United Mexican, 1 in St John del Rey, and ½ in Pacific. Colorado Terrible shares have risen ¼.

We have received the prospectus of the Ajax (Big Indian) Silver Mining Company, Limited, with a capital of 40,000*l*. The property is known as the Big Indian Lode Mine, situate upon Republican Mountain, Clear Creek, Colorado, in the immediate vicinity of Georgetown, North America, and of the Terrible, Equator, Brown, Silver Plume, and other mines, which are being most successfully worked. It is not proposed to raise the whole capital in the first instance, but to issue only 6,000 shares of 5*l* each, 2,000 of these being fully paid-up shares, to be issued to the vendor in part payment of the purchase money, the remainder (10,000*l*) being paid in cash. There are thus 4,000 shares now ready for allotment, and on these it is proposed that 10s per share shall be paid on application, no further call being made until the approval by the directors of the report of the engineer to be sent out as above explained. Should the report be deemed not satisfactory, the whole of the capital will be returned to the applicants, less only such necessary expenses as may have been incurred, which it is guaranteed shall in no case exceed one shilling per share.

The subscription list for debentures in the Anglo-Argentine Company will be closed on Monday next.

Miscellaneous.—There is no feature of interest to notice in this department, but the tone of the market has been firmer. Union Steamship shares have advanced 2, Madras Irrigation 1, North Metropolitan Tramways ¾, National Discount ½. Anglo-Mexican Mint show a fall of ¾, and London Financial ¼.

The directors of the St Thomas Dock Company (Limited) are prepared to receive subscriptions for 25,000*l* 10 per cent. debentures, to rank *pari passu* with a previous issue of 30,000*l*, forming a first charge on the profits of the dock and property of the Company. The amount proposed to be raised by the present issue is mainly required for repairing and putting to work the large Iron Dock, which was sunk when on the eve of completion in the harbour of St Thomas, in the West Indies, and which has been lately raised and transported to a place of safety, where it now awaits the necessary repairs previously to its being put to work in the harbour.

Exchanges.—There are no material changes from last week, except that the demand for bills on North Germany and Belgium has rather fallen off.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There being no export demand, the Bank has purchased all the gold to hand since our last, the amount taken to that establishment during the week being 485,600*l* in bars and coin. 60,000 sovereigns have been withdrawn for shipment to the Brazils, Lisbon, and the Cape. The arrivals comprise—76,000*l* per Cimbria, from New York; 2,000*l* per China, from New York; 223,000*l* per Rhein, from New York; 37,000*l* per Batavia, from New York; 5,000*l* per Roquette, from Africa; 26,000*l* per Tasmanian, from the West Indies; 36,000*l* per Nesterian, from Quebec. The shipments are—251,000*l* per La Plata, for the Brazils; 53,000*l* per La Plata, for Lisbon; 20,000*l* per Beetheven, for the Cape; 4 000*l* per Coquimbo, for the Brazils. The P. and O. steamer due about 20th July brings 501,000*l* in Australian gold.

Silver.—There is more inquiry for silver, though the market is not active. Sales have been effected at 60¾d and 60⅞d per oz standard. The China, from New York, brought 37,800*l*; City of London, from New York, brought 12,000*l*; Tasmanian, West Indies (bars and coin), 95,000*l*; Malta, from Alexandria, brought 5,700*l*.

Mexican Dollars.—The amounts received from the West Indies and from New York, have been disposed of at 58⅞d per oz for the new coinage, and at 60d per oz for the old (a very limited quantity). The P. and O. steamer Massilia took 76,440*l*, chiefly dollars, for China and the Straits on 10th inst.

Exchange on India for banks' drafts at 60 days' sight is 1s 10⅞d to 1s 10¾d per rupee.

Indian Government Loan Notes are unchanged. The 4 per Cents. are 93¾; the 5 per Cents., 100½ to 100¾; and the 5½ per Cents., 107⅞ to 108.

Quotations for Bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅞d to 5s 0¾d per oz std; ditto containing 5 grains gold, 5s 0⅞d to 5s 1d per oz std, last price; Mexican dollars, 4s 10¾d to 5s per oz, last price.

The sum of 57,000*l* in gold bars was sent into the Bank of England to-day.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended June 14 were—gold, 479,086*l*; silver, 187,599*l*. The exports were—gold, 358,417*l*; silver, 88,840*l*.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, June 19.

London and Westminster Bank, special general, Lothbury.

TUESDAY, June 20.

London and Australian Agency Corporation.
Ceylon Company, general.

WEDNESDAY, June 21.

Imperial Ottoman Bank, general, City Terminus Hotel.
Royal Exchange Assurance, general.
General Bank for Promoting Agriculture and Public Works, extraordinary, Brussels.
British Indian Submarine Telegraph, general.

THURSDAY, June 22.

Scinde, Punjaub, and Delhi Railway, general, London Tavern.
Colonial Company.

FRIDAY, June 23.

Madras Railway, general, London Tavern.
Norwegian Trunk Railway, special.

SATURDAY, June 24.

Chelsea Waterworks, general, Pimlico.
Malta and Mediterranean Gas, extraordinary.

NOTICES AND REPORTS.

STOCKS.

Danish 5 per Cent., 1863.—Bonds representing 8,300*l* have been advertised for redemption on the 1st July.

Turkish 6 per Cent. Loan, 1863-64.—The fifteenth and sixteenth half-yearly drawings have taken place in Paris, and the numbers have been published for redemption at par on the 1st of July.

Turkish 6 per Cent. Loan, 1865.—Bonds to the number of 9,700, of 20*l* each, have been drawn for redemption at par on the 1st of July. This represents the tenth and eleventh half-yearly drawings in one.

RAILWAY COMPANIES.

Bay of Havana and Matanzas Bonds.—Holders of the bonds of the loan of 250,000*l*, 1861, are informed that the certificates issued in respect of the unpaid portion of the coupon due, but unpaid, on the 10th June, 1870, and of the coupon due 15th December, 1870, will be paid, with interest at 7 per cent per annum, on and after the 15th instant. As regards the loan of 400,000*l*, 1865, it is notified that 21½ per cent. of the amount of the certificate, issued in respect of the unpaid portion of the coupons due 10th June, 1869, 10th December, 1869, and 10th June, 1870, will likewise be paid. Further certificates will be issued in respect of the coupons due 10th and 15th instant.

Glasgow and Cape Breton Coal and Railway.—A call of 2*l* per share is payable on the 10th July.

Oude and Rohilkund.—Heavy floods have retarded the progress of the works, and it has been decided in consequence to increase the waterway under some of the bridges. The completion of the lines from Lucknow to Fyzabad, to Byramghat, and for the first 60 miles towards Shahjehanpore, together with the branch from Allyghur to the Ganges, is expected early in 1872, and that of the Benares section, in which there are some heavy bridge works in the Juanpore district, at the end of 1872. The completion of the whole system of lines, including the two large bridges over the Ganges and one over the Ram Ganga, is looked for at the end of 1873. The working of the Cawnpore branch continues satisfactory.

Scinde, Punjaub, and Delhi.—The net revenue in the half-year amounted to 45,946*l*, exhibiting an increase of 24,673*l* compared with the corresponding half of the previous year, partly due to increased mileage. The statement of receipts and expenditure on capital account shows that up to the 31st of December last there had been received on account of capital the sum of 10,287,654*l*, of which there remained at the close of the year a balance of 253,797*l*.

Stourbridge.—It has been resolved to accept 13s 6d in the pound in settlement of the claims of the unregistered stockholders.

BANKS.

Anglo-Austrian Bank.—The net profit of the year, including the balance brought forward, amounted to 4,337,675fl. Five per cent. was divided on the 1st of January last, and it was decided to pay an additional dividend of 1*l* per share.

Bank of New Zealand.—The usual 15 per cent. per annum dividend has been declared, and 39,000*l* has been added to the reserve.

National Bank of Australasia.—The net profits for the half-year amounted to 37,496*l*, from which 3,446*l* was deducted, being the sum set down in the last report as necessary to cover all previous bad debts. The dividend recommended was at the rate of 8 per cent. per annum, leaving, after the addition of 4,000*l* to the reserve fund, 3,650*l* to be carried forward.

ASSURANCE COMPANIES.

British and Foreign Marine Insurance.—An interim dividend at the rate of 10 per cent. per annum, free of income tax, is declared.

English and Scottish Law Life.—At the quinquennial meeting the invested funds were reported to be 760,132*l*, and the net amount of existing assurances, 3,229,784*l*. The report showed a divisible surplus of 77,068*l*, which was distributed by appropriating 90 per cent. (67,881*l*) to the assured, and 7,706*l* to the proprietors, the former sum providing a reversionary bonus at the rate of 1½ per cent. per annum on the sum assured, and the latter raising the dividend during the next five years to 7*l* 15*s* per cent. per annum.

MISCELLANEOUS COMPANIES.

African Steamship.—The half-yearly report shows a revenue balance of 5,974*l*, out of which the directors recommend the payment of a dividend of 8*s* per share and interest at the same rate on the amount of the call, from the date of its payment to the close of the half-year; surplus, 272*l*.

Anglo-American Leather Cloth, Limited.—Capital, 50,000*l*, in 10*l* shares. It is intended to take over the works and business of an establishment on the Thames, opposite Woolwich Arsenal. The lease has 94 years to run, and has been purchased for 12,000*l*; and the works are capable of turning out from 70,000 to 80,000 pieces per annum, an amount which can be much augmented by small additions to the machinery.

Bombay Gas.—A dividend was declared at the meeting of 3½ per cent. for the six months.

British Australian Telegraph.—Interest warrants, at the rate of 5 per cent. per annum, will be issued for the first half of 1871.

British Indian Submarine Telegraph.—The gross receipts for the six months ended the 31st March were 42,644*l*, while the expenses were 17,316*l*. Out of the balance of 25,328*l* a dividend of 4*s* per share is declared, leaving 1,578*l*. For the two subsequent months of April and May the net receipts have been equal to the rate of 6 per cent. per annum. It will be remembered that during a portion of the above period the Falmouth cable was interrupted.

Great Northern Telegraph.—Interest at the rate of 5 per cent. per annum is announced.

India Rubber, Gutta Percha, and Telegraph Works.—In respect to the fire at the company's works, the following circular was issued:—

Sir,—It is with very great regret that the directors have instructed me to report that a fire occurred in our works at Silvertown yesterday afternoon, resulting in serious injury to a portion of the cable manufactory.

I have to add that, so far as can be at present estimated, we are fully covered by insurances, and that our principal manufactories and premises are unharmed, so that the general business will be continued as usual. The utmost exertions will be used to reinstate the damaged works, and it is fully expected that the inconvenience caused by the fire will be speedily overcome.—Your obedient servant,

J. A. BRAND, Secretary.

John Brown and Co.—The balance sheet shows a considerable improvement on those of previous years. The directors propose to pay 5*l* per share, which, with a 2*l interim* dividend already paid, will be equal to 10 per cent. for the past year on the paid-up capital of the company, leaving a balance of 32,739*l* 19*s* 4*d*.

London Quays and Warehouses, Limited.—Mr James Cooper, the liquidator, has announced the payment of a further dividend of 9*s* in the pound, making 15*s* in the pound. The dividend is payable at the offices of Messrs Johnstone, Cooper, Wintle, and Evans.

North Metropolitan Tramways.—The line from the Angel, at Islington, to Finsbury has been opened.

Société du Cable Transatlantique Français.—The report shows a profit balance of 2,552*l*, out of which the directors recommend a dividend of 2½ per cent., making with the dividends already declared 10 per cent. for the twelve months. The balance is 2,552*l*. The current receipts enable the dividend to be paid on the 10th of July, without interfering with the interim distributions, although the above-mentioned balance includes an amount still due from the French Government. It is added that the maintenance of uninterrupted communication with America, notwithstanding the accidents which have occurred both to this and the Anglo-Company's cables, has shown the advantage not only to the companies, but to the public, of the working arrangement between the undertakings. At the meeting a shareholder will propose resolutions for the publication of the traffic, and the commutation of the Omnium shares.

West India and Panama Telegraph.—The cable to Antigua has been successfully laid.

MINING COMPANIES.

North American Gold Mining, Limited.—Capital, 80,000*l*, in 4*l* shares. The number of 13,750 shares is offered for subscription, upon which 2*s* 6*d* per share is payable on application, and the balance when called upon after the receipt by the company of a satisfactory report from the special agent appointed by the directors to examine the property. The mines are stated to consist of gravel-washing gold properties in Sierra county, California. They have already been worked at a profit, and are stated to be capable of yielding large returns. The purchase price is 45,000*l* in cash, and 25,000*l* in shares.

Port Phillip Gold Mining.—A dividend of 1*s* per share, free of income tax, has been declared.

Oats	1,936 6	...	25 11

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The weather having recently been favourable for the growing crops, and the accounts from the agricultural districts being more encouraging, the grain trade at Mark Lane to-day assumed quite a retail character, and the amount of business transacted was very limited. Prices were nominally unchanged for both English and foreign wheat, but factors showed more disposition to give way. Barley was rather firm, but beans and peas were unaltered in the absence of business of importance. Oats and maize showed a slight downward tendency in value. In flour there was no variation to note. This week's import of foreign and colonial produce into London have amounted to 14,640 qrs of wheat, 3,600 barley, 72,720 oats, 4,890 maize,' 2,150 beans, 680 peas, 1,020 sacks and 6,710 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull, and the tendency of values was in favour of buyers.

The Liverpool cotton market has been exceedingly active during the past week, and a very large business has been done at an advance of $\frac{1}{4}$d to $\frac{1}{2}$d per lb. The total sales for the week are 133,630 bales, of which the trade have taken 71,110 bales; speculators and exporters, 62,520 bales. The imports are 124,790 bales; the actual exports, 22,474 bales; and to-day's stock is 945,240 bales. Quotations for American descriptions have advanced $\frac{1}{4}$d per lb; East Indian, $\frac{1}{4}$d per lb; and Bengals, $\frac{1}{2}$d per lb. To-day the market closes firm; sales, 18,000 bales. Prices hardening.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 15, 1871:—

	Imported.	Exported.
American	93,987	12,025
Brazilian	20,657	2,630
East Indian	9,581	17,500
Egyptian	6,204	283
Miscellaneous	2,705	638
Total	133,132	33,078

At New York, on June 15, middling Upland cotton was quoted at 29½c per lb. Bombay advices to June 12 quote fair Dholleral at 204 rupees per candy. The shipments of the week had amounted to 45,375 bales. We give the following telegram, which arrived from New York to-day, under reserve, the estimates forwarded by the Agricultural Bureau being below the mark as a rule:—The Department of Agriculture reports that the decreased average of cotton will be 1,250,000 bales. The crop is below average in every state, and is not expected to exceed 3,500,000 bales, which an unpropitious season might reduce to 3 millions.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, May 20:—The amount of business in cotton transacted during the week has been restricted owing to the very unusual weather which has prevailed. Transactions do not exceed 9,000 candies of all descriptions, and of that total Dholleral, Bhownuggur, and Mowa unite for about 3,500 candies. Prices are higher all round, but the advance is chiefly noticeable in the above mentioned qualities. The chief effect of a recent storm has been to check arrivals of boats from the Dholleral ports, and, as might be expected, make that description very scarce and dear on the spot. All exporters are naturally anxious to make as much of their cotton as possible May shipment, and a keen competition has consequently existed for such parcels as were ready and available for sale. At the moment the "green" is quite denuded of Dholleral stocks, but we learn that many boats from that quarter have taken shelter in the small ports contiguous to the Bombay, Baroda, and Central India Railway, and moderate supplies by rail may be expected in a day or two. Accounts from Broach and Dholleral report heavy rains, and that the country roads are quite impassable. Between Dholleral and

Digitized by Google

Wudwan it is reported that about 6,000 bales have been caught in the rain, and as the carts are unable to move backward or forward, a great deal of damage will no doubt be done to the docras. The chief question now before exporters is whether a break in the weather is likely to take place, which will admit of further supplies coming forward from the northern ports. Should fair weather set in again, a large business would no doubt be done between this and (say) the 10th proximo. Many people seem to think that we are presently experiencing the south-west monsoon, and that our supplies hereafter will be very scanty. From Tinnevelly we have a telegram dated 18th instant, quoting 6d per lb, c. and f.

Actual exports since last mail left, 45,325 bales.

The Imperial Ottoman Bank, writing from Alexandria, on June 2, remark:—Still more favourable accounts from Europe, with rapidly advancing prices in America, have caused great excitement in our cotton market during the first two days. Holders in many instances have withdrawn their stocks altogether, until they learn the result of this upward movement. All qualities have advanced ¼d per lb since the commencement of the week. We quote:—Middling fair, 7¾d per lb, f.o.b.; fair open, with staple, 8¼d, ditto; good fair, with staple, 8¾d, ditto; fully good fair, with staple, 9d to 9¼d, ditto. Weekly arrivals, from May 26 to June 2, 9,040 crs. Sales, from May 26 to June 2, 10,720 crs. Shipments, from May 26 to June 2—To England, 1,885 bales; to Italy, 194; to Austria, 59—total, 2,138 bales.

More steadiness has prevailed in the colonial produce markets, and a fair amount of business has been transacted in sugar at full quotations. The stock in the United Kingdom on June 10 was estimated at 125,000 tons, against 169,002 at the corresponding period last year. Most kinds of coffee have improved 1s per cwt in value, the demand having ruled more active. The Government have been large purchasers of rum this week, and the tone of the market has been steady. Fine Trinidad cocoa has sold freely, but common descriptions have met with little inquiry. Rice was in good request early in the week, but has closed with less animation.

The following report, dated May 13, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The break of the south-west monsoon, with the consequent uncertain weather, is not favourable to curing or shipping operations, but exports of coffee have nevertheless been considerable, maintaining the figures at fully those of last year. The distribution of these may be seen below:—

PLANTATION COFFEE.	1871. cwts.		1870. cwts.
To Great Britain.....	588,344	.....	579,632
Foreign ports.....	33,583	.....	33,866
Australia and India ...	13,333	.....	9,177
	635,670	.....	622,295
NATIVE COFFEE.	1871. cwts.		1870. cwts.
To Great Britain	73,767	.....	55,835
Foreign ports.....	16,215	.....	38,068
Australia and India ...	3,184	.....	2,137
	93,166	.....	96,040

Unfavourable advices relative to the state of the coffee markets in Europe have had the effect of withdrawing purchasers of our staple, growers have consequently been unable to obtain offers approximating to previous quotations, and in the absence of business we must call our quoted rates nominal. Not much has been done in native Ouvah, which we quote slightly within our last figures.

The annexed is dated Akyab, May 12:—Supplies of Nakrenzic rice have been pretty fair of late, and this has enabled several shippers to complete their requirements and to retire from the market, which circumstances, together with more favourable advices from the southern ports, has caused a much easier feeling here. The natives in the interior have consequently become more willing to realise their stocks, and this must have its effect on prices here ere long, principally if the demand remains as weak as it is just now. At present, however, the quotation given in our last report remains unchanged, and good three parts shipping quality costs still 54 rs to 55 rs per 100 baskets, 28 lbs, equal to 5s 8d to 5s 8¾d per cwt, free on board. Supplies of rice consist entirely of grain purchased in the interior beforehand, whilst of real market rice none is coming in. Of rain we have had only a few showers so far, and, on the whole, the weather has remained very favourable to shippers. Exports to Europe up to date—1871, 96,439 tons; 1870, 56,164 tons; 1869, 48,349 tons. Tons loading—1871, 7,160 tons burthen; 1870, 18,200 ditto; 1869, 12,400 ditto.

These quantities include all that has arrived off coast and the different ports, but not yet taken into stock.

With reference to the wine trade, Messrs Matthew Clark and Sons observe:—We have nothing new to report in our wine and spirit market during the past month; a fair moderate demand has prevailed, but few large transactions have been entered into. The Board of Trade Returns show that the falling off in April has been recovered in May, the quantity of wine taken for home consumption last month showing a decided increase. In brandy also the home delivery increased last month, and the total delivery this year already shows an increase of upwards of 125,000 gallons over previous years. The imports however continue to be excessive, and the returns show that an addition of 338,148 gallons has been made to the bonded stock during the month of May. The market at Cognac is reported firm, with little doing. Here the position is the same, no buyers, but holders indifferent about selling at full rates. The vines are looking well, and with good promise for the next vintage.

Annexed is Messrs Hunt and King's circular:—The extreme dullness and depression in the silk market reported at the beginning of May continued throughout the month. Prices have gradually declined, and our quotations now show a further fall of about 5 per cent.; this reduction has however within the past week attracted a considerable demand. The deliveries again show an improvement. In China silk there has been a fair business within the last few days, and about 1,000 bales, chiefly tsatlees, have changed hands. Taysaan of coarse size is neglected. In Canton silk, fully 500 bales have also been taken. In Japan silk, mybash especially has been forced to a very low point, and nearly 1,000 bales have been sold, a much better demand having arrived from the continent this week. In Bengal silk there is very little doing. In European silk prices are lower. The crop is expected to average about as last year.

IMPORTS, DELIVERIES, and STOCKS to June 1, 1871.

	Imports. bales.		Deliveries. bales.		Stock, June 1. bales.
China.....	2,486	.....	3,695	.....	22,890
Japan.....	848	.....	567	.....	7,778

Waste.....	769	.....	1,549	.....	9,230

According to Messrs Arles Dufour and Co., of Lyons, the progress of the European silk crop has continued to attract the chief attention of dealers. In Spain, the result is now ascertained to be quite equal to that of last year. In France, the wet and cold weather of the past few days is interfering with the gathering of cocoons, and may prove prejudicial to

Digitized by Google

the yield in silk. Prices in that country have consequently risen. In Italy, it is too early to form an exact opinion, particularly for Piedmont; but in Lombardy, Friouli, Tuscany, and Naples the crop will, in quantity, be at least equal to that of last year. Prices therefore have not experienced any appreciable changes. Business, which until now had been exceedingly quiet, has been reviving a little during the last week, but the heaviness of the stocks, both of raw material and manufactured goods, coupled with political and financial difficulties, and the threatened imposition of a duty on imported silk, are expected to check any important rise.

Messrs Windeler and Bowes report:—Consumption of colonial wool continues very active, and manufactured articles sell freely. From the continent, the United States, and from our domestic buyers we have had a brisk demand at an advance upon last sales' prices, and there is a prospect of a steady and sustained competition at the auctions, to begin 22nd inst. Considering that a strong demand often arises between the auctions, it is a question whether it will not be desirable for consignors to authorise and encourage intermediate sales by private contract: within the last month we could have sold some thousands of bales, entire flocks, at a decided improvement on previous rates.

Annexed is Messrs Wm. Moran and Co.'s indigo report, dated Calcutta, May 16:—We have but little change to notice in the prospects of the growing crop, which continue pretty favourable. Manufacturing is progressing but slowly in Eastern Bengal owing to the very low state of the rivers, and the yield from the plant is still small, being only about two maunds per 1,000 bundles; the weather however is all that could be desired, and we have no doubt the next returns will show an improvement. Nearly all the districts of Lower Bengal, as well as Tirhoot, Chunnparun, and Chuprah have had good falls of rain, and the condition of the plant is generally satisfactory. London telegrams have given us the daily results of the quarterly May sales now being held; up to yesterday, 10,200 chests had been passed, of which 3,800 chests were sold; the advance quoted on the first day of 3d per lb on February rates was speedily lost, and prices fell rapidly till they showed a decline on February of from 3d to 6d per lb (7·8 rs to 15 rs per maund), the lower qualities being the least sought after. Exports of indigo from 1st November, 1870, to 12th May, 1871:—To Great Britain, 16,569 chests; France, 513; Trieste, 2,790; foreign Europe, 250; America, 2,405; Gulfs and Levante, 1,762—total, 24,289 chests.

The annexed is dated New York, June 3:—General trade has settled down to the usual summer dulness, so far as the distribution of merchandise is concerned; but the export movement is fair, with the prospect of a good outward business during the summer, as there is a liberal surplus of the leading agricultural and other staples still on hand, while Europe has the disposition and ability to absorb them at fair prices. The predominant features in financial circles are the continued plethora of currency and marked ease in the money market, and the hardening tendency of the gold and foreign exchange markets, with continued free remittances of gold. The abnormal condition of the cotton market, with prices relatively higher at home than abroad, has for some time past held the export trade in that staple in check; but there are indications of a speedy restoration of the equilibrium, and consequently an increased supply of exchange, which cannot fail to have an important bearing on the gold market. The new five per cent. loan moves slowly. Less than a hundred millions have been taken, and at the rate subscriptions are made it will be some months before that sum is reached. The extreme ease of the money market for some weeks past is as yet undisturbed, the rates for call loans remaining 3 to 4 per cent. on call, and 5 to 7 per cent. for discount of prime commercial paper, and 7 to 9 per cent. for second-class names.

THE COTTON TRADE.

LIVERPOOL.—JUNE 15.

Cotton continues in very active demand for consumption, as well as for export and speculation, and prices have gradually hardened, quotations this afternoon showing a further advance. The Bank rate has been this day reduced to 2½ per cent. For Sea Island there has been a good demand, almost entirely confined to the better qualities, which commanded full rates. American has been in very general request, and has advanced ½d per lb. New York advices to the 15th instant quote middling Upland 20½ cents, costing to sell in Liverpool 10⅝d per lb, by steamer. In Brazil qualities have been a shade dearer, at ⅛d to ¼d per lb advance. The business in Egyptian has again been large, including considerable purchases on speculation and for export; prices are fully ¼d per lb dearer. East Indian has been in strong demand, and the supply offering is much reduced; prices have advanced about ¼d per lb.

In cotton "to arrive" the business continues very large, at advancing prices. The latest quotations are:—American, basis of middling, from any port, May shipment, 8⅞d; delivery, from any port, not below good ordinary, July-August, 8⅛d; August, 8⅛d; August-September, 8⅛d; Savannah, not below low middling, August, 8⅞d; low middling, New Orleans, not below good ordinary, June delivery, 8¼d; Broach, Cape, good fair new merchants, ship named, 7d; good fair ginned, ship named, 7⅛d, 7⅞d; Dholleras, fair new merchants, Cape, April-May shipment, 6⅛d; May, 6⅛d; May-June, 6⅛d; Oomrawuttee, fair new merchants, Cape, ship named, 6⅛d; at sea, 6⅜d; Scinde, fair new merchants, Cape, ship named, 5⅝d; Bengal, Cape, fully fair new merchants, June-July shipment, 5⅛d per lb.

The sales of the week, including forwarded, amount to 133,630 bales, of which 36,590 are on speculation, and 25,930 declared for export, leaving 71,110 bales to the trade.

JUNE 16.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

	bales.
An increase of import compared with the same date last year of	780,498
An increase of quantity taken for consumption of	235,590
An increase of actual exports of	263,418
An increase of stock of	317,320

In speculation there is an increase of 48,030 bales. The imports this week have amounted to 124,792 bales, and the quantity of American cotton reported afloat for Great Britain (including cable advices to June 9) is 132,000 bales, against 115,000 bales last year. The actual exports have been 22,474 bales.

LONDON.—JUNE 15.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There has been a strong demand throughout the past week, large sales having been effected at an advance of nearly ½d per lb on the spot, and ⅛d to ¼d per lb for cotton afloat. The market at the close is very firm at this advance.

Sales to arrive:—3,050 bales Tinnevelly, at 6⅞d to 7d, February and April sailing to July shipment, for good fair; 4,500 bales Western Madras, at 6d to 6⅛d, May to July shipment, for fair now—5¼d to 6⅛d, March to May sailing, for fair; 3,800 bales Coconada, at 6¼d to 6¾d, February to April sailing,

Digitized by Google

May to July shipment, for fair red; 200 bales sawginned Dharwar, at 6¾d, May shipment, via Suez, for good fair; 250 bales Broach, at 6¾d, May-June shipment, for fully fair; 600 bales Broach, at 7¼d to 7¼d, April shipment and sailing, machine-ginned, for good fair; 10,500 bales Dhollerah, at 6¼d to 6¼d, April to June shipment and ship named, for fair; 3,700 bales Oomrawttee, at 6¼d to 6¾d, February-March sailing to May-June shipment for fair—7d, ship named, for good fair; 500 bales Comptah, at 6¾d, ship named, for fair; 7,500 bales Bengal, at 5¾d to 5¾d, January-February sailing and April to June shipment, for fair; 900 bales Rangoon, at 5¼d to 5¾d, March sailing and ship named, for fair—total, 35,500 bales.

NEW YORK, JUNE 2.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 2. From the figures thus obtained it appears that the total receipts of the seven days Britain, 7,789 to France, and 5,498 to rest of the continent, while the stocks as made up this evening are now 267,139 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending June 2.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	3038	8803	13521	16998	92978	107487
Mobile	...	965	965	2114	24833	31129

Texas	12825	1033	13858	...	52314	29017
New York	6461	276	6737	6815	52000	51400
Other ports	133	...	133	395	17000	19000
Total	31542	15597	47,069	36160	267139	279820
Total since Sept. 1	2214912	729263	2944177	1956793	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 1,555 bales, while the stocks to-night are 8,941 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 26, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1.	Exported since September 1 to				Shipments to Liverpool Ports.	Stock.
	1870.	1869.	Great Britain.	France.	Other Foreign.	Total.

The buoyancy noticed in the market last week has continued this week, and prices have rapidly advanced. There has not been a very active demand, but the supply here is small, and the balance in the country left of the crop after declaring the engagements is very limited, so that holders remain firm, advancing their asking rates almost daily. For export there has been but little inquiry, our quotations during the most of the week having been about 1c above the parity of Liverpool. Spinners also have held off supplying their more pressing wants. But notwithstanding this limited inquiry prices have advanced as stated above, and to-night middling Uplands closed at 17¼c, against 16¼c a week ago, and 15¾c the previous Friday, being an advance of 1c since last Friday, and of 2c during the last two weeks. For future delivery, the quotations have shown more fluctuations, but at the close the improvement in prices is very nearly the same as for spot cotton. Low middling closed to-night at 16¾c for June, 17¼c for July, 17⅞c for August, and 16¾c for September. The middling sales of this description for the week are 88,900 bales. For immediate delivery the total sales foot up this week 18,107 bales, including 2,213 for export, 7,218 for consumption, 2,902 for speculation, and 5,774 in transit. Of the above 12 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c	c	c	c
Ordinary	17¼ @ ...	17¼ @ ...	17¼ @ ...	17¼ @ ...
Good ordinary	17¾	...	16¾	17¾
Low middling	17	17¼	17¼	17¾
Middling	17¾	18	18	18
Good middling	18	19	19¼	19¼

For forward delivery the sales have reached during the week 88,900 bales (all low middling or on the basis of low middling).

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending June 2, 1871.			Week ending June 2, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	604	1565	3366	737	1272	11870
Columbus	266	813	2597	896	673	6125
Macon	253	511	2539	241	173	2108
Montgomery	224	404	1239	238	620	5083
Selma	237	115	1317	189	274	8235
Memphis *	2189	4217	7795	2107	4154	12340
Nashville	1305	1649	885	510	1233	4819
	5063	9638	24660	3978	9030	50480

* A count of stock at Memphis to-day made the stock 7,795 bales, which was 1,580 bales more than the running count.

The above totals show that the interior stocks have decreased during the week 2,197 bales, and are to-night 25,711 bales *less* than at the same period last year.

The following are the receipts of cotton at New York, Boston, Philadelphia, and Baltimore, for the last week and since September 1, 1870:—

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 15.—A very sluggish demand has been the prevailing feature of the market during the past week, as prices for both yarns and cloth have further advanced owing to the continued activity and higher rates ruling in the cotton market. In yarns for shipment very little has been done as the recent advance is nearly equal to 1d per lb, and prices in none of our large consuming markets warrant merchants in buying at present rates. The home trade demand for yarns has also been quiet, and chiefly to supply pressing wants. In the cloth market the same inactivity rules, the advances asked being the chief cause of the limited business in progress. There are some offers for India shirtings and similar goods, but at prices usually too low to lead to business. The continental trade as yet has but slightly increased. There is more doing for the home demand, and stocks in merchants' hands have lately been materially reduced, which will likely cause them to come into the market soon. The market closes quiet, but very steady.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Tone of market steady, and if sellers would accept a trifle less than current quotations, a fair amount of business would be the result.

BRADFORD.—The wool market is extremely firm. No material change has occurred either in demand or quotations. Prices in the country are in marked advance of those current in this market, and the position of the stapler is consequently one of some difficulty. There is a steady business doing in the yarn market. Manufacturers are all well employed on late contracts. Prices are firm.

LEEDS.—A satisfactory trade has been done in the woollen cloth halls. Any quantity of orange, blue-gray, and dark mixtures could have been disposed of at the prices offered; but not a few makers are holding out for a further advance. That holders of large stocks are doing this shows great confidence in the future on their part. Employment of all kinds appertaining to the woollen trade has seldom been more abundant than at present.

ROCHDALE.—Since last market day there has been rather a good run upon stocks. Both the home and the shipping houses are exhibiting more spirit, besides which some Canadians have made their appearance, and the aggregate of thereals, both plain and coloured, changing hands is not unsatisfactory. Yorkshire goods are bought at full rates. Wool is not in the least easier to buy.

BELFAST.—Flax—Very little presented in our various markets during the past week. Demand was active for all descriptions, at very firm rates. Yarns—Demand scarcely so active as previously, consequent on the advanced prices demanded by spinners, still sales reached a large amount. Linens (brown handloom)—Demand fair for almost all descriptions. Power-loom—Transactions have been to a moderate extent. Good makes of roughs specially inquired for. Linens (bleached and finished)—Home trade orders to an increased extent have been placed. Stocks stationary. Prices steady.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JUNE 2.

The markets the past week have been unsettled for flour and grain, but except a decline in oats prices show very little change from last Friday. Flour continues to arrive in quantities barely equal to the wants of the market, and although the shipping movement is considerably curtailed, prices have ruled comparatively steady, very low grades and flours from old wheat showing, however, some depression. The better grades have uniformly brought full prices, and we note more business in Southern shipping extras, which are latterly been going on. Amber winter wheat has declined 2c to 3c under a more liberal supply, and subsidence of demand from the continent. New white wheat has arrived from Georgia, and is ten days earlier than usual. To-day the market was somewhat unsettled by a recovery in Liverpool of the decline reported yesterday, in the face of receipts of 70,000 quarters for three days. Corn has varied but little. The receipts from the canal have been in much better condition than last week, and have been taken freely for export, mainly at 69c to 70c for that suitable to go forward by steam, and 72c to 72½c for that which will stand the voyage by sail, with some choice car lots at 73c to 74c, and unsound and inferior boatloads 66c to 69c, closing steady in our range; yellow corn has been active and firm. There has been a great pressure to close out the stock of oats preparatory to the receipts of supplies by canal, and prices have declined 2c to 3c. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There was considerable firmness in the grain trade at the opening of the week, but the fine growing weather subsequently experienced has had the effect of depressing the market, more particularly for wheat. At Liverpool and Wakefield to-day, a decline of about 1s per quarter took place, and a similar reduction must have been submitted to in this market to effect business. The accounts from the agricultural districts, though somewhat variable, are not unfavourable to the crops generally. If wheat has fallen off at all, it is apparently on ill-farmed and poor lands, and at the present moment there is little to apprehend in regard to the probable return. Another cheering feature in the agricultural outlook is the improvement in the grass lands, which have progressed considerably under the influence of the late genial rains. As yet little grass has been cut. Barley, beans, and peas are generally favourably spoken of; but more moisture would benefit the oat crop.

The spring corn trade has presented no special feature, the dealings in barley having been restricted. Beans and peas remain without change in value; but oats are cheaper. Flour has continued dull of sale.

Mr George Dornbusch thus reports as to the floating grain and seed trade:—During the last eight days 53 grain and seed-laden vessels have arrived at ports-of-call, viz:—19 wheat, 13 maize, 6 barley, 3 rye, 1 milletseed, 4 cottonseed, 1 valonia, 2 ground nuts, 1 oilcake, 1 flour, 2 sundries. The floating grain trade has been wanting in animation. Wheat slow and cheaper to sell. Maize—The few cargoes have been readily disposed of at about last week's prices. Barley in fair demand, at steady prices. Of rye only 3 cargoes were offering, in imperfect condition, which could not readily be disposed of at the prices asked—one sold to-day at 34s per 480 lbs, continent. The reported sales are as follow:—Wheat—3 arrived cargoes Ghirka to Odessa, 49s to 49s 6d; Nicolaieff, 50s per 492 lbs; No. 1 Milwaukie spring and New York, 56s per 480 lbs; No 1 spring, 56s per 480 lbs. On passage, 1 cargo Ghirka Nicolaieff, 51s 3d per 492 lbs. To be shipped, 53s 6d per 480 lbs. Maize—6 arrived cargoes: Moldavian and Sulina, 35s 6d to 36d; old ditto, 36s and 36s 3d; Odessa, 35s 3d; Foxanian, 36s per 492 lbs. On passage — 7 cargoes: Galatz and Sulina, 33s to 35s 3d per 492 lbs; new Danubian, 33s 6d; ditto (old crop), 32s 6d; ditto and Kustendje, 30s 6d to 33s per 480 lbs. To be shipped, 1 cargo mixed American and New York or Montreal, 30s 6d per 480 lbs. Barley, 1 cargo arrived at Malta, 27s per 480 lbs. Linseed in fair demand at late prices. Arrived in London, 900 bags and 200 tons East India, from Calcutta, at 63s 6d. On passage, 1,200 bags East India, from Bombay, 61s per 416 lbs; and 3,000 quarters Black Sea or Azow, 61s 3d per 424 lbs. To-day 600 tons Calcutta sold at 63s 6d per 410 lbs, A.T. Rapeseed quiet, the tendency in prices being in buyers' favour. Arrived in London, 200 tons ordinary brown Calcutta, at 66s 3d per 416 lbs. On passage, 500 tons Calcutta, at 66s 3d to 66s 6d; and 200 tons inferior yellow mixed, at 67s 6d per 416 lbs. Shipped or to be shipped, 200 tons ordinary brown Calcutta, 65s 6d to 66s per 416 lbs. Cotton-seed slow; nominal at 8l 15s to 9l per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a quiet market during the week, but no alteration in prices. The recent demand for low descriptions has quite subsided. Very moderate sales of West India have been effected, although the supply shows some increase. 1,647 casks had sold to yesterday, including the parcels by auction. Barbadoes brown to fine yellow, 29s to 35s 6d. Good to fine crystalised Demerara, 37s 6d to 38s 6d per cwt. Few floating cargoes are reported. During the past two days there has been some increase of demand for refined goods. The landings of West India were rather heavy last week, but the home deliveries have so greatly increased that the stock is still much less than usual. Stocks of other kinds are also smaller, but the excess in beet sugar is important. The total stock in London, as per last return, was 68,500 tons, against an average of 75,000 tons in the three preceding years.

Mauritius.—There have not been any public sales this week. A floating cargo per Helena sold at 27s for Liverpool.

Madras.—140 bags brown native by auction realised 23s to 23s 6d. No further business reported in Jaggery. Price, 20s to 21s per cwt.

Manila.—3,706 bags clayed of old import offered by auction were taken in above the value. 120 tons by private contract at 25s 6d, and 750 bags Zeba at 22s per cwt.

Other Foreign.—At auction 451 casks 70 barrels Porto Rico were chiefly taken in. A few lots low to good yellow sold at 31s 6d to 35s 6d. 71 boxes grainy Havana, 37s to 37s 6d per cwt.

Foreign Cargoes.—One of Havana, No. 11¾, has sold for the United Kingdom at 31s per cwt.

Refined.—The market is rather firmer than last week, with a slight advance in prices for the common qualities of dry goods. Fine have sold at some reduction during the last fortnight, as supplies of foreign are expected.

MOLASSES.—About 620 puncheons Trinidad have sold afloat for the United Kingdom at 11s 4½d. Sales on the spot are about 400 puncheons Berbice and Demerara at 11s to 11s 3d; St Kitts and Antigua, 12s to 12s 9d per cwt.

RUM.—Towards the close of last week purchases made by the Government have a firmer tone to the market, and the deliveries have been rather large. Several sales are reported in Jamaica at prices ranging from 3s 3d to 4s 6d; common kinds are in steady demand. Leewards in punch-ons: pale to good, 1s 6d to 1s 8d; Demerara, 1s 8½d to 1s 9d. 200 casks Mauritius have sold at and about 1s 4d per gallon, duty paid.

COCOA.—The public sales have gone off with fair spirit, and occasionally at rather higher rates for Trinidad, of which 1,324 bags chiefly sold: grey and ordinary, 54s to 58s; good ordinary to fair, 59s to 68s; good to fine, 70s to 105s. 212 bags Grenada part sold at 46s to 52s 6d. 602 bags foreign part sold at 38s for Cubas. 92 bags Guayaquil withdrawn at 49s to 56s. Privately sales of the latter at 47s 6d to 54s 6d per cwt. With a continuance of very large deliveries, the total stock is now 36,064 bags, &c., against 35,179 bags last year, and 38,233 bags, &c., in 1869 at the same date.

COFFEE.—The large deliveries here and in Holland, with some demand for France, has led to more business, prices being in many instances 1s to 2s per cwt higher. Native Ceylon has sold by private contract to the extent of 3,060 bags at 54s to 55s. 570 casks 132 barrels 169 bags plantation Ceylon by auction went rather dearer for colory sorts: middling to fine bold, 65s to 83s; pale and grey, 59s to 67s. 731 cases 764 bags East India went at full rates to same advance; Wynaad, 63s to 65s; bold, 69s to 75s; colory Coorg, 70s to 80s 6d; native sorts, 53s 6d to 59s. 169 bales Mocha part sold at 86s 6d to 87s; low ungarbled, 78s to 80s. 285 bags Singapore at 59s to 59s 6d for Bally. 269 bags Honduras part sold at 53s 6d. 2,538 bags Guatemala went as follows, and all sold: pale to fine ordinary, 56s to 61s; colory, 62s to 71s 6d. 2,233 bags Costa Rica at 54s 6d to 63s 6d. 160 casks 107 barrels 569 bags Jamaica found ready buyers; low to good ordinary, 50s to 56s; fine ordinary to middling, 57s to 68s. Several parcels of East India, ex last week's sale, have sold by private contract; also a good business in plantation Ceylon.

TEA.—There has been an increased supply of red leaf Congon from

Digitized by Google

recent arrivals. In common to fair grades the transactions are of moderate extent, previous rates being maintained. New season's Congou, per steamers, expected in the course of five or six weeks. Arrivals of Indian tea have been rather heavy, and lower prices generally established by private contract. At the public sales, Assam Company's growths obtained previous rates for broken teas and Pekoe, but fine Souchongs prices were lower. Other kinds by auction dull. At a small sale of China tea held yesterday, some fine Moning sold at 2s 2½d per lb.

RICE.—Some arrivals of soft grain have taken place. One cargo of Rangoon was reported sold yesterday at 10s. ex ship. On the spot Bengal has sold at 10s 3d to 13s. 1,000 bags Rangoon at 9s, including some sea-damaged; 700 tons Raree to arrive, at 9s 10½d to 10s ex quay, and 870 tons Ballam kind at 9s 9d, commercial terms.

IMPORTS and DELIVERIES of RICE to June 10, with STOCKS on hand.

Imports ..... tons	34200	16750	27160	27160
Deliveries	37500	27650	20000	26370
Stock	29830	38070	47000	17310

SAGO.—A sale of small grain has been made afloat at 15s 7½d. 255 bags by auction were taken in at 17s 6d for rather bold brownish.

TAPIOCA.—1,680 bags chiefly found buyers at 1½d to 2¼d per lb for Penang and Singapore of low to fair quality. 317 bags Penang tapioca flour bought in at 1¼d per lb. Several sales privately. 503 bags pearl tapioca sold at 18s 6d to 19s per cwt for medium and bold quality.

BLACK PEPPER.—Further speculative business has been done at ¼d above last week's prices, but the sales were not large at the advance: good Singapore, 5¼d; good Penang, 5¾d. 221 bags of the latter by auction sold at 5¾d to 5¾d. 1,000 bags Singapore were chiefly withdrawn above the rates. Some good sold at 5¼d. The last transaction afloat was at 5¼d per lb.

WHITE PEPPER is again rather higher. By private contract Singapore has sold at 8¼d to 8¾d. 128 bags damaged at auction realised 8¾d per lb.

OTHER SPICES.—A large quantity of pimento was offered at Wednesday's sales—viz, 3,226 bags, and the bulk taken in. The portion sold realised 1¾d to 2d. 50 cases low Java kind of mace were chiefly bought in. A portion sold at 3s 3d. 3 cases of middling Penang, 3s 7d. 87 packages brown nutmegs sold at about the previous rates—68's to 64's, 8s 3d to 3s 6d; 80's to 74's, 2s 6d to 2s 7d; 84's to 82's, 2s 5d; small 116's to 96's, 2s 3d to 2s 3d per lb. 1,050 barrels Jamaica ginger nearly all sold. Low to good ordinary, 38s to 47s; rather bold to middling, 48s to 67s; good to fine, 70s to 100s. Privately business has been done in Bengal at 26s 6d to 27s 6d; African, 32s to 33s per cwt. 138 bags cinnamon chips, part sold at 3¼d per lb.

SALTPETRE.—The market is firm, and a few sales of Bengal have been made, chiefly in the lower ranges, at 26s 3d to 26s 9d prompt. To arrive, 50 tons Bengal sold at 27s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to June 10, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	5500	4650	3700	2800
Total delivered	5329	7130	4210	4830
Stock	2360	2250	3750	6130

Deliveries last week, 212 tons.

COCHINEAL.—At the sales on Wednesday, prices went without material change, excepting for low blacks, which were rather cheaper. Of 1,335 bags Teneriffe, the chief part sold at silver, 2s 6d to 2s 6d; black, low to good, 2s 3d to 2s 3d. 182 bags Honduras: silver, 2s 2d to 2s 9d; black, 2s. 6d bags Mexican, part sold at 2s 4d to 2s 8d per lb for blacks.

OTHER DYESALTERY GOODS.—Cutch has met with more inquiry, and at firmer prices than last quoted: good to fine, 20s 6d up to 21s 6d and 22s. The market for Gambier is firmer, and speculative business done for arrival at 15s 9d to 16s ex ship. 837 packages by auction were taken in. Sales of Bengal turmeric to arrive at 18s 9d: value on the spot, 19s to 19s 3d per cwt. Barwood is a few sales. Business has been done in lac dye on the spot and afloat.

SHELLAC.—The market is rather higher. 668 chests by auction, about two-thirds sold: common and native orange, 6l 5s to 6l 12s 6d; garnet, 6l to 6l 5s; button, dark to fine, 6l to 6l 15s.

METALS.—More activity prevails in these markets. Tin has experienced a further improvement in price, under the influence of speculative demand, and business of some extent is reported. Straits yesterday sold at 130l; the same price to 131l afloat and for delivery. Banca quoted 131l. Holders now require some further advance. English raised 3l, viz., 132l to 133l. All kinds of copper are dearer, and the demand rather improving. Chili, &c., 65/- to 66/10s. Australian, 74/10s to 76l, and the price of British is officially advanced 2l. The market for spelter has rated higher. Sales of Silesian are reported at 19l 5s to 19l 7s per ton, and 19l for fine to arrive. The makers having many orders for iron, prices are likely to be maintained. Scotch pig has not experienced any material change, but the market is now less excited. The last sales for cash were at 57s per ton.

HEMP.—The few sales effected in Manilla have been at full rates, including Sorsogon, or at 49l to 49l 12s 6d. 182 tons Petersburg by auction were chiefly bought in; clean quiet, at 33l to 33l 10s per ton.

JUTE.—There is still a very firm market with prices rather higher. Sales to arrive have been made at 20l to 23l 5s. The public sales on Wednesday contained 2,259 bales, and of this small quantity about half sold at previous quotations to 10s more: low to good, 19l 5s to 20l, and a few fine, 26l 10s to 27l. The common quantities were not any dearer. Some of the new crop sold to arrive, but no particulars given.

LINSEED.—The market is firm. Calcutta, 63s 6d; afloat, 61s 6d; Black Sea, 60s 6d to 61s per quarter.

OILS.—Sperm and common fish oils remain very dull. The former offers at 82l per ton. Olive difficult to sell, and the business confined to small quantities of the lower sorts. Linseed oil remains flat, although the make is now small. Prices on the spot, 32l 10s; forward, the same to 5s more. English brown rape has declined to 43l spot and delivery. Refined, 45l; foreign, 46l to 48l. Cocoa-nut remains dull. Ceylon, 39l 10s to 40l. The price of Cochin is now almost nominal. Palm without change. Fine Lagos, 37l per ton.

PETROLEUM is rather lower. American refined, 1s 6d; and 3d per gallon more sellers for the last four months.

TURPENTINE.—American spirits, 37s 6d per cwt.

TALLOW.—Rather a quiet tone has prevailed during the week, but prices of Russian have varied very slightly: old, 43s 3d; new, 43s 6d to 43s 9d; Yarco, to Dec., 45s 6d to 45s 9d per cwt. About 1,650 casks, chiefly Australian, are declared for sale to-day. Arrivals of the latter keep liberal.

PARTICULARS of TALLOW—Monday, June 12, 1871.

	1871. casks.	1870. casks.	1871. casks.

HIDES.—On Thursday, 173,175 East Indian, chiefly sold at former rates to 4d and in some cases ¼d per lb advance upon most descriptions of kips.

POSTSCRIPT.

SUGAR.—The market closes with a quiet appearance. Sales of West India, 772 casks. For the week, 2,382 casks. St Lucia and Barbadoes by refin. went without material change in prices. 1,552 bags beet were bought in. A floating cargo of Mauritius sold for the United Kingdom: No. 12 to 13 at 31s 6d.

COFFEE.—The sales of 711 casks 214 barrels and bags plantation Ceylon went off without material change in prices. 160 bags native, 53s 6d to 54s 6d. 76 casks 50 barrels and bags of Jamaica sold, chiefly ordinary qualities, at 53s to 57s. 150 bags East India at 71s to 72s for Coorg. Good ordinary native Ceylon has sold privately at 54s 6d to 55s per cwt.

PEPPER is firm at the advance.

SALTPETRE.—A small parcel of Bengal, refraction 9 to 9¼, sold at 26s 3d cash.

SHELLAC.—136 chests realised previous quotations: button, 4l 2s 6d to 6l 17s 6d; native livery orange, 6l 2s 6d to 6l 5s per cwt.

TEA.—Good business in Straits, at 1864 to 1911.

OIL.—400 casks cocoa-nut by auction chiefly sold up to 39s 9d for Sydney. Ceylon taken in. 584 casks palm chiefly sold at 30l to 33l per ton for the lower qualities.

TALLOW.—At auction, 1,063 casks 12 barrels Australian sold at 3d to ½ advance: best, 36s 6d to 42s 6d; mutton, 42s 6d to 43s 6d per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Valencia oranges are lower, owing to the quantity of summer fruit in the market. Lemons higher, owing to a short stock. Barcelona nuts maintain their value; black Spanish nearly finished. Brazil in demand, and present supply received, via Liverpool. A cargo direct to London is daily expected. West India cocoa-nuts have a brisk sale.

DRY FRUIT.—Currants have improved 1s value within the last few days, chiefly in consequence of better inquiry from exporters. The fruit is held firmly. Raisins also meet an improved demand from shippers, but the inquiry for home consumption is dull. Prospects of both crops appear to be favourable.

ENGLISH WOOL.—Market quiet, except for deep grown wethers.

COLONIAL WOOL.—Market quiet; prices very firm.

FLAX.—Market firm.

HEMP.—Market steady at unaltered prices.

SILK.—A very large business doing at present rates in Canton, the proposed duty by the French Government causing large shipments.

SEEDS.—There has been very little business passing in seeds during the past week, but a better tone is becoming manifest, and all descriptions are firmly held.

TOBACCO.—There has been rather more activity in the market during the past week, and some fair sales have been made for home trade purposes. Fine descriptions are sought after, but the state of such is very limited. For exportation there has been more inquiry, and a good business may be looked for. In segar tobacco and other growths there has been a large business done.

LEATHER.—There is no alteration to note in the character of the demand for leather since our last report. At Leadenhall, on Tuesday, a fair amount of business was transacted at about late prices. There was a moderate supply of fresh goods. The articles most in request were light English butts, light shoulders, prime calf skins of all weights, and English horse hides.

METROPOLITAN CATTLE MARKET.

MONDAY, June 12.—The total imports of foreign stock into London last week amounted to 15,343 head. In the corresponding week in 1870, we received 7,344; in 1869, 14,460; in 1868, 7,500; and in 1867, 12,592 head.

Considerable heaviness has been apparent in the cattle trade to-day. The supplies of stock have been much more extensive, owing to the increased liberality of the receipts from abroad. As regards beasts the arrivals from our own grazing districts have been good, both in respect to number and quality. Foreign receipts, however, have not come to hand in such good condition. For all breeds the trade has been dull, at a decline of about 4d per 8 lbs. The extreme quotation for the best Scots has been 5s 8d, the more general being 5s 6d per 8 lbs. The market has been extensively supplied with sheep, and the quality of the home breeds has been good. The demand has been heavy, and prices have given way 4d to 6d per 8 lbs; for the best Downs and half-breds 5s 10d to 6s per 8 lbs has been accepted. Lambs have been in limited request, at from 6s to 7s 2d per 8 lbs. Calves have been dull and drooping. Pigs have been neglected.

HOP MARKET.

BOROUGH, Friday, June 16.—Owing to the more favourable weather this market has assumed a somewhat quieter aspect. The demand has been scarcely so good, nevertheless extreme prices have been realised: —Mid and East Kent, 56s to 147s; Weald of Kent, 56s to 90s; Sussex, 50s to 80s; Farnham and country, 75s to 112s; olds, 20s to 55s.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 16.—These markets have been well supplied with potatoes. The trade has been steady at our quotations:—English Regents, old, 45s to 70s; Scotch, 40s to 65s; Rocks, 45s to 65s per ton; Jerseys, new, 9s to 12s; kidneys, 11s to 16s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 16.—The demand for home consumption continues very good, and prices of all current descriptions are tending upwards, whilst stocks remain within very limited compass.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 16.—At this market to-day wheat was dull of sale, at a reduction of 2d to 3d per central on red, and 1d to 2d on white wheat. Flour was 6d easier. Barley, 4s 2d; beans, 55s 3d; peas, 41s; oats, 3s 9d to 3s 11d; oatmeal, 30s to 31s.

WAKEFIELD, Friday, June 16.—The favourable change in the weather has had its effect in the wheat trade at this market to-day. There was scarcely any business doing, although a decline of 1s was generally conceded. Spring corn was also rather lower.

The Gazette.

TUESDAY, June 13.

BANKRUPTS.

Sydney Chidley, Queen Victoria street, City, solicitor.
Francis Appleby, Scarborough, innkeeper.
John Aspden, Manchester, baker.
Arthur Berrisford Bailey, Fulsham, Cheshire, licensed victualler.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

HUBBUCK AND SON, LONDON. PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BELL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN,

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

ABRIDGED PROSPECTUS.

SUBMARINE CABLES' TRUST.

Issue of £1,000,000 in Certificates of £100 each, at £90.

Certificates to bear interest at £6 per cent. per annum, payable half-yearly, 15th October and 15th April, by London, at Messrs Glyn, Mills, Currie, and Co., making £6 13s 4d on an unit paid.

Certificates to be redeemed half-yearly out of surplus income to the extent of the available funds, by par base in the open market or tender, or failing these means, by yearly drawings at £120.

An equal reversionary distribution of the securities of the Trust among the certificate holders as soon as the certificates have been redeemed.

TRUSTEES.

Sir James Anderson,
Sir Daniel Gooch, Bart., M.P.
Lord William Hay.
The Right Hon. Viscount Monck.
Captain Spencer Ogworn, R.N.
John Pender, Esq.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

SECRETARY—George Saward, Esq., 65 Old Broad street.

The advantage of this form of investment, by distributing the risk over a number of first-class undertakings, and making one insure the other, is secu larly applicable to the class of property to be embraced in this Trust, and has been already made for limited liability.

The Trust will consist solely of the stocks, shares, or debentures of Submarine Cable Companies which offer, apart from accidental interruption, the prospect of a high rate of profit; such as the Anglo-Mediterranean, the Anglo-American, the Brazilian Cable Companies, the British Indian Submarine, the British Indian Extension, the British Australian, the Marseilles, Algiers, and Malta, the Falmouth Submarine, the Falmouth, Gibraltar, and Malta.

Subscriptions will be received either in cash or in the stock shares of those Companies, at the rates determined upon by the Trustees, and at the price of £10 per share in the case of each £10 share, and an equivalent proportionate amount in the case of shares or stock of a larger denomination above the average prices, as quoted in the Stock Exchange official list, from the day on which the subscription opens to the day of its close, both inclusive.

The Trustees will also be ready to accept subscriptions in debentures of the price at which they are offered readers them, in their judgment, suitable for the Trust.

The selection and acceptance of the several securities —the proportion in each to be taken, and the price at any purchases to be made—will be determined and undertaken by the Trustees at their discretion, who will endeavour to secure a fair average, having regard to the ends in view.

The annual receipts from the investments will be first applied, after deducting the limited amount of expenses, in paying the interest upon the certificates. The excess will be applied in the purchase of until all the certificates have been thus redeemed, when the Trust securities will remain for distribution as a reversion. The Trust will then be wound up, and the proceeds be distributed pro rata among the holders of the deposited reversion.

In case of the purchase of the telegraph cables by the Government, provision is made for immediately terminating the Trust, and dividing the proceeds.

In addition to the interest coupo n s a coupon representing the share accruing to the certificate holder in the above reversion will be attached to each certificate. The coupon of reversion will be presented by the holder when his certificate is drawn, and entitle him to a pro rata division of the ultimate reversion.

A person desirous of holding a share in the whole chance than, by means of this Trust, at a minimum of trouble and expense, obtains the following advantages:—

1. Interest at 4⅔ 13s 4d per cent. on the amount subscribed.
2. Distribution of risk.
3. Provision for redemption of certificates; if by purchase securing the difference between the redeemed market value, or if drawn, a gain or £30 per certificate.
4. A reversion eventually divisible equal to the whole of his original value upon.

Any deficiency of interest on the certificates in any year will form a first charge upon the subsequent receipts, subject only to the annual expenses.

In case no allotment is made, the deposits will be returned without deduction, and where the certificates allotted are less than the number applied for, the surplus deposits will be credited to the allottee.

Application to be made in the forms to be obtained as under, the payments as follows:—

On application	10
On allotment	10
On the 13th July	70

Subscribers may anticipate their payments on the days when any of the instalments fall due, and will be allowed a discount at the rate of £4 per cent. per annum.

The certificates with interest coupons, and also the coupons of reversion attached, will be issued immediately after payment of the final instalment.

A draft of the Trust Deed, together with forms of the certificates and the contract as to the expenses, may be seen at the office of Messrs Baxter, Rose, Norton, and Co., No. 6 Victoria street, Westminster; and prospectus and forms of applicati n may be obtained at the same address; of the Secretary, at the Office, No. 65 Old Broad street; and at Messrs Glyn, Mills, Currie, and Co., Bankers, No. 67 Lombard street, where all subscriptions must be paid.

SUBMARINE CABLES' TRUST.

The SUBSCRIPTION to this Trust in Shares of the various Submarine Cable Companies is CLOSED.

The SUBSCRIPTION to the Trust in Cash will CLOSE on WEDNESDAY NEXT, the 21st instant, at FOUR o'clock, for both town and country applications.

GEORGE SAWARD, Secretary.

The Consolidated Bank (Limited), 52 Threadneedle street.

SECRETARY—Mr Robert Wilbers.

Issue of £25,000 Debentures, redeemable in Ten Years, and bearing interest at £10 per cent. per annum.

The Directors of the St Thomas Dock Company (Limited) are prepared to receive subscriptions for £25,000 10 per cent. debentures, to rank pari passu with provi ani sue of £30,000, forming a first charge on the property and undertaking of the Company. The amount proposed to be raised by the present issue is merely required for repairing and putting to work the large Dock at Sunderland, which, when on the eve of completion in the Harbour of St Thomas, in the West Indies, was seized, and has lately been raised and transported to a place of safety, where it now awaits the necessary repairs previously to its being put to work in the Thames.

Before proceeding to incur this outlay, the Directors have thought it advisable to obtain the opinion of some independent and competent authority as to the prospects of the Dock being found thoroughly efficient when the repairs contemplated have been executed. For this purpose they invited the assistance of Mr John Penn, C.E., eminent engineer, after giving the matter the fullest consideration, and going minutely into all the points connected with the construction of the Dock, has reported favourably thereon.

Mr Penn, in his report, states that he has examined the plans, drawings, and specifications of the Floating Dock at St Thomas, and has had several interviews with Mr Braithwaite, who designed the Dock, and with Mr Hazledine, who executed the ironwork, and that the result is that he (Mr Penn) is of opinion that the present design, as set out in the specifications, if good and well calculated to carry out the intended purpose of a Floating Dock. After making some suggestions, the adoption of which he says would result in the greater economy, Mr Penn concludes his report with the declaration of his opinion, that when the Dock is repaired, it will fully answer the intended purpose.

As the sum now proposed to be raised, together with the debentures previously issued, will only amount to £55,000, and this will constitute a first charge on a Dock which has cost very much more than that sum, and as there appears to be no doubt of the undertaking being highly remunerative when once it is brought into operation, the Directors feel confidence in offering the debentures to the public. They will be issued in bonds to bearer of £100 each, if required, and the amounts will be called up in the following manner:—

£10 per cent. to be paid on allotment.
£30 per cent. at the end of four months from the date of allotment.
£30 per cent. at the end of eight months from the same date.
£30 per cent. at the end of twelve months from the same date.

A deed has been prepared, and will shortly be executed, vesting the dock and other property of the Company in Trustees, on behalf of the holders of the existing debentures and the present issue.

Should the applications exceed the amount required, a preference will be given to shareholders in the Company.

Mr Penn's report on the construction of the dock can be seen, and every other information obtained, at the Offices of the Company, No. 62 Moorgate street, in the City of London.

62 Moorgate street, E.C., 13th June, 1871.

To the Directors of the
ST THOMAS DOCK COMPANY (Limited).

Date .....1871.

Gentlemen,—I request you to issue to me debentures of £ each, or any less number of debentures of the above Company of the proposed new issue, and I undertake and agree to and with the said Company to pay to their Bankers the amounts of the said debentures by the instalments, and at the times specified in the annexed circular of 13th June, 1871.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

HOLLOWAY'S OINTMENT AND

PILLS.—Pimples, Boils, Carbuncles, &c., are always symptoms of impurities in the secretions, and attended with danger. These maladies arise from some obstruction in the delicate circulation of Magnesia as the best blood vessels or capillaries, and the only rational mode of cure consists in removing the local impediment at the same time that any impurity engendered by the stoppage should be filtered from the blood. Holloway's ointment applied to the parts and surrounding skin pills accomplish the latter object. The inflamed skin derives softness, coolness, and ease, from the application of this unguent, which gradually penetrates to the affected tissues, soon restores the circulation, and its channels to a healthy condition, and saves the sufferers from most serious disease.

BROKER—William Abbott, 3 Tokenhouse yard.

SECRETARY—Henry May, Esq.

TEMPORARY OFFICES—10 Tokenhouse yard.

PROSPECTUS.

This Company is formed for the purpose of purchasing and working the extensive gravel-washing Gold Mines known as the "Niagara," "America," "Niagara," and "Vermont" mining claims, containing about 250 acres in Sierra County, State of California, about 70 miles from San Francisco, and 3 miles from Nevada.

These mines are in complete working order, and are daily yielding large profits. The tunnels, gangways, air shafts, inclined sluice-yards, flumes, &c., have cost about £40,000. The possession of the water right enables the gravel to be washed very cheaply, compared with the cost in many other companies which have to pay water.

The "North America" mine alone has yielded, from 8 acres only, between the years 1867 and 1870, a sum of 555,300 dols, or about £111,076, as shown in the company's books, being an average of about £18,000 per annum profit. The work done in the "Niagara" and "Vermont" mines shows them to be equally valuable.

Nearly two-thirds of the gold annually obtained from California is the result of gravel-washing mines, which, in the opinion of the Directors, will ever be, continue, and in the end larger profits than any other description. It would be impossible to get together so large an amount of really valuable mining land, with equal facilities for working, as is found in these claims.

The price to be paid to the vendors is £45,000 in cash on taking possession of the property, and £35,000 in fully paid-up shares.

The sum of £10,000—which is considered amply sufficient—will remain for the working capital and expenses of the Company.

The Directors have carefully considered the enclosed report from Mr D. W. C. Morgan, a practical miner of great ability and experience in the description of mining. On reference to it, it will be seen that these mines are in a district where gravel-mining is the best, if not the only, mode of working, and where, in the opinion of the Directors, it is impossible to produce a satisfactory dividend, though some small disbursements may be made, except by mines on a larger scale, may be considered desirable. Mr Morgan states that, if well managed, and worked economically, are capable of yielding a profit of £55,000 to £60,000 per annum.

A provisional agreement, dated 2nd June, 1871, has been entered into between John E. Hughes, as agent and attorney for Henry Hughes, and W. M. Torrens, M.P., and J. L. Ricci, as trustees on behalf of the Company, by which the Directors have secured the right of employing their own appointed Agent for the purpose of making an independent report on the value and prospects of the property, previous to the purchase, and paying for the same. This right the Directors have secured in the interest of the shareholders, and the call of £3 17s 6d per share will not be made until the Directors are in receipt of a confirmatory report from their Agent so appointed.

The instalment of 2s 6d per share will provide a fund for meeting the expenses of the above examination. Should the report be considered unsatisfactory, the surplus funds remaining in the hands of the Company will be returned to the shareholders.

Prospectuses, forms of applications, &c., may be had at the Offices of the Company.

THE *VERY* DANGEROUS FINANCIAL POLICY OF M. THIERS.

That France is still a very rich country is certain—that her people are most thrifty and industrious is even more certain. That the industrial and economical resources of France are more than sufficient to meet even the present great demands upon her is hardly to be doubted; but if any thing could make one doubt it, it would be the speech which M. Thiers has delivered and the policy which he has avowed.

There are three points in the exposition which M. Thiers has given us—two of temporary and one of most enduring interest. We will take the two temporary ones first.

The most obvious financial question as to the late war is how the French side of it has been paid for. The Germans we know lived mainly at the cost of the enemy, but the French soldiers in Paris and out of it could not have done so. How then, did they live? Until now we did not know, but M. Thiers has told us. He says that the following deficits in 1870 and 1871 respectively have been partly caused by the cost of the war, and partly the loss of revenue which necessarily ensued on the war:—

	£
In 1870, the deficit was	25,960,000
In January and February, 1871, was	27,200,000
In the remaining ten months of 1871, probably will be	12,280,000
Total deficit caused by the war	65,440,000

And this is the aggregate deficit after reckoning the loan effected by M. Magne when the war broke out, and the so-called "Morgan loan," which was negotiated by the Government of the National Defence in London. In simple words, this may be called the unknown deficit which no one had ever stated or explained till now. And it has been paid thus:—

	£
By a loan from the Bank of France	53,200,000
By an addition to the floating debt	12,240,000
	65,440,000

The addition to the floating debt, M. Thiers says, is of trifling importance, as the aggregate of that debt before was only 26,000,000*l*.—a less amount than it has been generally during the second Empire. But the advances from the Bank of France are much more interesting. We confess we wish that the complete balance-sheet of that great establishment had been published before the loan. It would have given the financial world confidence to have seen the complete figures. All we know besides is that the reserve in the Bank of France has diminished since September from 32,320,000*l* to 20,800,000*l*, and that the circulation has augmented from 69,800,000*l* to 88,000,000*l*, and even this increase of liability and diminution of the reserve are not equal to the whole amount lent to Government. We should have liked to have seen the whole account, and to be sure that we understood the entire transaction. There is scarcely any one more remarkable in the history of finance. If the notes of the Bank of France had been at a discount, nothing could have been more common, or according to rule; but they have never been at a discount: on the contrary, at Versailles during the Prussian occupation they appear to have borne, and in Belgium at present they are now said to bear, a premium. That so large a volume of paper currency, being about 26 per cent. of that before existing of France (31 per cent. if we go back to the ante-war period), should have been added to it without depreciating its value is unexampled. And M. Thiers evidently thinks that this augmentation of paper currency is permanent, and will be maintained. He speaks sanguinely of speedily resuming cash payments. But we should like to have additional information before we admit that this testing step will not be attended with danger. During the war a great deal of gold and silver might be and no doubt was hoarded; a temporary substitute was for the instant required; as yet France is not settled enough to release that hoarded gold. But when hereafter it is released, will paper be still on a level with gold? or if it is, will not prices be raised by the sudden increase of the circulation? It is

Digitized by Google

sometimes said that France is "under-currencied;" but what does "under-currencied" mean? Does it mean that transactions are carried on by barter, because there is no suitable money? or that the range of prices when measured in gold and silver is lower—that the purchasing power of gold and silver is higher—that gold and silver are scarcer, in France than elsewhere in contiguous countries? We should like to see the term "under-currencied" better defined before we reason on it. As the matter now stands, it will be an economical singularity if so large an amount can be so suddenly added to the paper circulation of any country without producing great and deranging effects.

But whether or not M. Thiers is right in thinking that the extension of the French banknote circulation is likely to be permanent or to be beneficial, there can be no doubt that if it be so it is a great advantage to French finance. M. Thiers only pays 3 per cent. now to the Bank of France; he is only to pay 2 per cent. next year; after that only 1 per cent. In fact, he divides with the Bank of France the profit of the additional paper circulation, and takes the greater part of it. And in this he is right. The Bank of France have already a lucrative monopoly of the circulation, and if that circulation can be safely extended they ought to pay highly for the increase of that monopoly. But whether that circulation can with safety be so rapidly augmented—whether the usual effects of a very large sudden issue of inconvertible paper will not before long overtake France, is in our judgment very dubious, and well worthy the close attention of economists and financiers.

Secondly,—M. Thiers tells us what he will want for the immediate future, and this is of more immediate interest. The 200,000,000*l* payable to Germany are payable, by the Treaty, thus:—

£	
20,000,000	in thirty days after the establishment of the authority of the Government in Paris.
40,000,000	in the course of the year.
20,000,000	on 1st May, 1872.
120,000,000	on or before March, 1874.
200,000,000	

So that for the moment M. Thiers has only 80,000,000*l* to deal with; and of this he has already paid 5,000,000*l* in money, and the railways in Alsace and Lorraine are to be taken at 13,000,000*l*, so that ont of this 80,000,000*l* he has already provided for 18,000,000*l*, and, so far as the immediate indemnity goes, has only really to deal with 62,000,000*l*.

Unfortunately, however, that indemnity is not the whole of the present demand. Besides that, there is the cost of the German army of occupation; the pay of their own army; the compensation to be given in Paris and elsewhere to persons whose property has been destroyed by French troops for French advantages; the rebuilding of the walls of Paris, and of the public buildings there. These additional demands make it necessary to borrow more than the precise amount of the indemnity, and M. Thiers proposes to borrow 80,000,000*l*, of which—

£	
62,000,000	are to be used for the indemnity.
18,000,000	are to be used for other demands.

The mode in which he proposes to raise the loan appears to be very fair, and there is no material objection to it.

But unhappily the conditions upon which the principal of a loan is raised are comparatively of slight importance; they only affect the money market of the moment. The critical point is how the interest is to be levied. And here the fatal unsoundness of the finance of M. Thiers shows itself plainly. He says that for all the loans due to this war—viz., that of M. Magne, that from the Bank, that of the National Defence Government, and the 80,000,000*l* now raised,—and for the interest at 5 per cent. on the remaining three milliards of the indemnity as stipulated by the Treaty,—a sum of 14,240,000*l* will be added to the annual charge of the National Debt; and he proposes to raise it all by indirect taxation. He is cautious of committing himself to the precise Budget which his colleague, M. Pouyer-Quertier, has introduced, and which we analysed last week. He is especially cautious as to the duties on the raw materials of manufacture which naturally are especially unpopular, and may perhaps be modified. But though the details may differ the substance is the same. Both M. Thiers and M. Pouyer-Quertier rely for raising 14,000,000*l* almost entirely on taxes on commodities, and largely on augmented customs dues. But this is a painful and retrograde movement. Since 1860 France has been at the head of the Free-trade movement on the continent, and she now changes and returns to Protection. Of course the old pretence is repeated, that the Customs dues are for revenue only; and no doubt, under the adroit management of a shrewd and ardent Free-trader customs duties may be balanced by excise duties, and so the conditions of competitive production remain unaltered. But the task is always most difficult,—only a most active and acute Free-trader can effect it. The home producer is sure to be ready with many plausible reasons why he should enjoy this advantage, why he should not be subjected to that disadvantage. Even a consistent Free-trader will often be misled by them. But M. Thiers does not even profess to be a Free-trader. He says—"I always was a Protectionist, and I am a Protectionist "still." M. Pouyer-Quertier is a Protectionist too. Nothing can be more certain than that the new French indirect taxes will be imposed in the interest of the home producer, and be made subservient to domestic popularity. That Protection is a poison is admitted, and it is to this that France is returning. And indirect taxes cripple trade, diminish consumption, lessen production. For twenty years France has been starting forward into vigorous industrial life; great cities have been created for that life, and by it. But now this energy is to be fettered, and this life impeded. Order and civilisation have been not easily maintained in Paris and Bordeaux, Lyons and Marseilles, even in times of good trade, due to an intelligent Government—how then can they be maintained in times of bad trade, due to an unintelligent Government, and caused by pernicious taxation?

The plain policy before France was to diminish her military and naval expenditure. The naval expenditure is, especially in her case, childish. She has no over-sea dominion, no colonies, and no commerce requiring it. Her present army can only be wanted for aggression, and 1870 should have taught her that aggression is disastrous. But M. Thiers says expressly that the second Empire, though it gave too much to luxury, did not devote "enough to the necessary "expenses of the public power." The cost of the French army and navy is then to be augmented, at the same time that French industry is to be impeded. Can any policy be more disastrous for Europe, or more dangerous to the credit of France? For years she has been the main aggressor in Europe; for years she has been more subject to intestine commotions than any other State in Europe, and now by the policy of M. Thiers she is to augment her outlay on aggressive forces, and increase her liability to civil convulsions. What prospect can be worse for her or for Europe? What could a person who wanted to dissuade monied people from lending to France say more than M. Thiers has said in order to encourage them? And yet this is not the whole case, or the entire financial mistake. Not only has M. Thiers 14,240,000*l* of interest to provide now, but, as if this was not enough, he engages to raise 8,000,000*l* annually for a sinking fund. This climax is almost ludicrous, indeed would be quite so if the subject were not so important. Every rational financier would have told M. Thiers, according to the slang saying—"First "to catch his hare"—first to borrow the money, and to levy the taxes necessary for the interest, and when he had done that (which will not be done in the life-time of so old a man) to begin to talk of paying off debt. Nothing can be more fallacious than the pretension to pay debt without the means. Nothing can be more fallacious—nothing more significantly indicative of a specious but unsound—financier than the attempt to pay old debt by borrowing new debt.

THE MARITIME LAW OF THE CONVENTION OF PARIS.

The Earl of Denbigh made a vehement attack on Monday night on the principles of international law agreed upon in the Congress of Paris in 1856, asserting that in fact they had deprived the country of all power to carry on a naval war effectually. We will allow Lord Denbigh to state his own case in his own words:—"Our navy was formerly our chief "means of defence, but we had lost all power of injuring an "enemy by sea, while our army was utterly inadequate for "offence or defence. As steam rendered an enemy almost "ubiquitous, we should, unless prepared by fortifications round "the island, well manned, be taken at a great disadvantage; "and though we should send out our ironclads and swift cruisers,

Digitized by Google

"the enemy's fleet would remain in port, preserved by tor-
"pedoes, while his commerce would be transferred to neutral
"bottoms, where under the Treaty of Paris they would be
"safe. This was the case in the Crimean war, for England
"and France having publicly admitted that a neutral flag
"should cover the enemy's goods, the commerce of Russia
"passed through Prussia, Russia thus receiving about
"17,000,000*l* of our money, and being thus enabled to
"prolong the war. The enemy, on the other hand, would fit
"out cruisers to prey on our commerce, the rate of insurance
"would rise, British merchants would prefer neutral bottoms,
"our merchant ships would rot in their harbours, and our
"sailors would be attracted by high wages and safety to
"neutral ships. Our navy too would seek in vain for the
"enemy, and there being no prize-money in prospect, sailors
"would not man our fleets.....If it was right to employ
"francs-tireurs on land, why should not privateers be employed
"at sea? If we could not touch enemies' goods on board a
"neutral ship, any war in which we might be involved would
"be much more protracted."

The Earl of Denbigh has not a very strong case if that is all which can be said for it. In the first place, he hardly understands the actual working of the naval measures necessary to break up an enemy's commerce. So far as our own commercial marine is concerned, it would be far more likely to be shut up rotting in our harbours in time of war if the Declaration of Paris were rescinded, than it will be if it remains in force. Not only are neutral goods respected in enemies' bottoms while that Declaration holds good, and for those between whom it holds good, but the practical effect of war under that Declaration is simply to transfer a great many commercial ships for the time being from the flag of the belligerent to the flag of the neutral. As a great many American ships were transferred to British owners and hoisted the British flag during the war of secession, so if we were engaged in a great war, our commercial marine, instead of lying rotting in our harbours, would, in all probability, be transferred to some neutral carrying power, and would carry our exports to other nations just as before. Certainly it is not any part of the *commerce* of England which either in war or in peace would suffer by the observance of the Declaration of Paris. When we are neutral we gain greatly by it, because we gain the privilege of carrying the traffic of the belligerent nations unmolested, as well as our own. If we are at war we gain by it, because as, with our navy, a blockade of our ports would be impossible, our ships, bought *pro tempore* by the United States or by Denmark, would just carry our merchandise out and in as before; whereas if enemies' goods were not respected in neutral bottoms, we should be liable to commercial ruin at the very moment we wanted all our resources for a great war. Nothing can be more absurd than to suppose that our *commerce* would not, whether in war or in peace, receive the greatest protection from the Declaration of Paris. And to those who know how completely money is the sinews of modern war, that consideration is by no means a secondary one.

But now as regards our means of offence in time of war on the commerce of the enemy; Lord Denbigh's position is that this is destroyed by the Declaration of Paris. If we cannot seize enemies' goods, how are we to attack their most vital part—their commerce? We reply, by the only really effective weapon with which a naval power can ever attack commerce—the right of blockade. Suppose the Declaration of Paris abrogated to-morrow, and that we were at war with Germany. We might then no doubt seize and confiscate cargoes of German goods imported by French ships to French ports, on receiving evidence that they belonged to German owners. But in the first place there would be plenty of modes of evading us. The German merchants would lend *money* to the French merchants, and the French merchants would buy on their own account the goods Germany wanted, and then sell them to Germany,—nor could we check such a system at all, and if we tried to interfere with it we should rush into a war with France as well as Germany. The inconvenience to be inflicted on Germany by our right to seize German goods in Dutch, or French, or Belgian ships would be infinitesimal. We should be always finding out that the goods were really owned by the French, or Dutch, or Belgian owners, though intended for sale to Germany, and have to give up our prey after all, and meantime we should pick many an unfortunate and mischief-breeding quarrel. But whether the Declaration of Paris were to hold or not, we could effectually blockade the German ports, and make Kiel, Hamburg, and Bremen, for instance, suffer very keenly for the war. Nor would the Declaration of Paris interfere in any way with this—the only real blow our navy could inflict on German commerce. The imports and exports through Holland, Belgium, or France, we could no more prevent if the Declaration of Paris were abrogated than we can now. The trade of the few great German ports we could annihilate just as effectually if the Declaration of Paris continues in force as we can now. We do not believe that the difference between the observance of that Declaration and its abrogation would make an iota of difference in the length or fate of a war between Germany and England. The difference it would make would be in the feelings of neutrals, who would be much more likely to become enemies if the Declaration of Paris were abrogated than if it were observed. Lord Denbigh and those who take his side are apt to forget that we cannot in either case touch really neutral trade, and that in modern commerce it is not a very difficult matter to arrange that the neutral shall first own and then sell to a belligerent what, if there were no war, would be directly owned by the belligerent. It is true of course that if ever again we happened to be pitted against the whole of Europe, we should only have America to trust to for carrying our traffic, and that if America also were hostile, we should have no carrying power to aid us at all. But then this is precisely the case in which the Declaration of Paris would be no hindrance at all to our power of attacking the commerce of our enemies; for as there would be no neutrals of any consequence,—as all our neighbours would be enemies,—the merchandise of Europe, so far as it was on the sea, would necessarily be enemies' goods carried in enemies' bottoms, and this the Declaration of Paris —intended only to protect neutrals—does not restrain us from confiscating. It is true that if we were to go as far as America wishes to go, and as far as we think we might safely go, and recognise the inviolability of *all* private property at sea except contraband of war and ships intended to break a blockade, we should not have this resource in case of a war against the world,—but then we should also have all our own commerce safe, and that would be an even greater set-off;—for, as we have said, money is the great condition of modern war, and you cannot get money out of a bankrupt community.

The more closely the circumstances of the case are examined, the more clearly it will appear that the great instrument of maritime war is blockade. This was the great weapon wielded by the North against the South, and it would be our great weapon against any great maritime country. Of course against Germany it would not be a great weapon; but that is not the fault of the Declaration of Paris, it is the fault of geographical facts, and of nothing else. The nation that possesses the most powerful navy can always shut up the ports of any nation with a good maritime coast, and it is this shutting up of its ports which really brings the calamity of war home to the people. Suppose we declared a blockade of all the ports of France,—to which our resources are certainly quite as equal as were those of the United States to the blockade of the Confederate ports,—would not Marseilles, and Bordeaux, and Nantes, and Havre suffer immediately, and all the French consumers who were accustomed to receive their goods through these ports, and who would now be obliged to import by way of the Rhine or the Elbe with a good deal of overland transit, feel the pinch at once? And of course the greater the alliance against us the more tremendous the pressure we could apply. If Germany, and Holland, and Belgium were with France, we could shut up almost every avenue by way of sea to these countries, and practically deprive them of their ocean traffic. And the same is still more true of America. It would not be by stopping neutral ships on the high seas that we could really strike a vital blow at the United States if they were at war with us, but by blockading their great ports, by sealing up Boston, and New York, and Philadelphia, and New Orleans,—blows in comparison with which the stoppage of neutral ships containing United States' goods, but not intended to break any blockade, would be a mere puncture of the skin.

As to the privateering right on which Lord Denbigh insisted, we think it is so obvious that the nation with the greatest commerce gains the most by the abolition of that right, that it is hardly even arguable. If we retained the right to fit out privateers to prey on the enemy's commerce, the enemy

Digitized by Google

would retain the same right to send out privateers against our commerce; but our commerce being far the most valuable in the world, and the injury to it being in a proportion far beyond the actual loss,—namely, in proportion to the fear and risk of loss,—we should of course lose just as many times what our antagonists lost as our commerce was more valuable than theirs. If taxability be at the root of the fighting power of any really warlike nation, as we submit that it is, the Declaration of Paris, in protecting our traffic and rendering our vast export and import trade comparatively safe, and so conserving our taxability, really vastly increases our resources as a naval and military power.

THE DEBATE ON THE BALLOT.

Now that the Ballot Bill has been brought forward in Parliament as a Cabinet measure its advocates appear disposed to throw away one half of the arguments in support of their own case. They are so weakly conciliatory that they will end, if they do not become a little sterner, in losing their Bill. Everybody, for example, on the side of the ballot not only admits that a vote is a trust, which is as true of the electoral as of every other public function, but that every trust ought preferentially to be exercised in public. Why ought it, if such publicity is contrary to the welfare of the delegating power, and is admitted by them to be contrary? Some of the very highest trusts committed to Englishmen are exercised by them in profound secrecy, as for example, the right of previous discussion of a great measure entrusted to every member of the Cabinet; the right of vote as to sentences which may be capital confided to officers on courts-martial; and the right to find a verdict confided to every man who sits upon a jury. If it is wrong to release an elector from the pressure of influence or of opinion, *a fortiori* it is wrong to release a juryman; and yet, as we all know, to compel jurymen to vote by roll-call would imperil justice. On the other hand, if secrecy and publicity are matters of expediency only, then we are driven back on the evidence, and as the Economist has always contended, the evidence is decidedly in favour of secret voting. The speakers on Thursday seemed all more or less inclined to say that intimidation and bribery were dying out; but there must be scores, not to say hundreds, of members within the House who know that they are not, that but for the power of great employers or great landholders, but for the adroit use of money in conciliating opponents, but for direct gifts to the refuse of the constituencies, they would never have been returned. It is true the methods of corruption are much more subtle than they were. A landlord does not now order a tenant to vote on his side, he only takes care to choose tenants who will vote with him. Neither does he expel a tenant who is a Dissenter; but if he is a man of strong opinions his tenantry will very soon be found to consist mainly of sound Churchmen. Nor does a millionaire now give a twenty-pound note for all the votes he can get, any more than he gives twenty-pound notes to people of position to let him into society. He only lets his money flow, pays all bills, responds to all demands, and finds himself drifting on the tide of expense into the desired haven. The Judges, it is said, found little evidence of rank bribery, and, as Mr Plunkett said—"Judges' opinions have almost the weight "of facts;" but have the Judges ever inquired into the history of municipal elections? or can they inquire into the pressure maintained, not for an election, but for a lifetime? Is it not the fact that in every county in England the succession of Liberal heirs to Tory fathers would affect the elections, and that in one-half the boroughs a poor but educated man has not the shadow of a chance? Let the members ask their own consciences, as was said in the debate, and they will acknowledge that the evil exists, and that the ballot will in a great measure correct it. It will not correct it entirely, because no scheme could do that, but it will immensely diminish it, first, by establishing a tradition of independence; secondly, by rendering intimidation impossible, the tenantry and workmen claiming the right to obey the law of secrecy; and thirdly, by enabling the candidate who always wishes to keep his money, to resist the pressure of the electioneering agents, who wish to make him spend it. Under the ballot they can give him no proof that they have not put it in their pockets. If there is one thing wonderful about the English mind it is in its tendency to believe in legal rights rather than natural rights, and the moment the law decides that an elector's vote, like a juryman's opinion, is to be given according to his conscience, pressure will be resented, as dictation to a jury is resented now.

But, argue the opponents of the Bill, it is better that electors should be influenced by the opinion and the wishes of the upper classes and propertied classes in our society. They can govern better than the masses can. That—the secret opinion of all Tories—may be very true, but it is entirely beside the point. Those classes have parted with their power to govern, and the only question is, whether it is better that the classes really in possession of power should exercise it honestly, or whether they should exercise it under a perpetual sense of pressure and of guidance, which destroys their responsibility. We say the first is best; that it is better—to take a crucial case—that the man who at heart holds Mr Rylands a meddling fool for stopping his Sunday grog should vote down Mr Rylands, than that he should, under the pressure of the respectabilities, vote for Mr Ryland and then riot against Mr Rylands's Bill when passed into a law. The opponents of the ballot say it will leave the electors free to act on all manner of base impulses; but so does any electoral Act which leaves the electors truly independent. If it does not, then they are under pressure—the very thing denied. As a matter of fact, we believe this will not prove so; that electors released from observation will act as jurymen do under the pressure of ideas—often wrong, like the ideas of English jurymen on infanticide—but not under the pressure of corrupt influences; but in any case they will act as the Constitution intends them to act—for themselves. Mr Cave told a capital story upon this point, but he entirely missed its obvious meaning:—"He was once," he said, "canvassing a "place in the south of England; and on coming to a public-"house in one of the streets, the persons who were with him "said—'You need not go in there; the landlord is a red hot "'ballot man.' However, he went in, and said to him—'I "'am come for your vote, but I suppose I shall not get it.' "'Are you for the ballot?' the man asked. 'No,' he "replied, 'certainly not.' 'Oh, then, I'll vote for you.' 'I am "'surprised,' he said, 'for I heard you were a red hot ballot "'man.' 'So I was,' the man rejoined, 'till lately; but "'I've found out what a base thing the ballot is.' He said "he had a story to tell, so he sat down, and I let him go "on. 'A few weeks ago,' he said, 'there died the landlord "'of a neighbouring public-house, in which a friendly society "'held its meetings. Myself and another publican each "'wanted the society to come to our house, and the mem-"'bers agreed that it should be decided by ballot. We "'both canvassed; there were 30 members, and I got 20 "'promises, so I thought myself sure. When the time came "'I got 10 votes, and lost. But that was not the worst of "'it, for in the course of the day the whole 20 came in one "'after the other, and said—'My dear fellow, I am so sorry "'you did not win; you know I voted for you.'"

Surely the moral of that story is, that without the ballot men cannot be expected to vote for the man they like best, as against the man of whom they are most afraid; and that to secure independence they will even lie. The publicans' customers, be it remembered, were not protected by a law establishing secrecy as a principle, and enabling an elector to say, as a juryman says—"It is a rule not to tell how we "voted."

It was alleged in the debate, and has been alleged outside, that the feeling of the country is changing, and the ballot is no longer desired. Our own impression, we confess, is a very different one. We believe that the feeling in the counties, and the medium towns, and the working cities, like Sheffield, is one of strong desire for the ballot, kept down mainly by the certainty that it will be obtained, and that any Liberal member who votes against it will be deserted by a large section of his party. It is a growing mistake among the cultivated to suppose that because parties, for convenience sake, use certain reforms as Shibboleths, and so give them an exaggerated force, therefore the constituencies are indifferent to those reforms. They are no more indifferent than the religious sects are who exaggerate in a similar way the importance (say) of an attitude at the altar, but who nevertheless at once distrust and in a manner expel any man of their party who declares himself for or against, as it may be, the lighting of those candles. The ballot may be less valued than it was once; but its advocacy was once a clear test of Liberalism, and the Liberal who, having once adopted it,

Digitized by Google

votes against it will be held, and rightly held, by his constituents to have strayed into a less Liberal attitude of mind. Of course if they also have become Conservative that will do him no harm, but the latent Conservatism of electors without property has always seemed to us a very imaginary quantity.

MR SCUDAMORE'S REPORT ON THE TELEGRAPHS.

THE account which Mr Scudamore has given of the establishment of the Government telegraphic system is an ample justification of the measure which he has done so much to carry through. He leaves to a second report the financial results of the measure, the simple assurance being given that these are as satisfactory as the other results; but there is enough in what is dealt with to show the great public gain and make that assurance credible. As the question is of vital consequence to the country not only in itself, but from its bearing on the State management of monopolies, it will be useful to study carefully what Mr Scudamore has done.

We hear very few complaints now, if any, of the working of the system, but it is proper to remember the accumulation of difficulties under which the department took up the work. In the best of circumstances, the transference of so large a business from several independent boards of management to a single Government department could hardly have taken place without a great deal of friction. Different principles and different modes of working had to be combined, under the new condition of a low and uniform charge which increased enormously the amount of business done. This would have been quite sufficient to cause accidents and delays, and grumblings on the part of the public that they had exchanged better for worse. But there were other causes which aggravated the difficulties. The companies from whom the business was taken over had in the first place, from a very natural motive, neglected the calls upon them for extension for a number of years. For a long time before, the project for the State acquisition of telegraphs was hung over their heads, and they naturally objected to take the risk of new ventures from which they would get no return. At a still earlier date, owing to the great amount of repairs caused by storms in 1865 and 1866, extension had likewise been neglected. Altogether, for about five years previous to the transfer, the companies had been in arrear to the public — so that the Post Office started "heavily in debt to public expectation." A fresh aggravation of the difficulties was produced by the postponement of the money bill from 1868 to 1869. The consequence was that orders for *mat rial*—poles, wires, and instruments—which ought to have been given in the winter of 1868-69, could not be given till the following spring and summer—six months after they should have been given. The department thus started very heavily weighted; and now that the difficulties have been surmounted, the wonder rather is that the complaints were so few.

Passing over these preliminary difficulties, we have to see how the promises made beforehand to the public are kept. Besides the low tariff which was put into the Bill, the principal advantages promised were these—1. The multiplication of country offices, and the substitution of convenient offices for the offices at railway stations; 2. The multiplication of offices in the suburbs and districts remote from the centre of large towns; and 3. The extension of greater facilities to intelligence or press messages. There can be no doubt that in these respects the Government purchase has answered.

First,—as regards rural stations, Mr Scudamore's statements are very clear. The Post Office in fact started business on the 5th of February, 1870, with 1,007 new postal telegraph offices, "each "of which was at a Post Office serving a distinct locality, and "in the centre of the population of that locality." It may also be stated, he adds, that—"between the 5th February "and the 31st December, 1870, it succeeded (in spite of the "circumstances which compelled it to employ a large force on "the construction of new and the improvement of old main "lines) in opening upwards of 900 additional offices for the "accommodation of as many distinct localities. And, further, it is proceeding with this work at the rate of from 20 "to 30 additional offices per week, and has at this moment "upwards of 96 offices, which wait either for clerks or instruments to be opened.* The whole of the postal telegraph "offices now open, and which are nearly 2,000 in number, "are served by wires which are used solely for commercial "purposes, the railway and commercial systems having been "completely separated. Telegraphic business, however, is "carried on on behalf of the Postmaster-General at upwards "of 1,800 railway stations, so that travellers and persons "resident in the immediate vicinity of the railway stations "have lost none of the advantages which they possessed prior "to the transfer, though, as I shall show presently, they "make but little use of those advantages." And what Mr Scudamore states as to the superior utility of the new offices substituted for railway stations is that 91 per cent. of the messages are sent from them, and only 9 per cent. are sent from the old railway stations. A large amount of additional accommodation, which they fully appreciate, has thus been accorded to the public.

Second,—as regards the multiplication of offices in large towns, Mr Scudamore supplies maps of 12 of these towns, showing the position of offices open under the old and new systems, and these maps are very striking to the eye. They show conclusively that while in Manchester, Liverpool, Glasgow, Leeds, and other towns, the rival companies kept their offices together in the centres where the best business was to be competed for, the Government has been able to consolidate the central offices, and establish additional offices in the suburbs. And that the new offices are additional facilities to the public is proved by the statement "that "9 per cent. of all the messages handed in at Glasgow, "11 per cent. of all those handed in at Edinburgh, 14 "per cent. of those handed in at Birmingham, 17 per cent. "of those handed in at Leeds, 26 per cent. of those handed "in at Liverpool, and nearly 40 per cent. of those handed in "at Manchester, are handed in at the stations which the "Post Office has set up in districts previously unprovided "with accommodation, in substitution for the duplicate and "triplicate offices which it has closed." Much has also been done in the same direction, Mr Scudamore adds, in smaller towns, such as Bristol, Hull, Sheffield, Bradford, Derby, Nottingham, and Brighton. Thus in Brighton the principal thoroughfare faces the sea, and the former telegraphic offices were confined to it; but there is another parallel thoroughfare more inland, in which the Government has opened offices at convenient points.

The accommodation of the Metropolis has also been so far extended as to secure the immediate despatch and delivery of all local messages—a business which was very imperfectly accomplished before. On the 17th of September last 285 telegraph stations had been opened, increased to 334 in January, of which about one-third are in direct communication with the Central Office in Telegraph street. The magnitude of the business thus accommodated is shown by the statement that 20 per cent. of all the messages in the United Kingdom are London messages, and of these 20 per cent. are for local delivery.

The facilities would be nothing of course unless the public took advantage of them, but on this point likewise there is evidence. In the first week of the transfer the number of messages, exclusive of news messages, was 128,872; in the week ending the 31st of March, 1870, the number had risen to 160,775; and the average weekly number in the three following quarters was successively—177,410; 200,787; and 203,572. In the last week of December, which is usually considered the worst week for telegraphic work, the number was 144,041, or nearly 16,000 messages in excess of the number with which the department started. The total number of messages in the three quarters was as follows:—

In quarter to 30th June	2,308,840
— 30th September.....	2,610,237
— 31st December	2,646,438
In the nine months	7,563,015

It is thus demonstrated that great additional facilities have been given to the public, and that the habit of telegraphy, which was the direct aim of the transfer, has increased.

Third,—as respects press or intelligence messages, the improvement of the new system is also very conspicuous. "The "companies," it is stated, "sent news to 144 towns only in "the United Kingdom; the Post Office sends it to 365

* One hundred and six extensions are in progress, and one hundred and sixty-eight are ordered for early extension.

Digitized by Google

"towns." Formerly in fact the business was a monopoly in the hands of the companies who had an "intelligence depart-"ment" of their own, and discouraged rival collectors of intelligence. Under the *régime* of free trade, there are two independent associations, whose competition has brought about the above result. The companies besides had only 173 newspapers subscribing for their telegraphic intelligence, but the new associations have 1,106 subscribers. It is also probable that the news correspondence, independent of these associations, amounting now to between 15,000 and 20,000 words daily, has increased, though there are no statistics of what the companies sent. The department has increased the facilities for this correspondence.

Another kind of facility given to the press is the use of special wires—a branch of business which has not increased, there being seven special wires under the new as under the old system. The charge has, however, been reduced, from between 750*l* and 1,000*l* to a uniform charge of 500*l* per annum; and the department could have lent many more wires if it had had them to spare.

It is not generally known in the Metropolis, at least, to how great an extent the provinces are supplied with telegraphic intelligence, chiefly from London. Mr Scudamore states that "a very large portion of every leading provincial newspaper "now consists of news received by telegraph. I have seen as "many as twelve columns of telegraphic news in leading pro-"vincial journals, and have read in Aberdeen, in a local "paper, several columns of news which, if Aberdeen had been "dependent upon London papers for its news, could not have "been known there until six-and-thirty hours afterwards." Such is the press business to which the new department has given so many more facilities, including a much lower tariff. No better means could be devised of knitting together the entire kingdom, and extending to the remotest districts many of the advantages of residence in the principal centres.

Mr Scudamore has thus proved by experience his principal case for the acquisition of the telegraphs. Most of the advantages thus described are palpably due to unity of management, and to the principles of action adopted by a Government department, which would have been entirely unsuitable for rival companies anxious to make a profit. They could not be expected to extend an already injurious competition to districts of little business, or increase public facilities at their own expense, even if that expense was likely to be but temporary, for they had no security against a competition which would defeat their end. But there are other matters in which the benefit of Government action has been felt, and will afterwards appear in a clearer light. It is impossible to go through Mr Scudamore's details as to teaching employés, organising repairing rooms, inquiring into and perfecting apparatus, without being assured that the unity of management, under the pressure of public opinion, conduces to great economy and efficiency in the working. A great deal has been done for instance by "interchanging and connecting" the wires of different companies. Prior to the transfer Leeds and Derby, say, had no direct communication, although Leeds was connected with a third town by one company's wires, and Derby with the same town by another company's wires. Now the different wires are joined at the place where they meet, and direct telegraphic communication established between Leeds and Derby. The principle will be adopted and extended by means of short connecting links between places where wires nearly meet, and the result will be greater efficiency and stability in the services. Not only will more business centres have direct communication with each other, but, as the number of circuits will be multiplied, the effects of any storm or accident will be confined to the narrowest possible limits. The business will in fact be "carried round" the scene of the mishap. In short when one reads the narrative of the actual work, it becomes simply impossible to conceive how anyone could ever have ventured to put companies in competition with a State department in a business of this description. The narrow aims and means of the companies are in curious contrast with the comprehensive views of the department, and its means for putting them into execution. The advantages on the side of the State are absolutely overwhelming, and in a few years, when the full effect of the change has been felt, will be universally acknowledged. The ultimate effect of the transfer cannot but be the strengthening of public opinion in favour of the acquisition of other monopolies by the State.

BUSINESS NOTES.

AMENDMENTS OF THE REGULATION OF RAILWAYS' ACT.—A Bill has just been laid before the House of Commons by the President of the Board of Trade to amend the law respecting the inspection and regulation of railways. It proposes some material improvements. The Board of Trade is to have power to appoint inspectors for carrying out any inquiries respecting particular railways or accidents which the Board is authorised to make, and these inspectors will have ample powers to inspect the books of the companies, and call for the evidence of officials. This will improve the machinery which the Board now has for inquiring into the management of railways, and setting the results before the public. Another excellent proposal is to increase the authority which the Board possesses in regard to accidents. At present there is no proper arrangement for informing the Board of accidents, except in cases of loss of life, and the information which the Board publishes and the inquiries it makes are defective. It is clearly as important for the public welfare that accidents which happen not to be fatal should be recorded and inquired into as accidents which are fatal. There is as likely to be a defect of management deserving of inquiry in the one case as in the other. As we have often urged the necessity of some provision for a record of this sort, we are glad to see the clauses in the present Bill which bind the companies under penalties to report not only accidents where there is loss of life or injury to anyone, but cases of collision, of a train or part of it leaving the rails, and of any other sort of accident which may be specified by an order of the Board. We hope that the penalties will be found sufficient, and that the Board will be rigorous in enforcing them. The Board, when an accident is reported, is also to have power to order an inquiry by an inspector, and a more formal investigation, if necessary, to be conducted by a stipendary magistrate. A more doubtful part of the Bill provides for the return of certain statistics by the companies. The particulars required are nearly all furnished in those accounts which railways are already bound to produce, and we think it decidedly injudicious to double figures. If different returns are made up they are likely to disagree in minute points, which will be very perplexing. A portion of the additional information required in the new forms in this Bill is very important—such as a statement of the number of each class of passengers, and of the train mileage performed by passenger and goods trains respectively. But instead of ordering new forms to be prepared, it would have been wiser to order the insertion of any additional particulars in the present accounts. From these the statistical department of the Board should be able to compile any figures it wants.

THE MERCHANT SHIPPING BILL.—A few lines in the Parliamentary report of this week contain the notification that on the motion of Mr Chichester Fortescue the order for the second reading of the Merchant Shipping Bill was discharged, and the Bill withdrawn. We must express the utmost regret at this announcement. Mr Fortescue added that he should introduce a short Bill containing the clauses relating to the protection of life and property at sea; but even if this short Bill should pass, the result would do very little to mitigate the scandal upon the Parliamentary mechanism of legislation which is implied in the successive failures to handle the comprehensive measure proposed by the Board of Trade. Considering the immense interests at stake in our shipping, and the necessity both for extensive amendments and for a consolidated measure, it is a great business loss to the country that the Government Bill cannot be put through—that there is hardly a hope of touching it, even if the Board of Trade could get a Session all to itself. The fate of this measure is certainly one of the strongest arguments for adopting Mr May's suggestion of "Grand Committees." In any case the revisal of the Bill is only fitted for specialists, and would secure the attendance of only a fraction of the whole House supposed to be in Committee. But in the absence of such Grand Committees we must confess to a feeling of some astonishment that the House of Commons has not forbearance enough to refer the Bill to a Select Committee, and then abide by the report of that Committee, suspending, if necessary, the standing order which requires the Bill to be considered in Committee of the whole House. The question is in this position—that *any* legislation recommended

Digitized by Google

by the department, and with which a Select Committee substantially agrees, would be better than none at all. But a defective code of laws is maintained, merely because there is no machinery of introducing amendments. To give the force of law to Government decrees, except in so far as they are formally censured by either House within a given number of weeks, would be an extreme innovation; but it will be necessary to consider extreme remedies if the present block continues.

IS A TOLL A "TAX?"—The Court of Exchequer Chamber has just been engaged in considering this question in a suit by the Income Tax Commissioners against the Corporation of Brighton. The income tax authorities maintain that the surplus of a certain rate or duty levied by the Brighton Corporation on coals, coke, &c., landed at Shoreham for "keeping up the sea walls" is liable to income tax as an annual profit arising from a certain kind of property, and the Brighton Corporation maintain that the income tax cannot be levied on another tax. The case is of no small interest, as the Corporation of London and other bodies levy similar duties, and the intention of the income tax authorities to apply a decision in their favour in the present case is not concealed. We confess we are a little surprised both at the action of the income tax authorities, and at the decision of the Judges, which happens to be in their favour. It is clear enough that a coal duty is a tax as much as a rate, perhaps more surely falling on the consumer or whole community affected than a rate on property does; but because in some way it has some of the incidents of "property" its essential character is overlooked, and the income tax authorities are enabled to tax a tax. The net result will be that the local charges of Brighton will be increased for the benefit of the Imperial exchequer, and that towns which have been enabled to tax themselves in this particular form will be exposed to similar treatment. In London the various duties which the Corporation receives will be less effective than they are, and a resort to new taxation will become necessary so much the sooner. The grievance is a minor one in the case of London, as the inhabitants of the Metropolis have no control over the central municipality within it, and the loss which would be caused by the tax is small by comparison with other waste of the municipal revenues; but had London any proper municipal authority, a proposal by the Government to levy a charge on its coal and other duties would be treated as a pure absurdity.

THE CENSUS.—Summaries of the census of England, Scotland, and Ireland have now been published, and the most general facts as to the increase of population are as follows:—

	Population. 1861.	Population. 1871.	Increase.	Decrease.
England	20,066,224 ...	22,704,108 ...	2,637,884 ...	...
Scotland	3,062,294 ...	3,358,613 ...	296,319 ...	...
Ireland	5,798,967 ...	5,402,759 ...	... ...	396,208
			2,934,203	
			— 396,208	
The U. Kingdom	28,927,485 ...	31,465,480 ...	2,537,995	

This is the largest absolute increase of any decade in the century, and if England alone is taken, the rate of increase is almost as great as it has ever been. It is well known that the birth-rate has risen during the last decade, according to the estimates of population made by the Registrar-General. We called attention to this increase some time ago, intimating a doubt whether it was not merely apparent, caused by an under estimate of population. But as the Registrar-General's estimates have been confirmed, the fact of the increasing birth-rate may be considered established. There is thus some probability of not only a larger increase of population during the next decade, but of a larger rate of increase, especially as the emigration from Ireland is checked.

PAYMENT OF FREIGHT IN ADVANCE.—The Court of Exchequer Chamber, in the case of Byrne *v.* Schiller, has held the doctrine to be established that a payment of freight in advance could not be recovered back in the event of the freight not being earned through the ship being lost. The case was a very strong one for applying the opposite doctrine. The defendants had chartered a ship upon a charter-party, one of the conditions of which was that they were to have the option of sending the vessel from Calcutta to Port Louis, Mauritius, or Colombo, with a cargo of rice, at 1 rupee 12 annas per bag, and the master was to sign bills of lading at any current rate of freight, but not under chartered rates, "unless the difference was paid in "cash." Upon this contract the dispute arose. Freights were so low in Calcutta at the time that the chartered rate could not be obtained, and the master refused to sign the bills of lading without a fresh engagement from the defendants' agents that the difference would be paid in cash, and he also obtained a promise that it would be set off against the advances made by the defendants. The ship was lost; but when the present action was brought for the difference, amounting to 737*l*, the defendants pleaded that the voyage had failed, that even if the freight had been prepaid it could, on the voyage failing, be recovered back, and of course if it had not been paid it could not be recovered. The Court however held distinctly the opposite view, that a payment in advance could not be recovered back, and that the circumstances were such that though the payment had not been made in the present case it was still recoverable. In giving the judgment, the Judges repeatedly expressed their regret that the law in this country on the point was opposed to the law of other maritime countries of Europe as well as America. It is perhaps less important however what the law is on such a point than that it should be clear; and the doctrine being firmly established, shipowners, charterers, and merchants will know in future how to frame their stipulations. The contingency of freight not being earned where it has been paid in advance is one which in almost any case ought to be specially provided for, and is in point of fact very often provided for in bills of lading.

BILLS OF SALE.—The Court of Exchequer has decided that the registration of a bill of sale signed not by the true Christian name of the grantor, but in another Christian name which he said he had adopted for some years is sufficient—if the deed itself was good. The Act only required the residence and description of the grantor to be truly stated, and said nothing about the name. But if a man assumes a name and is known by it, the persons with whom he deals not knowing his real name, why should there have been such a question as that raised in the present case? The documents which such a person signs with his assumed name ought clearly to be as binding on him as if he had signed his real name, and the only question which should arise upon deeds which affect the rights of third parties would be as to their knowledge of the assumed name. If they did know of it, they should be equally bound.

LIABILITY AS CONTRIBUTORIES.—The Lords Justices of Appeal in Chancery recently affirmed the judgment of Vice-Chancellor Stuart in the case of McEwen *v.* The West London Wharves and Wharehouses Company, holding the appellant to be liable as a contributory where, although he had sold shares which had been allotted to him, and the company had virtually accepted the transferee, yet the transfer had not been properly completed according to the constitution of the company. The facts were that the company was formed in 1865; the appellant sold his scrip certificates and handed them to the Contract Company; subsequently calls were made, which were not even notified to him; but in June, 1867, the company went into liquidation, and the liquidator made him a contributory, no transfer of the shares having been executed as the Act of Parliament required. Their Lordships held that the issue of the certificates to bearer was *ultra vires*, or at any rate only bound the company to register the bearer if required to do so. The point is of interest to applicants for shares in new companies, who naturally sell their allotment certificates as if that were sufficient. The case shows the insecurity of the proceeding, purchasers in the market being able to buy the certificates, and then get themselves registered or not according to the event, the unfortunate applicant all the while remaining liable as if he had not sold at all. This is another of the many cases which show how careful shareholders who sell should be in inquiring into the completeness of the transaction. The system of share certificates to bearer will not wholly amend the difficulty, as it is only practicable in regard to fully-paid shares, where of course if the shares are not to bearer it would always be the buyer's interest to have the registry in his own name.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, June 22.

The Government presented to the National Assembly a Bill for raising a loan of 2,500,000,000*f*. (100,000,000*l*.), and M. Pouyer-Quertier, Minister of Finance, in an elaborate report demonstrated that the thing was necessary. But a majority of the Assembly, after an examination of the state of affairs, required a reduction of 500,000,000*f*. and M. Pouyer-Quertier consented. In our country a Chancellor of the Exchequer who, in a most important operation, and at a most critical moment, should make a mistake to the extent of twenty millions sterling, would be promptly relegated to private life; but "they manage things better in France," and M. Pouyer-Quertier is still Minister.

M. Thiers, the superior in the Government of the Norman manufacturer, is even a more surprising financial genius than he. This old man, who could find no other means of solving a political difficulty than in bombardment and massacre, has even the wonders that the application of *true* financial and commercial principles have accomplished in England, and in those countries which, more or less completely, have imitated her—among them France herself (in commerce, though not in finance—this old man has "learned nothing and forgotten nothing," and he proposes to provide for the burdens that will weigh on France by a return purely and simply to what existed previous to 1830—the taxation of industry, and the exemption from taxes of wealth. He proposes this, though since 1830 the working men of Paris, by repeated insurrections and revolutions, and only last month in a still more significant manner—by fire, have manifested a marked repugnance to such a system, seeing that they suffer from it. In England M. Thiers would have been judged and condemned years ago; in France he still passes for a statesman.

In the Commune days Parisians used to laugh at the Versailles Assembly as "rural;" and in truth it is composed chiefly of men of the country interest. To say that it possesses anything approaching political capacity would be gross flattery; but the majority of its members, like the peasants they represent, know very well the practice of commerce, and the commercial reforms of the Empire, have enabled them to sell for export or for towns their wines, their pigs, their eggs, their vegetables, and their oxen, at prices which their fathers did not dare even to dream of. Yet these Rurals stand by M. Pouyer-Quertier and M. Thiers, though proposing to cut off their markets, and to impose taxes which, at their expense, will enrich cotton-spinners and *bonnetiers*.

Under the Commune firemen endeavoured, we are told, to extinguish conflagrations by pumping petroleum. In seeing these French Ministers and this French Parliament devise a financial system of which the inevitable consequence will be

Digitized by Google

to lessen production and trade, and consequently work and profits, and thereby will aggravate the political and social discontent that has prevailed for years, and has produced all we have witnessed—may we not ask if they are not doing the very same thing as the firemen of the Commune? The next insurrection and the next burning of Paris will answer; and we shall, according to present appearances, not have very long to wait for them.

This said, let us turn to the speech which M. Thiers delivered in the Assembly, in support of the Bill of the new loan of 2,500,000,000f *minus* 500,000,000f. The oration was of terrible length—three hours; but though encumbered with the digressions, the repetitions, and the twaddle that are inevitable in old age, was a very clear and (assuming the figures presented to be true) a very exact exposition of the financial situation of the moment. Taking only the really essential figures, we find that the year 1870 left a deficit of 649,000,000f, and that the first part of 1871 will present one of 987,000,000f —total, 1,636,000,000f (65,440,000l). In consequence, 1,330,000,000f are due to the Bank of France, and 306,000,000f are *en découvert* (unprovided for) in the floating debt. These two items, oddly enough, make precisely the same as the preceding sum. The amount due to the Bank is likely to be increased 200,000,000f, that establishment having undertaken to advance that sum if required. Then there are 2,000,000,000f (80,000,000l) shortly due to Germany as part of her indemnity; an undefined sum for the maintenance of her troops; a further one for the sufferers from the war and from the bombardment of Paris; and others for repairing the fortifications and constructing fortresses on the frontier. M. Thiers did not venture any estimate of the total of these undefined expenses; but even without it the amount due is really enormous. Passing to the question of resources, the Minister said that from the war indemnity due 125,000,000f have to be deducted for payments already made, and 325,000,000f for the Eastern Railway; and there are besides the 200,000,000f from the Bank—total, 650,000,000f. With that sum, and with the proceeds of the loan, it will be possible to provide for the *first part* of the indemnity, and for expenses *immediately* exigible. As regards the Budget, he calculated that in counting the charges the new loan will necessitate, and those of 1870 Paris and London loans, also those of the Bank for its assistance, and some others, it will be increased by 356,000,000f; and to that sum he proposed to add 200,000,000f for sinking fund *(amortissement)*. On the other hand there will be a reduction of (say) 120,000,000f for economies effected, and new taxes may be made to yield 420,000,000f. This will put the Budget at 2,450,000,000f (98,000,000l), a figure which the Empire was fast approaching. The sum is large, but as France is industrious and courageous, said M. Thiers, she will bear it; and though the providing of it may diminish her comfort, it will not injure her real power.

In the course of his long and discursive speech M. Thiers treated of a multitude of matters into which it is not possible, from want of space, to follow him. But here are a few:—Speaking of the floating debt he stated that at this moment the total of it is not more than 650,000,000f, the lowest figure seen for thirty years. Speaking of the Bank he said that it is, in spite of the delays accorded for the payment of commercial bills, getting bills paid every day; and that its metallic reserve is now, notwithstanding all that has passed, 520,000,000f (20,800,000l). He said that the loan contracted in England had been obtained on most onerous terms, but "I must honestly confess that I think better could not be had." With respect to the new loan of two *milliards*, he announced that it is to be in 5 per cent. stock, and said "that in adding that stock we do not increase the nominal capital as we should do if we had taken 3, and we only leave a margin of improvement to the lender of 18, supposing it to be issued at 82, whereas in 3 we should have had to leave him 48 or 50." The 5 per cent., he added, presents the further advantage of permitting reductions of interest to be made easily; and if France conducted herself prudently he pronounced that she might count on them. He did not say at what price the loan would be issued, but his mention of the figure 82 was an indication, and he intimated that the first deposit would be 15 per cent. With respect to the new taxes, he did not go into detail about them, but took occasion to proclaim himself a Protectionist, and to say that Protection would be re-established. These were his words:—"I will not discuss the taxes, but capitalists may be sure that without injuring the prosperity of France, and without checking the development of production, we could not have found any others that produce so much. What does public opinion say about them? Certainly those who are touched by them complain; but by the mass I believe that in the situation in which we are the new taxes are regarded, I will not say joyfully, but as presenting nothing alarming for the prosperity of the country and the development of production; among them there is only one that I hear seriously complained of. All are contested, but by minorities. But the one I speak of is opposed, I will not say by a majority, but by a very strong minority; it is that on raw materials, and on the least part of raw materials—those of textile industries. Well, gentlemen, you know I am an old Protectionist, and with me an old opinion never changes." This declaration drew forth expressions of regret from some members of the Chamber. M. Thiers went on to say:—"The commercial system we shall propose to you—and I say this for all our neighbours—will not be the re-establishment of prohibitions, but only the remodelling of some tariffs which experience has demonstrated to be insufficient. And this commercial system will permit us to say to all industries—'Support quietly your share of the common suffering, and make sacrifices, for the commercial system we are proposing will give you the means of repairing the losses you have sustained.'"

If by industries M. Thiers means manufactures, and of course he does, there is no doubt they will profit sufficiently by the promised remodelling of tariffs to bear patiently any additional taxes they may have to pay, but workmen will suffer in having less employment, and the community at large will have more to pay for their purchases. At the same time foreign countries, by having their goods shut out from the French market, cannot buy so much from France as they used to do, and that will diminish work and profits in the *specialités* in which she excels. And whilst thus striking at the interests of the industrious classes, which it is the object of all other countries to protect, M. Thiers abstains from putting one farthing of direct tax on acquired wealth.

This policy is so unjust in itself, and so dangerous in such a country as France, that one is lost in astonishment in seeing it adopted.

M. Germain, the banker, who spoke in the Assembly after M. Thiers, boldly condemned this policy. "I do not fear to say," he declared, "that many capitalists entertain the conviction that you are asking too much from raw materials, and that you are wrong not to establish an income tax. I say that your system would have produced greater effect if it had been headed by an income tax." He was interrupted by violent clamour; but he went on to speak of the said tax in England, and to say that the adoption of it would give confidence to foreign capitalists. "It is necessary," he said, "not only for the resources it will procure, but because it will give the possessing classes, who legitimately direct society, the right of demanding sacrifices from others since they make them also." And he spoke of Peel, and declared "that the best means of comforting the savage and ferocious doctrine of socialism was to make use of it." M. Thiers replied angrily—"You say that lenders wish us to think of that tax. I tell you that if anything can give confidence to the public in Europe, it is that we can do without that deplorable impost.....I do not fear to tell the French people that they are deceived when they are told that it presents a resource. No, there is no resource in it, and it is a fatal delusion to make the people believe that they must impoverish the rich to be rich themselves. When they impoverish the rich they diminish their own resources, for they have no others!" At this the Chamber applauded. Then he described the tax as odious, and asked what would happen if the levying of it were confided to Municipal Councils. He concluded by saying—"I consider this tax so dangerous that I will never consent to accept it.....I would sooner leave the Government than submit to it." Here there was more applause. From this people in England will be able to judge both M. Thiers and the Chamber.

Up to this moment the law on the new loan has not been promulgated, and the conditions of it are not made known. The publication of these conditions cannot however be long delayed. On the Bourse to-day, it was said that the price would be 82f or 82f 50c, and that after the first deposit of 15 per cent., mentioned by M. Thiers, the balance would be required in 17 equal terms, payable monthly. The loan has been worked up to a premium of about 1 per cent. That it will succeed, that it will be completely subscribed is not doubted; the Government will take care of that. It has indeed, *dit-on*, already got promises of subscription to a large amount from foreign bankers. But the system of taxation proposed by M. Thiers is so objectionable, and likely to produce so much trouble, that a great many persons feel repugnance to investing permanently in it, notwithstanding the high rate of interest it bears.

The Bourse has been occupied during the past week almost entirely with the loan. The following are the quotations:—

The Prefecture of the Seine (Paris) peremptorily demands the payment before 15th July of the calls due on the 1869 loan, the last term of which fell in November; but it says nothing of paying the interest due on bonds. It should remember that it has failed in its engagements.

The coupon of the Ottoman loan of 1860, which fell due on 1st January last, is being paid since the 19th by the Credit Industriel.

The Western Railway Company is to pay from 1st and 6th July the coupons of interest falling due on 3 per cent. obligations, and on those of the old Dieppe, St Germain, Versailles, Rouen, Havre, and Western Companies.

The Lyons and Mediterranean Company announces that from 1st July it will pay the interest on obligations falling due on that date; and will do so, as before the war, in certain of its stations, as well as at Paris, Lyons, and Marseilles.

The Parisian Gas Company makes known that the balance of dividend due 6th April, but of which the payment was delayed, can be received from the 20th. It is 28f per share. At the same time the final call of 100f on the obligations of 1868 is required to be paid. As to the half-year's interest on obligations due 30th June, 12f 50c, it will be paid from 1st July.

The Engine-building Company of Fives-Lille will pay from 1st July 12f as interest on obligations.

The Austrian Railways Company announce from 1st July the payment, through the Credit Mobilier, of 40f—35f for balance of dividend of 1870, 5f as an advance on the interest of 1871. This company is about to issue 150,000 new shares of 500f, of which 100,000 to shareholders, and 50,000 to go to the founders in part payment of the privileges they reserved themselves.

The annual meeting of the Comptoir d'Escompte is fixed for the 14th July.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for trade have received, from the Secretary of State for Foreign Affairs, a copy of a decree of the Italian Government, published in the official *Gazette* of the 10th instant, by which such exemptions from duty as have hitherto been confined to exportations from Italy by land, are extended to similar exportations by sea.

The Secretary of the Treasury has published his usual monthly statement of the public debt of the United States, showing its amount on the 1st of June to have been the following:—

	dols. c
Debt bearing interest in gold	1,894,128,750 0
Debt bearing interest in paper	60,123,000 0
Debt on which interest has ceased	1,999,002 26
Debt without interest	413,916,965 70
Total debt	2,368,067,717 96
Interest due and unpaid	38,672,430 67
Total debt, principal and interest	2,397,740,148 63
	dols. c
Money in Treasury—Coin	89,744,375 66
Currency	8,891,586 16
	98,635,961 82
Total debt, less money in Treasury, June 1	2,299,104,186 81
Similar total, May 1	2,303,573,843 14

The debt was decreased during May 4,469,358 dols 33c. Since March 1, 1871, the decrease has been 31,577,962 14c; and since March 1, 1870, the beginning of President Grant's administration, the decrease has been 204,754,413 60c, or very nearly 9 per cent. of the entire debt in a period of twenty-six months. The rate of monthly decrease has fallen off somewhat of late, owing to reductions in taxation, but there is still an ample surplus to devote to this object. During June the Secretary of the Treasury will continue his policy of debt reduction by selling gold and buying bonds with the proceeds, and his published programme embraces sales of 7,000,000 dols gold, and purchases of 4,000,000 dols bonds during the month. The new Five per Cent. Funding loan does not yet enter as an element of the monthly debt statement. The subscriptions at the present time are about 65,000,000 dols, and they continue at the rate of from 50,000 dols to 200,000 dols a day, almost exclusively made by the national banks. Of these banks a return was required on April 29, and was received from 1,704—all but two of the entire number in existence. They held at that time in the aggregate 391½ millions of United States bonds; had 77⅞ millions of loans, 22½ millions of specie, and 25⅜ millions of legal tenders, and other national currency. Their capital was 446 millions, undivided profits 142 millions, deposits 620 millions, and circulation 307½ millions.

The *Review* for this month has an article on the market value of the shares of existing insurance companies. We extract a statement which shows at one glance the very remarkable increase in the value of the shares of the companies enumerated, among which the Standard Life Office stands very conspicuous. The average increase is upwards of 1,200 per cent., and we cannot but think that in the present dearth of employment for money—and indeed under any circumstances—there is an excellent opening for new concerns to come forward, more especially if any well considered improvement in the plan of carrying out the real intentions of life assurance, that is by affording unquestionable security to policy-holders, can be devised. We leave the figures to speak for themselves:—

Name of Company.	Year Founded.	Amount Paid up on each Share Originally.			Present Market Value.			Increase in Value.
		£	s	d	£	s	d	Per Cnt.

Advices from Brazil state that the annual report of the Minister of Finance had just been issued, showing that the income and expenditure of the year were nearly balanced, while for 1872-3 the estimate of revenue was 9,337,000*l*, and of expenditure 8,634,102*l*, presenting a surplus of 702,896*l*. The total debt of the Empire is now about 67,800,000*l* (equal to seven years of ordinary income), of which 16,189,260*l* is foreign. The floating debt in Treasury bills has been reduced to 3,832,600*l*, and, according to the *Anglo-Brazilian Times*, "its reduction is being rapidly proceeded with, for which purpose the greater part of the late 3,000,000*l* loan is still available." The Government measure for the gradual abolition of slavery has been introduced, and was thought likely to be much contested, and ultimately to be passed with amendments.

The regular estimate for the financial year 1870-71, now completed, shows that the gross revenues of India in that year amounted to 51,017,396*l*. The allowances, refunds, and drawbacks reduce the amount to 50,078,796*l*. Deducting from this the charges of collection, cost of salt and opium, and other payments in realisation of the revenue, and the allowances and assignments under treaties and engagements, the net public income of India is reduced to 41,731,196*l*. The expenditure, excluding public works extraordinary, leaves a surplus of 1,083,561*l*; but the cost of public works extraordinary turn this into a deficit of 63,182*l*. The guaranteed interest on the capital of railway and other companies forms an item of the expenditure amounting to 1,859,413*l*, viz., 4,290,113*l*, less 2,530,700*l* for net traffic receipts. The charge for the army is 16,209,077*l*. The charges for interest of the debt are 21,551,186*l*. for interest on India debt, 1,058,868*l* home debt, and 629,970*l* dividends to proprietors of East India stock.

The sixty-third annual poor-rate return which has been issued shows that in the year ended at Lady Day, 1870, the amount of the levy for poor-rate in England and Wales was no less than 11,573,698*l*. Deducting county-rate, police-rate, and other charges, which, when not for relief of the poor, are levied as part of the poor-rate, we find the amount expended in the year on relief and attendant expenses 7,644,367*l*, being 6s 11¾d per head on the estimated population of the Kingdom. The best thing that can be said of the great expenditure on poor relief is that it is 28,793*l* less than in the preceding year—a decrease of 0·4 per cent., or 1¼d per head. There was an increase in several quarters, especially in the Metropolis, in Middlesex, in the North Riding of Yorkshire, in Durham, and in South Wales; but in most parts of the King-

Digitized by Google

dom there was a decrease. The expenditure on medical relief was 282,313*l.* The balance of loans effected shews a liability amounting to 1,786,785*l* at the close of the year. The average price of wheat was as low as 40s 2½d, or 11s 6d less than in the preceding year. The gross estimated rental of the property assessed to the rate was 118,431,103*l*, according to the return for 1867-68; the rateable value 100,668,508*l*.

In 1861, money was tending to be cheaper, notwithstanding the drain of gold to America. Business was still restricted the exports being greatly diminished, apprehensions being felt as to the effect of the American contest, and the internal trade of the country being bad. Our rates for money were also higher than the continental rates. Baron Ricasoli had just become Premier of Italy, in consequence of the death of Cavour.

In 1868, the 2 per cent. period continued. Baron Beust had just made a serious defence of Austrian repudiation, the gist of which was that his Government was not responsible as the Chamber had done it.

In 1869, the Bank rate was reduced from 4 to 3½ per cent., the recent rise having done its work. The House of Lords had just read the Irish Church Bill a second time.

In 1870, the tendency in the money market was downwards, owing to the continued flow of gold into the Banks of England and France. A new Honduras loan had just been introduced. The Government Education Bill was passing through the House of Commons very slowly on account of the religious difficulty. In foreign affairs the difficulty which was apprehended between France and Prussia, on account of the Prussian subvention to the St Gothard Railway, had been smoothed over.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,668,770*l*; in 1868, an excess of 1,570,835*l*; in 1869, an excess of 507,942*l*; and in 1870, a deficiency of 2,899,456*l*. In 1871, there is an excess of 2,440,400*l*.

DISCOUNT AND MONEY MARKET.—There is no particular change to notice from last week. The rates for money in the open market have continued substantially the same as they were made after the reduction of the Bank rate, the minimum rate for the best short paper being 2½, and the demand has continued much the same. The demand at the Bank has also been moderate, and the unprecedented accumulation of bullion has increased. The change in the rate as yet has only brought an addition of 296,000*l* to its discounts. To-day there has been a slightly improved demand at the Bank, and there is also rather more stiffness in the open market as respects long-dated paper—the change being partly ascribed to apprehensions of the effect of the French loan, and partly to the usual preparations made towards the close of the half-year by joint stock banks and others, who wish to exhibit a good balance. For the moment there is rather more pressure, but whether it will continue beyond the 30th will of course depend exclusively upon the former cause alone.

As regards this point there is a good deal of speculation, and there is a strong disposition in some quarters to believe that the loan and the payment to Germany will have but a moderate effect. The unprecedented accumulation which has been continued so long after the conclusion of peace, when the loan seemed to be impending, will undoubtly contribute to mitigate the effect of the operation as compared with what would then have been felt. The latest telegrams from Paris also state that the payment of the loan will be by numerous instalments, which will moderate the effect on the money market,

Digitized by Google

while it is also urged that the actual borrowings and payments by France to Germany during the last three months have been on a considerable scale, and yet they have been hardly felt in the money market at all. Besides the Paris indemnity of 8,000,000*l.* the payments for the subsistence of the German troops (2,000,000*l.* a month) will have been 8,000,000*l.* to 10,000,000*l.* more by the end of this month, and M. Thiers tells us that he has paid off the first quarter-milliard of the national indemnity—another 5,000,000*l.* These sums altogether are from 21,000,000*l.* to 23,000,000*l.*, yet the money market has hardly known of them excepting a slight effect produced by the Paris indemnity. For all these reasons it is maintained that the effect of the impending operation will be very small. We must point out, however, that except as regards the accumulation of money, which will have some effect, these arguments are not very sound. As regards the instalments of the loan, the important point is that whenever they are made payable, Germany is likely to receive very soon—before the end of the present year—the remainder of her first 60,000,000*l.* The French Government counts upon receiving enough of the loan in that time, or if not, upon receiving advances on the instalments to come due. The effect on the money market will be nearly the same as if the money were subscribed and paid, unless, which is barely possible, the German Government should prefer to *hold* the drafts in which it may be paid. The actual payments of the last three months appear also to be unfelt, because made in French banknotes, and used by the army of occupation in France; or if made in drafts, then in drafts at long date which have not yet become due. These latter circumstances, however, are not in favour of the future ease of the money market. It is the interest of Germany, as well as of France, to keep the money market easy till the loan is out; but afterwards the drafts will be falling due, and the actual transference of money to Berlin will take place. The German Government will give as much time as they can, but they must be a little anxious to replenish the State reserve. The better opinion must still be that the loan operation, coupled with all the other demands for capital on French account, and the new foreign commitments impending, will enhance the value of money, though probably to a much less extent than if the loan had been brought out without any Paris insurrection. In ordinary circumstances indeed there would have been a sharp rise in the rate in consequence of the loan operation, but with the present accumulation of money the movement will be less marked.

The principal changes in the Bank account for the week are an increase of 56,000*l.* in public deposits, and 910,000*l.* in private deposits; and the private securities have increased 296,000*l.* The stock of bullion is also 483,000*l.* more than last week. The reserve is now 17,861,000*l.*, against 30,000,000*l.* of liabilities.

We subjoin our usual quotations for mercantile paper having various periods to run:—

Bank bills—2 and 3 months	2½	per cent.
Do 4 months	2¾ ⅜	per cent.
Do 6 —	2½	per cent.
Trade bills—2 and 3 months	2⅞	per cent.
Do 4 months	2⅞ 3	per cent.
Do 6 —	3 3½	per cent.

The allowances for money at the joint stock banks and discount houses are as follow:—

Joint Stock Banks at call	1½	per cent.
Discount houses at call	1½	per cent.
Do with seven days' notice	1⅝	per cent.
Do fourteen days'	1½	per cent.

The discount quotations current in the chief continental cities are as follows:—

* Nominal.

THE STOCK MARKETS.—The tendency this week, as in the early part of last week, has been downward in almost all departments, and though there is some firmness in the foreign market, and in the English railways to-day, there has been no rally from the depression of the early part of the week. Operators and the public are both in suspense until the introduction of the French loan, while the unfavourable weather has had a specially prejudicial effect on English railways. In these circumstances, and with the settlement occuring next week, the money out on the Stock Exchange belonging to the joint stock banks being also called in preparatory to the close of the half-year, there is very little business doing, and prices are weak. The realisations by large holders of foreign securities are likewise gradually in progress, so that any material improvement is prevented. Several new undertakings, chiefly mining ventures, have been brought before the public this week, but call for no special notice. Attention has been principally concentrated on the coming French loan, in which, before the issue of the prospectus, there have been various dealings; but operators, on the whole, have held off, pending the receipt of information as to the terms of issue.

ENGLISH GOVERNMENT SECURITIES.—This market has been fully affected by the weakening influences of the week, and there has been a fall of ⅜ in Consols for the week, the closing prices of to-day and last Friday marking the extremes of the fluctuations. In addition to other causes of depression, the long continuance of the rains, which were at first welcomed, excites alarm about the harvest, and is taken advantage of by bear operators. Now that the French loan is seen to be imminent, there is also some disposition to await the effect.

Subjoined is a list of the highest and lowest prices of Consols every day:—

	CONSOLS.				Exchequer Bills.
	Money.		Account.		March and June.
	Lowest.	Highest.	Lowest.	Highest.	
Saturday	92	92⅛	92	92⅛	par to 5s pm
Monday	92	92⅛	92	92⅛	par to 5s pm
Tuesday	91⅞	92⅛	91⅞	92⅛	par to 5s pm
Wednesday	91⅞	92⅛	91⅞	92⅛	par to 5s pm
Thursday	91⅞	92	91⅞	92	par to 5s pm
Friday	91⅞	92	91⅞	92	par to 5s pm

Victoria 6 %	110½ 11½	110½ 11½	... ...
Ditto New 5 %	105 6	105 6	... ...

FOREIGN GOVERNMENT SECURITIES.—The predominant influence in this department, as we have already stated, has been the disposition of large holders to realise, so as to be ready for taking part in the new loan. Turkish, Egyptian, Italian, Spanish, and similar securities, have therefore been weaker. There is no material change of price to notice. Comparatively little business has been done during the week, and this absence of business is very observable to-day.

The market has been occupied with the new French loan, which is now announced for issue next week, but the statements regarding it are rather vague and conflicting. It is now certain that the amount will be 80,000,000*l.*, that it will be a 5 per cent. loan, and that the price of issue will be about 82, in reality 80, making allowance for the discounts on instalments, and interest during subscription. But the exact terms and dates of payment of the instalments are not specified. No little curiosity is felt about some points. M. Thiers has stated that the loan will be closed as soon as the amount advertised for is subscribed; but as the loan, it is understood, will be issued simultaneously in Paris, London, and other cities, some doubt is felt as to whether a portion will be reserved for each place of subscription, or how the loan will be closed in justice to the subscribers in different localities. The doubts however are only in details. The disposition to believe that the loan will be taken is much greater than it was a week ago, more confidence being felt in the establishment of some sort of settled order in France,

Digitized by Google

and the peaceful setting-up of a Monarchy at an early date. It is also understood that offers have been made by a syndicate of bankers in Paris, London, and Germany, to take up 40,000,000*l.* at a fixed price, but the offers are still under consideration. The dealings during the week have been at ¾ 1¼ pm., corresponding to quotations from Paris. French Rentes and the National Defence loan have also been firm, the latter closing at 95½, ¾.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Ditto 6 %, 1865	64½	64½	...
Ditto 6 %, Bonds, 1869	54	54	...
Ditto ditto Small Bonds	54½	54	— ½

The dealings in the other new loans have been restricted this week, and the prices are lower. Costa Rica at 2 to 2¼ pm. shows a fall of ½ for the week, and Spanish National Lands certificates at ½ dis to par, show a fall of ¾.

ENGLISH RAILWAYS.—The dulness in this department is general, being greatly aggravated by the weather, and the temporary falling off in the rate of increase in the traffic on most lines. Coupled with the other causes of depression, and the great rise of railways in the spring, the present state of the traffics is certainly such as to justify a little apprehensiveness among speculators, though investors need have little doubt about a progressive improvement, which will benefit them sooner or later. To-day prices have been better supported than they were early in the week, but there has been little business.

It is stated that the Midland Company, in the absence of any agreement with the Great Northern, has resolved to take its own course, and will charge at the rate of ½d per ton per mile for the conveyance of coal to London. We hope that this means the early stoppage of the present insane competition. It would certainly pay either of the companies concerned better to submit to a loss of traffic rather than convey it at terms, which must involve a serious loss to all.

Metropolitan have been rather better this week, owing to the confirmation of reports as to the conclusion of a working agreement with the District line. It was at first supposed that the agreement was unfavourable to the Metropolitan, but it is a great matter to have averted the threatened competition.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

We subjoin in our "Notices and Reports" a notice of the prospectus of a second mortgage loan for the new Mexican Railway Company. The price quoted to-day is 2¾, 3¼ pm. Since the publication of the advertisement, a protest has been made by the Mexican Bondholders' Committee to the effect that the promise of a subvention of 50,000*l.* by the Mexican Government to the new railway is a breach of that Government's engagement with its bondholders, by which all the revenues of the country are pledged. The Railway Company are understood to maintain that the promised subvention is no such breach, and that in any case the making of the railway will be favourable to the interest of the bondholders.

Some remark has been excited by the neglect of the Lombardo-Venetian Railway to hold a meeting in Paris, and circulate its accounts, as soon after the close of the insurrection as possible. But for the insurrection the meeting should have been held in April, and the dividends paid in May. The

Digitized by Google

insurrection of course covers the failure of the directors to hold the meeting and pay the dividends at the proper time; but the fact of delay having occurred should have made them anxious to get through the postponed business as soon as opportunity offered. The insurrection, however, has been over for nearly a month, and there is no announcement of the meeting, or of a dividend, or of the state of accounts. The delay is far greater than it ought to be, and the directors would do well to lose no more time.

It is announced that the sales of the property of the Atlantic and Great Western Railway Company, under the decrees of foreclosure, are advertised for the 18th, 22nd, and 26th of July, in New York, Pennsylvania, and Ohio, respectively.

Messrs McCalmont, Brothers, and Co., have received a telegram, announcing that the Philadelphia and Reading Railroad Company has declared a cash dividend of 5 per cent., payable in Philadelphia.

American Government Securities. — Advices from New York state that the subscriptions to the new Funding loan come in slowly, and principally on account of the national banks. There have been no transactions reported in this market, but the value of the old Government bonds has been well supported. Atlantic and Great Western bonds are 1½, and Erie shares are ⅛ lower on the week; otherwise the changes, as shown below, are not important.

Pennsylvania Gen. Mort. 6 % Bonds, 1910	93¾ ½	94¼ ⅛	+ ½
Virginia 6 % Bonds	55 6	55 6	

Joint Stock Banks.—There is no especial feature to notice in this department, the most important change being a decline of 2 in Bank of Australasia. Otherwise the fluctuations on the week are not important, but are such as to testify to a steady absorption of stock by the public. British North America have advanced 1; Anglo-Australian, Anglo-Egyptian, South Australian, and Oriental, ½; City, ½; Alliance, and London Chartered of Australia are each ½ lower.

Telegraphs.—Some considerable realisations have taken place in telegraph shares, but the tone of the market at the close to-night was not unfavourable. The leading changes for the week are—A rise of ½ in Anglo-American, ¼ in Cuba and Great Northern, and ⅛ in Submarine Scrip; British India Extension, China Submarine, and French Cables have declined ⅜; Falmouth and Gibraltar, and Marseilles, Algiers, &c., ¼; British Australia, and British Indian Submarine, ⅛. Silver's India Rubber Works are 1 better, but Hooper's have declined ½.

Mines.—Some important changes are apparent in the quotations for British mines, but these securities have only attracted an ordinary amount of attention. The chief alterations are—A nominal advance of 10 in Wheal Bassct; a rise of 3 in Margaret, Uny Lelant; 2½ in Van; 1 in Wheal Grenville and Tin Croft; ½ in South Condurrow. On the other hand, there is a fall of 5 in West Seton; 4 in West Chiverton; 2½ in Wheal Seton; 1½ in Great Wheal Vor; ½ in East Caradon, East Lovell, and Great Laxey.

The list of applications for shares in the Ajax (Big Indian) Silver Mining Company will close on Tuesday next for London, and on Wednesday for the country.

The subscription list of the Mineral Hill Silver Mines Company (Limited), a notice of which we subjoin, will be closed on Monday, the 26th, for London, and Tuesday, the 27th inst., for the country.

Miscellaneous.—The dealings in the miscellaneous market have been limited, and the tendency of values—more especially to-day—has been downwards. Hudson's Bay shares close at a reduction of 1½ on the week. Anglo-Austrian Bondholders' Certificates have given way ½; Ceylon, Ebbw Vale, and North Metropolitan Tramways, ¼; Credit Foncier, ½; Anglo-Mexican Mint, Berlin Waterworks, Fore Street Warehouse, and Trust and Agency of Australasia, have risen ¼; Rio City Improvements, ⅛; and Canada Company, 1.

It is announced that the business of Messrs Foster, Porter, and Co., of 47 Wood street, warehousemen, will from the 1st of July be carried on under the Companies' Acts of 1862 and 1867, as Foster, Porter, and Co., Limited, with a capital of 300,000*l*, of which two-thirds will be paid up. The shares in the company will not be offered to the general public, nearly the whole having been already taken by persons connected with the establishment. Mr J. P. Foster will be chairman of the company.

The prospectus has appeared of the Beechlands Coffee Estates Company (Limited), with a capital of 75,000*l*, in 10*l* shares, payable as follows:—2*l* on application, a similar sum on allotment, and the balance in two equal instalments of 3*l* each, falling due on September 15th and December 15th. The company is formed for the purpose of extending the cultivation of the Beechlands Coffee Estates in the district of Coory, in the East Indies, and of acquiring the Government grant and the buildings and plant upon the estate. The purchase-money is 25,000*l*; three-fourths in cash, and the balance in fully paid-up shares, upon which no dividend will be paid for any of the years 1871-5, unless a minimum dividend of 5 per cent. in each year is paid to the holders of the other shares of the first issue.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—Out of the recent arrivals about 240,000*l* has been purchased for export; the demand is, however, by no means active; and 514,000*l* has been sent into the Bank since the 15th instant. The Douro has brought 18,000*l* from the Brazils; the Peru has brought 404,290*l* from Australia; by various steamers, 224,000*l* from New York; and about 190,000*l* in ½ Imperials have also come to hand—total, 836,290*l*. The Poonah has taken 37,000*l* to Alexandria.

Silver has been in fair demand for the continent, and the price has been well maintained. We have received 181,000*l* in sycee from China, and about 72,000*l* by various steamers from New York.

Mexican Dollars.—The amounts to hand during the week have been comparatively small, the prices have consequently been maintained, and may be quoted at 58¾d per new, and 60d per oz for the old coinage.

Exchange on India for banks' drafts at 60 days' sight is 1s 10¾d to 1s 11d per rupee. Tenders for 400,000*l* in bills on India were received yesterday at the Bank of England. The amounts allotted were—to Calcutta, 350,000*l*, and to Bombay, 50,000*l*. The minimum price was fixed as before, at 1s 10¾d on all Presidencies. Tenders on Calcutta and Madras at 1s 10¾d per rupee will receive about 31 per cent., and on Bombay at that price in full.

India Government Loan Notes remain unchanged. The 4 per Cents. are 92¾; the 5 per Cents., 100¾ to 100⅞; and the 5½ per Cents., 107¼ to 108¼.

Quotations for Bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0¾d to 5s 0¾d per oz std; ditto containing 5 grains gold, 5s 0¾d to 5s 1d per oz std, last price: Mexican dollars, 4s 10¾d to 5s per oz, last price.

The *Gazette* return shows that the imports of the precious metals into the United Kingdom during the week ended June 21, were—gold, 967,254*l*; silver, 343,998*l*. The exports were—gold, 89,814*l*; silver, 52,716*l*.

Bar gold to the amount of 54,000*l* was sent into the Bank to-day.

Exchanges.—The changes to-day show rather a better demand for bills upon the cities of Belgium and Holland, and on Paris.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 350,000*l*; and to Bombay, 50,000*l*. The *minimum* price was fixed at 1s 10¾d on all the Presidencies (an advance of 1 per cent.), and tenders on Calcutta and Madras at 1s 10¾d will receive about 31 per cent., and on Bombay, at that price, in full. These results show a further increase in the demand for means of remittance to the East.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, June 26.

Bank of Roumania, annual general, 13 King's Arms yard.
Kapunda Mining, general, 28 Great Winchester street.

TUESDAY, June 27.

Bank of South Australia, general, 54 Old Broad street.
Crystal Palace, general, Sydenham.
General Mining, general, 52 Old Broad street.

WEDNESDAY, June 28.

South Australian, general, 4 New Broad street.
Hudson's Bay, general, City Terminus Hotel.
Sao Vicente Mining, general, London Tavern.

THURSDAY, June 29.

Marine Insurance, general, 20 Old Broad street.
Canada, general, 1 East India avenue.
Arica and Tacna Railway, general, 30 Moorgate street.
Ebbw Vale Steel, Iron, and Coal, general.

FRIDAY, June 30.

Assam, general, City Terminus Hotel.
Dutch Rhenish Railway, general, Utrecht.
East Cornwall Mineral Railway, extraordinary general, 103 Cannon street.
Titanic Steel, &c., extraordinary general, Westminster Palace Hotel.

NOTICES AND REPORTS.

STOCKS.

Argentine 6 per Cent. Loan.—Bonds representing 35,500*l* have been drawn for redemption at par on the 1st July.

San Domingo 6 per Cent. Loan, 1869.—Bonds representing 7,400*l* have been drawn for redemption at par on the 1st July.

RAILWAY COMPANIES.

Great Eastern.—Applications are being invited from the proprietors for 650,000*l* perpetual 5 per cent. guaranteed Metropolitan stock, at the price of 5 per cent. premium. The instalments are payable in sums of 20 per cent. each, with 1 per cent. of the premium.

London, Brighton, and South Coast.—The directors have determined to issue 4½ per cent. debenture stock at par, for the purpose of paying off a like amount of terminable debentures falling due. The calls will extend over a period of eighteen months, and the terminable debt will then be reduced to little over 1,000,000*l*.

Madras.—The North-west line has been completed to Bellary and to Raichore junction, whence the Great Indian Peninsula line extends to Bombay. The total receipts for the half-year amounted to 227,535*l*, and the expenditure to 124,874*l*, leaving the net receipts 102,661*l*. The receipts for the corresponding half of 1869 amounted to 203,556*l*, the expenditure to 157,390*l*, and the net receipts to 136,166*l*, showing a decrease in the gross receipts of 66,021*l*, including 25,815*l* for materials, and 24,929*l* for cotton, and in the net receipts of 33,505*l*. The capital account showed that 9,086,240*l* had been expended.

Mexican Railway, Limited.—Issue of 7 per Cent. Bonds.—Messrs. Bischoffsheim and Goldschmidt have received applications for 1,180,000*l* in bonds, secured by a first mortgage upon the Vera Cruz and Apixaco section, 180 miles in length, of which 53 miles are already in operation, and the balance will be completed by the end of next year. The other section from Puebla and Apixaco to Mexico city is in operation, and worked at a profit. The line has already cost 4,000,000*l*, including a Government grant of 500,000*l*, and the present issue will complete the works. The railway passes through a productive territory, and will open out a large mining district. 50,000*l* of the annual money grant from the Government will be set aside for the service of these bonds. The issue price has been fixed at 70 per cent. and a 1½ per cent. sinking fund is to be applied to the redemption of the bonds, thus to be completed within 26 years.

Scinde, Punjaub, and Delhi.—The revenue receipts for the half-year amounted to 244,889*l*. The working expenses absorbed 198,943*l*, or 81·23 per cent., leaving a net revenue of 45,946*l*. The opening of the Sutlej Bridge was too late to influence the results of the past half-year's working to any great extent; but now that the whole of the company's system has been placed in direct connection with the East Indian Railway, and unbroken railway communication had been established between Lahore and Mooltan and Delhi, Calcutta, and Bombay, an addition to the traffic is looked for. Capital received 10,287,654*l*, leaving as balance in hand 253,798*l*.

BANKS.

Anglo-Hungarian.—The dividend for the year was fixed at 5 florins silver per share, of which 8s was paid in January, leaving a further 2s for present distribution.

Bank of South Australia.—A dividend at the rate of 10 per cent., free of income tax, has been declared.

Imperial Ottoman.—The adopted report showed a gross profit of 425,905*l* for the past year, the available balance, after adding 9,400*l* the previous surplus, being 239,170*l*. The great increase in the difference between the gross and net profits of the year 1870, compared with that of 1869, is to be explained by the necessity of writing off a large amount for bad debts incurred by the sudden collapse of credit in the East, and the consequent ruin of many houses. In addition to which the securities held by the bank were valued at the quotations of the end of the year 1870, and consequently at a period of exceptional depression. After deducting the statutory addition to the reserve fund and interest on the same (raising that fund to 200,005*l*), there remained 205,635*l*, of which 101,250*l* was distributed by way of interim dividend in January; a similar distribution now (making 10 per cent. for the year) has been declared, leaving 3,130*l*.

London and South-Western Bank.—The office has been removed to No. 7 Fenchurch street.

Provincial of Ireland.—The usual 20 per cent. per annum dividends are announced.

Roumania.—The report shows an available balance of 40,342*l* 2s 10d (after deducting 36,110*l* 14s 2d expenses, &c.) for the year 1870. The committee recommend a payment of 5s 6d per share, making, with the previous distribution in January, a dividend of 8*l* 5s 9d per cent.

FINANCE, CREDIT, AND DISCOUNT COMPANIES

International Financial Society.—An interim distribution at the rate of 5 per cent. per annum is announced.

ASSURANCE COMPANIES.

Crown Life Assurance.—At the meeting a dividend of 31s per share was declared. The new policies for the year were stated to have been 758, for a total of 373,369*l*, yielding 11,089*l* in new premiums. The accumulated fund is 1,175,334*l*; the assurances in force are 4,588,000*l*, and the annual income is 182,386*l*.

Home and Colonial Marine.—It is announced that Mr A. Chavell, of the firm of Messrs Bordies, Fabris, and Co., has joined the board of this company.

Maritime Insurance.—Interim dividend notified at the rate of 10 per cent. per annum.

Royal Exchange Assurance.—A dividend of 16 per cent. for the half-year has been declared.

Standard Life Assurance.—The new assurances effected during the past five years were reported at 5,713,813*l*, and the sum of 331,000*l* remains for division amongst the policy-holders.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph.—Both the 1865 and the 1866 cables are now in working order.

Anglo-Austrian Bituminous Rock Paving, Limited.—Capital, 100,000*l*, in 10*l* shares. This undertaking has purchased the exclusive right of supplying Austria with Val de Travers Asphalte, the price paid to the Bituminous Rock Company being 5,000 fully-paid shares. Pavements in Austria are described as being generally bad, while the price of granite is very high.

[CONTINUED FROM PAGE 755.]

Ceylon Company.—A dividend at the rate of 6 per cent. per annum has been declared. Owing to the war the price of coffee last year showed some decrease.

Charles Cammell and Co.—Available profit, 82,446*l.*, inclusive of 6,946*l* brought into the account. A dividend of 6*l* per share absorbs 60,000*l.*, leaving surplus 22,446*l.*

Colonial Company.—At the meeting the year's net profit was stated at 34,472*l.*, and a dividend of 12s per share was declared, making 8 per cent. for the twelve months.

Crystal Palace.—The debentures and preference dividends will be paid on the 15th July. The number of admissions have shown increase. Large renewals have been made, and the water towers are being put in a state of thorough repair.

Ebbw Vale Steel, Iron, and Coal.—A dividend of 20s per share, making 30s for the past year, is announced. The report states the net profit for the year, including the sum of 90,468*l* expended in outlay of additional plant, amounted to 120,535*l*, making a total of 126,380*l*, with 5,844*l* brought forward.

Foreign and Colonial Government Trust—Second Issue.—Certificates amounting to 6,900*l* have been drawn for redemption at par on the 15th July.

Hudson's Bay.—The net profits for the year ended the 31st of May amounted to 27,357*l.*, as against 53,321*l* for the year ending the 31st of May, 1870. The balance of undivided profits was 61,417*l.*, as compared with 64,061*l* last year. The interim dividend paid in December, 1870, was 20,000*l.*. Of the total receipts 35,494*l.*, from which the profit of 27,357*l* was made in the past year, 11,425*l* was due to the balance of gain on the premises in Fenchurch street; 5,688*l* represented the income derived from investments, and only 18,383*l* arose from the profits of the fur trade. The loss of property during the disturbances at Red River had affected the accounts to the amount of about 20,000*l.* As regarded the fur trade, the directors believe that great economy may be effected by steamers upon some of the lakes and rivers, and by a reduction in the staff of officers. As regarded the other business, they have a large landed interest in a territory which is now beginning to attract emigrants. The directors consider it desirable to employ some of the officers in the management of the land. They propose to purchase the respective interests of that body, which has been calculated at 75,255*l.* and to add to it 31,800*l.*, or two-fifths of the Oregon money, after deducting expenses, spreading the payments over three years. The great object of reorganising the establishments on a thoroughly satisfactory footing could not be attained at a lower cost. The directors recommend that a further dividend of 6s per share be paid, thus reducing the balance to 31,417*l.*

Leigh Gas Light and Coke.—Mr W. W. Woodman, of 25 St Swithin's lane, has been appointed official liquidator.

National Steamship.—Interim dividend declared at the rate of 10 per cent. per annum.

Thames Shipbuilding, Graving Docks, and Iron Works Company, Limited.—Capital, 250,000*l.*, in 12,500 shares of 20*l* each. The Thames Iron Works, Shipbuilding, Engineering, and Dry Dock Company, Limited, before 1866 acquired the business and premises of the largest private shipbuilding firm in England, and the works then taken over have been since added to. In all 600,000*l* has been expended on the property, which has a frontage of 1,100 yards upon the river, and the whole will be purchased for 250,000*l.* partly in shares. The business is in thorough order, and the reconstruction. it is believed, will make it very paying, especially as the trade is stated to be rapidly improving.

MINING COMPANIES.

Imperial Ottoman Mining.—The following telegram has been received from the manager:—Pera, June 19.—Good lode cut at 25 fathoms level, producing lead and copper. Cheering prospects. Particulars by post. Shipment of ore in Swan's hands.

Mineral Hill Silver Mines, Limited.—Capital, 300,000*l.*, in 10*l* shares, of which 24,000 shares are handed over to the vendors as a moiety of the purchase price. The remaining 6,000 shares will be given to the subscribers of the present issue of debentures upon their redemption, at the rate of 2 shares per 100*l* debenture. The debentures now being issued are for 300,000*l* in sums of 100*l* each, bearing 15 per cent. interest, payable quarterly; and they are redeemable at 125*l* each out of all surplus profits after 15 per cent. has been paid upon the share capital. It is at the same time estimated that the whole will be redeemed by quarterly drawings in three years. Out of the money thus raised the other moiety of the purchase price will be paid, the balance being reserved for erecting new machinery. The Mineral Hill is situated in a productive part of the State of Nevada, and is reported upon by Messrs John Taylor and Sons and others, from personal inspection, to be a most valuable property, already yielding large returns although not fully developed. The claims and mines acquired are forty-one in number, and one to the value of over 240,000*l* is stated to be in sight.

St John del Rey.—The report states that the cost in 1870 amounted to 52,846*l.*, and the produce to 47,822*l.* The cost exceeds that of 1869 by 7,622*l.*, while the produce is 1,100*l* less. The reserved fund amounts to 21,405*l.*

Tapanrhi Gold.—The report refers to the unsatisfactory result of the operations at the mine, but adds that favourable results may yet be obtained. The gold return has amounted to 7,789 oitavas, realising 3,350*l.*

Tolima Mining, Limited.—Capital, 100,000*l.*, in 5*l* shares; 14,000 A shares bearing a minimum 10 per cent, preference dividend are for public subscription, and 6,000 B shares are taken by the vendors as part of a purchase price of 70,000*l.*, 20,000*l* will be handed to the vendors to pay off incumbrances, and 20,000*l* will be paid after the A shares have received a yearly dividend of 20 per cent. The Tolima State of the Colombian Republic, South America, is stated to be very rich in mineral wealth; and this undertaking is formed to purchase the "Frias Silver" and "Organos Gold" mines, situated upon properties comprising 3,100 acres of well-watered and timbered land. The silver mine has already been brought into profitable working order, and by aid of additional machinery large profits are looked for. Labour is stated to be cheap and plentiful, and dividends are estimated at 50 per cent.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 37th and 38th Victoria, cap. 67, in the week ended June 17, 1871:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	41,722 3	59 7
Barley	369 2	35 11
Oats	1,376 7	26 10

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The changeable weather has created an uncertain tone in the grain trade, and transactions at Mark lane have been much restricted. To-day the tendency of the quotations for wheat has been against holders, owing to the return of warm weather, and to the comparatively liberal arrivals of foreign produce; nevertheless, the factors were not willing to give way, and only did so when pressed to sell. English wheat remained nominally unchanged in value. Flour was easier to buy. Maize, oats, and peas, were also cheaper; but barley and peas were unaltered. This week's imports of foreign and colonial produce into London have amounted to 41,890 qrs of wheat, 4,980 barley, 36,100 oats, 11,920 maize, 2,130 peas, 2,770 sacks, and 29,780 barrels of flour.

There was no important feature in the Liverpool and Wakefield markets this morning, prices remaining unchanged for most descriptions of grain.

The Liverpool cotton market was very active until Wednesday, at an advance of ½d to ⅝d per lb. On Wednesday a quieter tone set in, and yesterday the market was dull at a decline of about ⅛d per lb. The total sales for the week are 137,460 bales, of which the trade have taken 79,070 bales, speculators and exporters 58,390 bales. The imports are 64,017 bales, the actual exports 20,626 bales, and to-day's stock is estimated at 909,680 bales. Quotations for American descriptions have advanced ⅛d per lb; East India, 1d per lb; and Bengals, 1d per lb since last Friday. To-day there has been a better feeling, and the market closes steady. Sales, 15,000 bales.

At New York, on June 22, middling Upland cotton was quoted at 20¼ cents per lb.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 22, 1871:—

	Imported.	Exported.
American	bales 38,794	8,652
Brazilian	8,095	796
East Indian	28,817	15,717
Egyptian	2,413	451
Miscellaneous	2,932	814
Total	80,151	26,413

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, May 27:—The tone of the cotton market has been decidedly firmer. Since the commencement of business on Monday dealers have been able to exact daily increasing rates, and the advices contained in late messages have tended still further to stiffen prices. The main element of strength to holders of stocks, however, is to be found in the scanty supplies of Dholleerah which have come forward during the past fortnight, and to the prevailing belief that further imports from the Kattiawar ports are likely to be on a very much reduced scale. Large contracts have yet to be completed this month, and as many of the dealers are unable to fulfil all their engagements, such others as are possessed of passable cotton find ready sale for their parcels at very extravagant rates. Several European houses have been obliged to "buy in" against contracts, and we expect to find this course resorted to more freely next week. Arrivals were moderate in the beginning of the week, but latterly they have again fallen off. The favourable wind which is now blowing will, we hope, bring in a fleet of boats during the next two or three days. The weather has been fine all the week, and shipping operations are progressing rapidly. The monsoon appearance referred to in our last circular has given way to bright sunshine, and we seem to be fairly in for a break of some duration. From Dhollera we learn that clear weather prevails there also. The rains have damaged a considerable portion of the cotton which is lay exposed, and a good deal of black leaf may be looked for in the supplies which come forward hereafter. Very little Dharwar is coming forward, and we learn from Carwar that the New Compta offers a poor selection, as much as a half of the docras submitted for selection being rejected. From Tinnevelly we have a telegram dated the 25th instant quoting 5¾d per lb, cost and freight.

Export of Cotton from Bombay to May 26.

Actual exports since last mail left, 34,083 bales.

The following report, dated Alexandria, June 9, has been furnished by the Imperial Ottoman Bank:—We have had an excited and daily-advancing cotton market all the week, but the poor selection and small receipts, together with the greatly increased pretensions of holders, have prevented a large business being done. To-day a quieter feeling prevailed, and prices were somewhat easier. We quote:—Middling fair, 7¾d to 8d per lb, f.o.b.; fair open, with staple, 8½d to 8¾d, ditto; good fair, with staple, 8¾d to 8¾d, ditto; fully good fair, with staple, 9¼d, ditto. Weekly arrivals, from June 3rd to June 9th, 8,025 cantars. Sales, from June 3rd to June 9th, 10,177 ers. Shipments, from June 2nd to June 8th—To England, 1,507 bales; to Italy, 190 bales—total, 1,697 bales. Freight on cotton, by steamer to Liverpool, ⅜d per lb; ditto ditto on steam-pressed bales, 22s per ton, 40 cubic feet.

The colonial produce markets have ruled quiet. The stock of sugar in the United Kingdom shows a reduction of 47,000 tons as compared with last year. The market on the spot, however, has been quiet; and, in some instances, holders have accepted lower rates, but there has been a good demand for floating cargoes. Coffee has been in steady request, and has commanded full prices. French buyers have been operating freely, both on the spot and for arrivals. Cocoa has been firm in value; but the rice market has remained quiet. In rum a fair business has been done.

The market is dated Rangoon, May 15:—Our rice market has been very quiet throughout the fortnight under review, there being almost no demand for our staple, neither for shipment to Europe nor for other quarters. The rather heavy rain which fell since the 3rd instant, has added to the dulness of our market, as it has damaged a great part of the grain which was in boats on the way to Bassein in consequence of which exporters became very reluctant buyers. The small quantities which arrived last week were taken at 126 rs to 134 rs per 100 baskets, 5 to 6 parts Natsain rice, according to quality, equal to 5s 6¼d to 5s 10d per cwt, free on board; whilst for Nyakyouk quality 112 rs to 116s has been paid, equal to 5s 1d to 5s 2¼d per cwt, free on board. As prices are proportionately higher in the interior, supplies will probably stop entirely for some time, unless our market advances soon. The tonnage loading rice for Europe amounts to 15,000 tons burthen, for which the cargoes are, however, all in store. The demand for the Straits and China has became very weak on account of unfavourable advices from that quarter. Exports to Europe from 1st January up to date amount to 152,275 tons, against 119,388 tons during the same time last year.

Mr Helmuth Schwartze observes:—The third series of London sales of colonial wool commenced on June 22, with the following catalogue—3,482 bales Sydney, 1,458 Cape, 1,085 Port Phillip, 562 New Zealand, 553 Adelaide, 291 Van Diemen's Land, 23 Swan River—total, 7,454 bales. There was a large attendance of both home and foreign buyers; the biddings were very spirited, and prices as compared with the closing rates of last series ruled for Australian washed 1½d; for Australian grease, 1d; and for Cape, about 1d higher. The arrivals in time comprise—58,024 bales Sydney, 26,407 Cape, 67,942 Port Phillip, 45,805 New Zealand, 9,053 Adelaide,

Digitized by Google

11,772 Van Diemen's Land, 2,632 Swan River—total, 221,635 bales; and the series as at present arranged is to last till the 1st August.

The annexed is dated New York, June 9:—Business generally is dull, but not more so than usual at this period of the year when the home trade is reduced to the absolute necessities of interior distributors. And in consideration of the general apathy, prices are very well maintained, the crop prospects, under the late refreshing rains, having improved, with the exception of cotton. Indeed throughout the grain-growing States the weather is now peculiarly favourable to the crops, and advices from all sections regarding cereals and pasture are very favourable indeed. Corn is growing rapidly, and the acreage being uncommonly large, the indications point to a most munificent yield. In the Southern States the wheat harvest is progressing favourably, and in such States as Virginia, Tennessee, Maryland, and Kentucky, the yield promises to be the largest since before the war. The cotton crop will undoubtedly fall considerably short of last year, a circumstance that cannot fail to have a serious influence upon the prosperity of the whole country. We are inclined to the opinion, however, that the estimates of decrease have been quite generally exaggerated. The volume of the exports of produce (except cotton, which is relatively dearer than abroad), continues fair, thus giving the markets for the leading staples a good support. The outward movements in breadstuffs and provisions during the present fiscal year has been exceptionally large, and with a good surplus still on hand, and peace in Europe restored, the outlook for the remainder of the season is promising. There is no interruption of the easy condition of the money market which has been so conspicuous a feature for several weeks past, the rates continuing 3 to 4 per cent. on call, and 4½ to 7 per cent. discount of approved business notes. Gold remains firm and steady, while foreign exchange is the turn easier.

THE COTTON TRADE.

LIVERPOOL—JUNE 22.

The cotton market opened this week with great animation, the sales continuing very large, at daily hardening prices, and quotations show an advance in all descriptions. On Wednesday a quieter tone set in, which has since continued, and the extreme prices have not been maintained. Sea Island has been in good demand, and with the exception of the common qualities, which continue unsaleable, prices are 1d to 2d per lb dearer within the fortnight. In American the business has been large, and after advancing fully ¼d per lb, prices close about ¼d per lb above the quotations of Thursday last. New York advices to the 22nd instant quote middling Upland 20¼ cents, costing to sell in Liverpool 10½d per lb, by steamer. Brazil has continued in good request, and has advanced ¼d to ½d per lb. Egyptian has again been in extensive demand, and prices have risen fully ¼d per lb. The supply of East Indian is much reduced, and with a strong demand both from the trade and exporters, prices have advanced ¼d per lb.

In cotton to arrive the transactions have been very extensive, at higher rates, but closing easier. The highest quotations early in the week were—American, basis of middling, from any port, not below good ordinary, May shipment, 8¾d; August-September delivery, 8¾d; New Orleans, not below low middling, ship named, not sailed, 9d; low middling, New Orleans, not below good ordinary, nearly due, 8¾d; Dhollerah, Cape, fair new merchants, May-June shipment, 7 5/16d; ship named, 7 5/16d; Oomrawutee, Cape, fair new merchants, April sailing, 7d; February, 7 5/16d per lb. This day—American, basis of middling not below good ordinary, delivery from any port, August-September, 8¾d; bales, from any port, July-August, 8 7/16d; Texas, August-September, 8¾d; New Orleans, August, 8¾d; ship named, 8¾d; Mobile, not below low middling, August, 8¾d; low middling, not below good ordinary, New Orleans, delivery June, 8 5/16d; Texas, at sea, 8 5/16d; Dhollerah, Cape, fair new merchants, ship named, 6 13/16d; May shipment, 6¾d; May-June, 6¾d; Oomrawutee, fair new merchants, canal, May-June shipment, 6¾d per lb.

The sales of the week, including forwarded, amount to 137,460 bales, of which 38,570 are on speculation, and 19,820 declared for export, leaving 79,070 bales to the trade.

JUNE 23.—The sales to-day will probably amount to about 15,000 bales, with a steady market.

N.B.—The actual stock in Liverpool will be taken on the 29th and declared on the 30th instant.

LONDON.—JUNE 22.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The demand continued without interruption until yesterday, and the sales, both on the spot and to arrive, at one time showed an advance of fully ¼d per lb; since then the market has turned flat, and prices of cotton to arrive can only be called ⅛d per lb above those of last week, while spot parcels are steady at the highest point.

NEW YORK.—JUNE 9.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 9. From the figures thus obtained it appears that the total receipts for the week ending this period 28,136 bales, against 36,402 bales last week, 49,178 bales the previous week, and 45,067 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,821,180 bales, against 2,792,879 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,028,301 bales. The exports for the week ending this evening reach a total of 42,823 bales, of which 23,107 were to Great Britain, 12,465 to France, and 6,751 to rest of the continent, while the stocks as made up this evening are now 235,508 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending June 9.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.

Other ports	49	7	56	100	12800	14000
Total	23107	19216	42323	23352	235508	369896
Total since Sept. 1	2245670	740171	2985841	1882941	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 19,361 bales, while the stocks to-night are 28,378 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 2, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

The upward movement in prices which has been in progress the past two or three weeks has been further stimulated this week by continued unfavourable crop reports from a considerable section of the South and a favourable response from Liverpool, middling Uplands reaching on Tuesday 18¼c, against 17½c at the close of last Friday. For forward delivery prices have also advanced again this week, attended on Tuesday with great excitement, but afterwards they fell off largely, and recovering, though not quite to the same extent as spot cotton. For the later months September and October quotations are lower. Low middling closed to-night at 18¼c for June, 19c for July, 18¾c for August, and 18c for September. The total sales of this description for the week are 78,250 bales. For immediate delivery the total sales foot up this week 21,852 bales, including 1,437 for export, 9,635 for consumption, 2,428 for speculation, and 8,352 in transit. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending June 8, 1871.			Week ending June 9, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta	601	1633	4351	302	507	11595
Columbus	242	148	2566	100	111	3016
Macon	231	227	2534	113	532	6673
Montgomery	292	405	2630	80	696	4456
Selma	275	301	1793	71	96	2200
Memphis	2131	4278	5648	2103	3081	13941

	5167	8345	21541	3115	6530	48321

The above totals show that the interior stocks have decreased during the week 3,178 bales, and are to-night 26,813 bales *less* than at the same period last year. The receipts, however, have been 2,052 bales in excess of same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 5,781 bales, against 11,718 bales last week. Below we gave our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

Digitized by Google

NEW YORK, June 17.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 24,000 bales, and since the 1st of September, 3,845,000 bales. Shipments to England, 13,000 bales; to France, 5,000 bales; and to the continent, 3,000 bales; and since the 1st of September, 3,013,000 bales. Stock at all ports, 225,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

NEW YORK, June 20.—The receipts of cotton for the last four days have been 15,000 bales. Shipments to England, 22,000 bales; to France, 4,000 bales; and to the continent, 4,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 22.—The business of the past week has again been of a very restricted character, caused by a further advance in prices for all descriptions of yarns and cloth, in consequence of the continued upward movement in cotton. Upto Tuesday the business done was small, but prices were strongly maintained. On Wednesday the cotton market became quiet, stocks being freely offered, with a slight decline in value, which is more marked to-day. The recent advance, being too rapid and considerable, is not likely to be maintained, consequently buyers hold aloof, in anticipation of doing better by and bye. The quotations given below are mostly nominal, as the market closes dull, and prices favouring buyers.

Messrs Alexr. Collie and Co. received the following telegram from Manchester yesterday:—Tone of market better than yesterday, but little business doing, and prices, as compared with Tuesday, are in buyers' favour.

BRADFORD.—The reports as to the state of the wool market are rather conflicting. Prices in the country are so much in advance of what can be realised in this market that the purchases of spinners, who operate with caution, are very restricted. The business doing in the yarn market continues steady. The home demand is without change. Owing to the great firmness of wool spinners are hardening their quotations. Though little fresh business has been done in the wool market manufacturers continue very busy and prices are stiff.

LEEDS.—The cloth market has been chiefly remarkable for the buoyant demand in the tweed department—a demand which seems only likely to expire when the supplies themselves come to an end. Coatings and Meltons sell regularly, but not often in bulky parcels.

ROCHDALE.—The flannel market is quieter. The merchants who supply themselves here seem to have acquired sufficient stock during the last month, and can now be content to look on and watch the fluctuations of the market.

NOTTINGHAM.—There is a steady demand for lace goods, and future prospects are of a very cheering character. In the silk branch sprigged nets are still in request. The market for raw silk is firm at late quotations. The hosiery trade is in a healthy state. There is no change in the price of hosiery yarns.

BELFAST.—Flax—In some of our provincial markets, supplies though by no means extensive, were in excess of those offered; all presented changed hands with freedom, at unaltered rates. Yarns—Transactions reached a fair amount, but few forward orders were placed. Stocks further decreased; rates steady, with a tendency to advance. Handloom linens brown—Fine linen and cambric handkerchiefs and improved makes of light linens for bleaching, demand has been comparatively active, at late full prices. Powerloom—Little alteration can be announced regarding this discription of goods since last report. Bleached and finished linens—Demand very good on home account. Stocks generally are not extensive; little change in prices.

DUNDEE.—In the flax market there is no change to notice; holders of goods on the spot continue very firm, and refuse to sell unless at full prices, the quotations in this market being still in many cases comparatively lower than those ruling abroad. Medium and good qualities of tows continue in demand at steady prices. Jute continues to have rather an upward tendency, notwithstanding the favourable accounts hitherto received of the new crop. The yarn market continues exceedingly firm; prices of all kinds are well maintained, and spinners refuse to make farther contracts unless at very full rates. The demand for linens continues very good, and manufacturers are generally well supplied with orders. Jute goods continue in extensive demand, but flax canvas still remains exceptionally dull.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JUNE 9.

We have had a small but pretty general improvement in the market for breadstuffs during the week, the result, mainly, of reduced receipts here and at the West and some decline in ocean freights, closing strong. Flour has arrived but moderately, and the demand has not been brisk, but the relative dearness of wheat has made holders unwilling sellers, and the low grades of State and Western brands, the good supers and common extras from new wheat, have brought some advance, while the medium grades have shown a little weakness. Wheat has improved 4c to 6c per bushel. Corn

operating at the moment. The heavy rainfall has had a prejudicial effect upon the growing crops, while the hay, where cut, has suffered materially. Sufficient moisture has been secured for the wheat plant, which is only just springing into ear, and a spell of warm forcing weather is now very desirable for all crops. Only in the earliest districts has the plant commenced to bloom, while a general loss of colour is reported. The harvest will probably be a week or ten days late, but we are by no means inclined to endorse the unfavourable reports so industriously circulated in regard to the prospects of the crops. The hope of a large export demand on French account has been signally disappointed, and the markets, both in England and France, are overstocked with the flour manufactured in view of this movement. This has naturally tended to further depress the trade, and to check purchases. Foreign wheat may be quoted 1s decline on the week; but English is nominally unchanged in value, owing to the scanty supplies and the absence of business of sufficient importance to test prices.

With large arrivals of maize and oats and further heavy shipments on the way the trade ruled dull, and values have given way 1s per quarter. Beans have sold at a similar decline; barley and peas are without material alteration in price.

Mr George Dornbusch thus reports the state of the floating grain seed trade:—During the last eight days 39 grain and seed-laden vessels have been reported arrived at ports-of-call, viz.:—49 wheat, 5 maize, 3 barley, 1 rye, 2 oats, 2 beans, 4 cotton-seed, 1 millet-seed, and 2 value ex.The floating grain trade has been dull, with prices tending downwards. Wheat has been slow to sell at 1s to 2s below late rates. Maize steady at about late prices. Barley quiet. Rye—All the imperfect cargoes off the coast have been disposed of. The reported sales are as follows:—Wheat—3 arrived cargoes: Ghirka Odessa, 50s per 492 lbs; spring and New York, 53s 6d to 54s 3d per 480 lbs. Maize—9 arrival cargoes: Odessa, 35s 3d to 35s 7½d; Moldavian Sulina, 35s 6d; old Roumanian, 35s 10½d; fine yellow, 28s; American, mixed, 33s per 480 lbs. Shipped or to be shipped, 1 cargo American, from New York, at 30s per 480 lbs. Barley—2 arrived cargoes: Ibrail, 27s 6d; Danubian, 29s per 400 lbs. Rye—3 arrived cargoes: Enos, 34s; Moldavian, 28s 6d per 480 lbs. Lindseed quiet, and to sell, cheaper. Rapeseed steady at 6d decline. Cotton-seed steady at the late decline.

COLONIAL AND FOREIGN PRODUCE MARKETS.
TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The chief feature to notice this week is the rather large business done in floating cargoes for the United Kingdom, some of these being at easier rates. No improvement in the general demand can be quoted. There were 1,164 casks West India sold in three days at former prices, with an occasional slight reduction. The above quantity including the portion sold by auction. Barbadoes, 29s to 34s 6d; grainy, 35s to 37s 6d; crystallised Demerara, 37s to 38s 6d; brown to grey Jamaica, 30s to 31s 6d. Two floating cargoes of Trinidad are reported for the United Kingdom at 26s 3d and 26s 4½d; two of St Lucia at 25s 3d per cwt. Grainy descriptions are quiet. There is only a partial demand for Manila and other low qualities. Further arrivals have taken place not yet included in the stock, which is still much below the usual average for this port, and the deliveries continue large.

Mauritius—5,482 bags in the public sales chiefly sold at previous rates for soft qualities: brown, 25s 6d to 30s 6d; yellow and grey, 31s 6d to 32s 6d. A floating cargo has sold for the United Kingdom, No 14½, at 32s 6d per cwt.

Natal.—604 bags brown part sold at 26s to 29s for brown.

Manilla.—About 450 tons have sold on the spot: Zebu, at 22s; Ilo Ilo, at 23s; and Taal, at 20s 9d.

Foreign.—Of 242 casks 43 barrels Porto Rico the bulk was taken in. A few lots sold at 33s to 35s for middling to good yellow. 195 casks 150 barrels 163 bags Guatimala, &c., partly found buyers: grainy, 31s to 36s; soft brown and grey, 26s 6d to 31s 6d. 1,024 boxes Cuba were bought in. A few lots strong dry grey realised 37s 6d to 39s. 100 casks Honduras concrete sold at 28s 6d to 29s per cwt. 303 casks 650 bags beet sugar withdrawn.

Foreign Cargoes.—The following are reported sold for the United Kingdom. One Havana, No. 11¼, at 31s; one Cuba, at 27s 9d; three of Porto Rico, at 28s; one of Bahia, at 23s 6d; and one of 16,100 bags Java syrups, at 17s 6d per cwt, ex spar for Liverpool.

Refined.—The market has been firmer but is now quiet, and foreign offering for delivery. Common to fair dry goods are quoted 41s 6d to 43s per cwt.

MOLASSES.—35 puncheons St. Lucia have sold at 11s 6d, and 120 puncheons Antigua at 13s.

RUM.—There has been a steady demand during the week, but the business was of moderate extent, and chiefly restricted to common kinds of West India, Leewards, 1s 6d to 1s 7½d; Berbice, 1s 8d; Demerara in puncheons, 1s 9d to 1s 9½d; smaller packages, ¼d to 1d per gallon more.

COCOA.—There is a very good demand, owing to the extended consumption. Further business has been done in Guayaquil privately at 43s to 54s 6d. At the public sales of Trinidad on Tuesday, 1,187 bags were cleared sold at full prices: fine and good quality, 66s to 72s; good to fine, 77s to 108s; a very few fine up to 135s. 1,112 bags Grenada went about 2s dearer, from 50s to 56s for ordinary to middling, and 57s to 71s for good to fine. 158 packages St Lucia sold at 47s to 47s 6d. 65 bags Surinam, 55s to 68s per cwt.

TEA.—Several small public sales were held on Tuesday and the two following days, the total quantity in the catalogues amounting to 10,691 packages. Prices showed few changes for some parcels in second hands, printed without reserve. Yesterday red leaf congou from recent arrivals obtained fully former rates. Fine Ning Chou congou sold at 2s 1d per lb, being cheaper. By private contract the business is chiefly restricted to common red leaf congou, which has been in some specilative demand.

COFFEE.—The market continues freely supplied, but there has been a good demand at fully last week's rates, and the shipments to France have caused a farther increase in the deliveries. At the next sale of the Netherlands Trading Company on the 27th inst. 80,000 bags will be brought forward, being 17,000 bags less than in 1870. At the public sales of plantation Ceylon 1,377 casks 576 barrels and bags all found buyers; grey low and small to bold, 56s to 70s; colory low middling and dull to good middling, 62s 6d to 73s; superior and bold, 75s to 85s. Several contracts have been made in native at 55s to 56s. 70 casks 5 barrels 369 bags by auction part sold at the above prices for old imports. 66 casks 28 barrels and bags Jamaica: low and ordinary, 53s to 58s; fine ordinary to good middling colory, 59s to

Digitized by Google

74s 6d. 355 packages Mocha; short berry Lair to good, 93s to 102s; mixed, 84s 6d to 86s; long berry, 90s to 98s. 1,184 bags native East India part sold at 58s. Privately, about 3,000 bags at 56s to 60s. 751 cases by auction chiefly found buyers, including Wynaad, &c., 63s 6d to 68s; bold, 72s 6d to 80s. A few lots of Naldoobanum, 71s 6d to 75s 6d. 1,219 bags Singapore sold: Bubpree, 55s to 60s; other kinds, 47s 6d to 56s. 6,538 bags foreign descriptions nearly all sold: Costa Rica, fine ordinary to middling palish, 59s to 62s; Guatimala, 56s to 62s; superior and colory, 64s to 68s 6d; Santos, 53s to 58s; La Guara, 58s to 63s 6d. 85 bags Manilla at 55s. Three floating cargoes of Rio have sold at 49s 6d to 51s. A cargo of Bahia for the Mediterranean at 48s 6d per cwt. The stock according to the latest return was, as compared with the previous season, deficient by 4,836 tons, but does not include the cargoes arrived here.

RICE.—Sales on the spot are limited, being chiefly restricted to white Bengal at 9s 3d to 11s 10½d for broken and low to good middling, and 13s 3d for fine. A cargo of new Rangoon off the coast is sold at 10s per cwt. ex ship. Soft grain descriptions remain dull.

IMPORTS and DELIVERIES of RICE, to June 17, with STOCKS on hand.

	1871.	1870.	1869.	1868.

SAGO.—427 bags were chiefly bought in at higher prices. A few lots fine small grain sold at 17s to 17s 6d per cwt.

TAPIOCA.—347 packages were only partly sold, including pearl at 18s 6d to 19s per cwt for good. The remainder bought in at higher rates. Business has been done in rough Singapore and Penang privately on higher terms.

BLACK PEPPER.—Sales have been effected by private contract at last week's rates to a further slight advance: Singapore, 5½d to 5⅞d; Penang, 5¾d to 5⅞d. At auction yesterday 952 bags of the former were bought in at 5¾d to 5⅞d for the sound portion. 245 bags Penang sold at 5½d to 5¾d. 60 bags Malabar sold at 6¼d for shot kind. The last sales of Penang afloat were at 5¾d to 5⅞d per lb.

WHITE PEPPER.—The market is about ¼d higher, and very firm. Yesterday, 8¾d to 9d per lb was paid for Singapore on the spot. Some business reported for arrival, of which particulars do not transpire.

OTHER SPICES.—At the sales on Wednesday 207 barrels Jamaica ginger went at full rates to some further advance for common sorts. Low to good ordinary, 37s to 47s; the remainder at 48s to 104s, according to quality. 200 cases Cochin sold without material change in value: ordinary rough, 40s, part scraped; rather small to fair, 56s to 63s; superior bold, 91s to 92s per cwt. 139 bales spurious cinnamon and 434 bags low coarse bark withdrawn. Pimento is steady. 1,037 bags by auction sold at 1¾d to 2¼. 5 cases mace and 17 cases nutmegs were withdrawn; also 8 cases Amboyna cloves.

SALTPETRE.—The moderate quantity disposed of has sold at steady prices. Bengal on the spot, refraction 10½, 26s 6d; 5¼, 27s 6d per cwt. No sales reported for arrival.

IMPORTS and DELIVERIES of SALTPETRE to June 17, with STOCKS on hand.

Delivery last week, 256 tons.

INDIGO.—There are now 10,320 chests declared for the sales commencing on the 10th proximo. Some demand prevails for France.

OTHER DRYSALTERY GOODS.—Cutch is quoted at 21s to 22s for the finest qualities. 287 boxes by auction sold chiefly at 20s 6d. Gambier quiet, but business has been done privately at 15s 10½d to 16s. Turmeric is in demand. Sales of Bengal on the spot and to arrive at 19s to 19s 3d, 1,160 bags by auction part sold: Bengal, 19s to 19s 6d; Madras, 18s to 21s 6d per cwt. Some inquiry prevails for cochineal.

SHELLAC.—The market is very firm, business having been done for France. 174 cases by auction sold as follows:—Second orange, 6l 7s 6d to 6l 10s; good, 6l 17s 6d; native Houry orange, 6l 2s 6d. A few hundred chests are reported sold for arrival.

METALS.—The markets have in several instances shown further improvement. Speculative transactions have led to an advance upon foreign lots. Prices are higher in Holland, and Straits likely to be used more freely by manufacturers here. The latter has sold at 131l to 131l 10s; Banca, 132l 10s. English is in moderate supply, and prices tending upward. A steady business has been done in copper. The latest sales include Walaroo and Burra at 76l to 76l 10s. Chili, &c., 66l 5s to 67l. English in demand. Lead has been rather quiet. English pig, 18l to 18l 5s; Spanish soft, 17l 10s. Spelter rather dearer. Several sales are reported. Silesian, 18l 5s to 18l 7s 6d; fine marks up to 18l 10s. Business done for arrival at 18l 10s to 18l 12s 6d. Scotch pig iron, 56s 6d per ton cash, is steady market.

JUTE.—The state of trade in Dundee being satisfactory, this market continues firm, and very full prices have been paid. Direct shipments to the former restrict transactions here, but several parcels have sold afloat, including some of the new crop, chiefly at prices ranging from 20l to 21l 15s per ton.

HEMP.—Manila is quiet, but held firmly. 1,643 bales by auction were nearly all bought in. A small quantity of good roping sold at 46l to 47l 10s. Privately the sales are limited. 250 bales Cocoanda withdrawn.

LINSEED.—The tone of the market is quiet, few sales being reported afloat. Calcutta quoted 61s 6d summer shipment. Black Sea, to arrive, 61s. Transactions on the spot are also limited. Calcutta, 63s; Bombay, about 64s per quarter.

OIL.—A cargo of Candia off the coast has sold at 43l for Hull; one at 45l 10s for Russia; one of Bari for the latter at 45l 15s; and one of Zante for the continent, c. f. and i. Small sales on the spot at 44l and 46l for Mogadore and Zante respectively. Fish oils quiet. Sperm, 82l per ton. Cocoa-nut remains nominally unchanged for Cochin. Ceylon is dull at 40l to 40l 10s. The market for palm has been firmer. Fine Lagos, 37l. Linseed steady, but rather quiet at 32l 10s spot and delivery during the last six months. English brown rape, after declining to 42l 10s in all positions, closes at 42l 15s to 43l. English refined, 44l 10s to 45l; foreign, 40l to 48l per ton, and fine quality scarce.

PETROLEUM dull, at 1s 6d on the spot, and 1s 6¼d per lb last four months.

TURPENTINE.—American, 39s 3d; French, for arrival, sold at 33s per cwt.

TALLOW.—The deliveries being still very large, prices of foreign have slightly receded, and the market is decidedly firmer. Petersburg, new, 43s 9d; Oct. to Dec., 45s 9d to 46s per cwt. The sales of Australian to-day will be only about 900 casks.

PARTICULARS of TALLOW—Monday, June 19, 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues flat. To-day's sales were chiefly West India, and prices went easier in some cases. Grainy sorts, 26s 6d to 28s 6d. Barbadoes, 30s to 33s. 275 bags Egyptian at 37s 6d to 40s for white crystallised. Sales of West India, 488 casks; for the week, 1,645 casks. A floating cargo of Porto Rico concrete sold yesterday at 23s 3d or 23s 6d for the United Kingdom.

COFFEE.—21 casks 10 barrels 186 bags Jamaica, and 261 casks 31 barrels and bags plantation Ceylon by auction sold upon about former terms. 457 bags native Ceylon at 55s for good ordinary. 836 bags Singapore part sold at 52s to 60s for ordinary to damaged. 4,582 bags foreign descriptions part sold on former terms. Pele washed Rio, 56s to 58s. Porto Rico bought in at 65s to 68s per cwt.

BLACK PEPPER.—On the spot Singapore sold at 5¾d to 5⅞d. Penang afloat, 5¾d per lb to a shade over.

DRYSALTERY GOODS.—833 bales Gambier were taken in at 16s Several parcels of cutch were taken in.

OILS.—300 casks, &c., cocoa-nut by auction chiefly sold: Ceylon, 40l; Sydney, 33l 10s to 36l 10s per ton. 38 casks palm bought in. Rum realised at 21s to 23l 10s per ton.

TALLOW.—Town rose to 44s. 917 casks Australian by auction all sold: beef, 37s to 42s 6d; mutton, 41s 6d to 43s per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Valencia oranges are depressed in price, but are expected to improve, owing to the scarcity of summer fruits. Sicily lemons scarce. Barcelona nuts sustain their value. More inquiry for Brazil; a cargo of the new crop daily expected. West India pine-apples and cocoa-nuts in demand, the former arriving in better condition.

DRY FRUIT.—A quiet week as far as actual business is concerned. Currants are steadily taken, and stocks gradually lessening at prices in favour of holders rather than to the advantage of buyers. Raisins without importance in value, but a steady business doing. In other descriptions of dry fruits trade only limited.

ENGLISH WOOL.—Very firm, but not much business doing.

COLONIAL WOOL.—The third series of colonial wool sales opened June 22 with a very large attendance of home and foreign buyers, competition was spirited, prices showed an average advance of from 5 to 10 per cent, chiefly perceptible on medium class and greasy. Arrivals to date—Sydney and Queensland, 57,412 bales; Port Phillip, 68,055; Adelaide, 8,932; Van Diemen's Land, 11,861; New Zealand, 41,612; Swan River, 1,614; Cape; Eastern, 20,815; Western, 2,814; Natal, 2,822; together, 26,011 bales—total, 220,797 bales. About 7,000 bales of the above have been forwarded direct from ship to Yorkshire and the continent.

FLAX.—Market firm.

HEMP.—Market steady for Russian. More business doing in Manila. 30l asked for Sorsogaw; a little less paid.

SEEDS.—There has been very little business done in seeds during the past week, and quotations are unaltered.

TOBACCO.—There have been no transactions of importance to note in North American tobacco during the past week. Buyers have operated only for their immediate requirements. Prices continue without alteration, holders being firm for parcels of imports. In other growths there has been a fair business done, and very high rates have been obtained for some descriptions.

LEATHER.—The trade for leather has not been very animated during the past week, and only a moderate amount of business was transacted at Leadenhall on Tuesday. There was a good demand for light English butts, light shoulders, light waxed sides, prime calf skins, and English horse hides, at late prices. The supply of fresh leather was small, with a limited attendance of buyers.

METALS.—There has been a very fair business doing all the week. Copper has been in considerable demand, and more or less business in most kinds has been reported daily. Tin is continued demand coupled with only moderate supplies. Spelter has become rather dearer. Lead is rather quiet. Tin plates in very good demand.

METROPOLITAN CATTLE MARKET.

MONDAY, June 19.—The total imports of foreign stock into London last week amounted to 14,869 head. In the corresponding week in 1870, we received 8,168; in 1869, 12,488; in 1868, 7,410; and in 1867, 10,779 head.

The cattle trade to-day has been characterised by an increased amount of firmness. A moderate supply of beasts has come to hand from our own grazing districts, in fair condition, and the arrivals from abroad have been good so far as number is concerned. The quality of the Spanish stock has been satisfactory. For all qualities the trade has been firm, and full prices have been realised. The best Scots and crosses have sold at 5s 8d per 8 lbs. With sheep the market has been well supplied. A full average business has been transacted, and 2d per 8lbs more money has been obtained. The best Downs and half-breds have been disposed of at 6s to 6s 2d per 8 lbs. Lambs have changed

Digitized by Google

hands quietly at from 6s to 7s per 8 lbs. For calves the demand has been to a moderate extent, at previous quotations. Pigs have been quiet, on former terms.

Lamb, 6s 0d to 8s 0d.

HOP MARKET.

FRIDAY, June 23.—The bine is still suffering from vermin, which will undoubtedly result in a blight, though the warm temperature and the heavy rains have decidedly enhanced the growth of the plant. This market has been rather less animated, but in all sales offected extreme prices have been obtained. Mid and East Kent, 56s to 147s; Weald of Kent, 56s to 90s; Sussex, 50s to 80s; Farnham and country, 75s to 112s; olds, 20s to 35s per cwt.

POTATO MARKETS.

FRIDAY, June 23.—There have been fair supplies of potatoes on sale. The trade has been quiet, at our quotations:—Flukes, old, 55s to 90s; Regents, 45s to 70s; Rocks, 45s to 60s; Jersey, new, 9s to 12s; Kidneys, 11s to 16s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 23.—Our market continues but lightly stocked, and anything of an useful character is generally taken up on arrival, if not held over for public sale. On the 30th inst. will be offered at auction here 1,500 bales Peru, 750 bales River Plate, and about 2,000 bales Egyptian, Georgian, Turkey, Angora, &c., wool.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 23.—There was a fair attendance at this market to-day, and wheat was in active demand at 1d to 2d over Friday's prices. Flour was in good request, without change in value. Barley, 4s 3d; beans, 34s 6d; peas, 41s to 41s 6d; oats, 2s 8d to 3s 11d; oatmeal, 30s to 31s.

WAKEFIELD, Friday, June 23.—The cold weather has given a firmer tone to the market, and the rates of last week are generally maintained. In spring corn there is no material change, another report says that sellers have the advantage.

The Gazette.

TUESDAY, June 20.

BANKRUPTS.

Francis William Bennett, Chalcot terrace, Regent's park, lieutenant in the royal navy.
John Edward Dyer, Clarendon villas, Hornsey, builder.
George Berrill, Northampton, builder.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

Il sera donné avis plus tard si le paiement pourra avoir lieu à Paris aussi.
LA DIRECTION GENERALE.
Florence, 10 Juin, 1871.

SOCIETE ITALIENNE POUR LES CHEMINS DE FER MERIDIONAUX.
Délibération de l'Assemblée générale ordinaire du 10 Juin, 1871.
On a constaté le dépot de 71,107 actions donnant droit à 2,100 votes et la présence de 154 Actionnaires représentant 63,262 actions donnant droit à 1,861 votes.
L'Assemblée, à l'unanimité:
1° Approuve le bilan de l'exercice de 1870 et le bilan de prévision de 1871;
2° Accorde au Conseil d'Administration la faculté de recevoir en dépot dans les Caisses sociales, les Obligations et les autres titres de la Société, avec les garanties et cautionnements qui seront établis par ce même Conseil;
3° Délibère d'augmenter le Capital social de la somme de trente millions, par la conversion en Actions de 500 lires chacune de trente millions des profits représentés par les Obligations et Inscriptions remises non distribuées et par les fonds mis en réserve extraordinaire jusqu'à la fin de 1869.
Ces Actions devraient participer aux portages des 20,000 déjà existantes, entre qui elles seront reparties à partir des mêmes conséquences, sauf l'approbation gouvernementale mentionnée par l'article 32 § 2 des Statuts sociaux.
Autorise en outre l'émission d'autant d'Obligations qu'il en faut pour réaliser le double du Capital social ci-dessus, et prend les nouvelles Actions;
4° Délibère:
Que, maintenant la disposé de l'article 63 des Statuts sociaux, la somme à attribuer au Conseil, et commençant par l'exercice 1871, ne doit être, en aucun cas, inférieure à 150 mille lires annuelles ensemble qui avait été établie pour le premier Conseil dans les dispositions transitoires des Statuts sociaux;
Puis à une très-grande majorité, par scrutin secret:
5° Pour remplacer huit sept conseillers sortant de charge; suivant l'art. 41 des Statuts, confirme comme membres du Conseil d'administration:
MM. le comte Pietro Bastogi—Francesco Guglielmo Giuseppe—Luigi Casimiro, Domenico Baldasseroni—Pietro Brambilla—le comm. ave. Tito Orsini—le comm. Giacomo Lecaita—le comm. Antonio Alfieri.
6° Elit réviseurs du budget:
MM. le chev. Giuseppe Balduccia—le chev. Giuseppe Pontana—le chev. Antonio Monghini.
Et suppléants:
MM. le chev. Felice Bianchini—le chev. prof. Angelo Vegni.

COMPANY OF THE RAILWAYS OF THE SOUTH OF AUSTRIA AND UPPER ITALY.
NOTICE TO SHAREHOLDERS.
The Company reproduces, with the changes of dates which events have rendered necessary, the advertisement of the General Meeting of Shareholders of the Railways of the South of Austria and Upper Italy.
Shareholders are informed that they are convoked in general meeting, ordinary and extraordinary, at Paris, on Wednesday, 12 th July next, Sale No. 4, Rue de la Victoire, 48, at Three o'clock in the afternoon.
As an ordinary meeting to receive report of the Board of Directors, to approve if found correct the accounts of the year 1870, and to fix the dividend.
And as an extraordinary meeting to ratify the agreement with the Company of the railways of Mantova-Modena, to lease the lines of Treviglio-Cremona-Brescia-Alessandria and Castagnole-Mortara, as also for participating in the concession of the circular railway at Verona, and the leasing of different small lines in Austria.
The general meeting, ordinary and extraordinary, will be composed of all shareholders possessing at least 40 shares, which must be deposited at the latest fourteen days before the meeting as hereafter:—
At Paris—At the Offices of the Company, Rue Laffite, No. 17.
At London—MM. N. M. de Rothschild and Sons:
At Vienna and Turin—At the Offices of the Company;
At Milan—M. C. F. Bellinzaghi.
At Geneva—MM. Lombard Odier and Co.;
At Herne—MM. Von Gudermann and Co.;
At Lyons—MM. P. Gaillne and Co. and Widow Merin, Pons, et Morin.
In exchange for the shares deposited, a certificate of deposit will be given, and also a card recording the right of admission to the meeting.
The shareholder entitled to take part in the deliberations of the general meeting, ordinary and extraordinary, may be represented by delegates possessing their authorisation, but having themselves the right to be present.
The authorisation in question must be written on the back of the certificate of deposit, and must be presented at the latest the 27th June, 1871.
As the resolutions that will be submitted to the general meeting, ordinary and extraordinary, can only be adopted by a meeting composed of at least the fifth of the capital, or 150,000 shares, shareholders are earnestly requested to attend or to have themselves represented.

THE BRITISH AND FOREIGN TRAMWAYS COMPANY (Limited).
Subscribed Capital £500,000, in 20,000 shares of £10 each.
DIRECTORS.
John M. Dunlop, Esq. Philip Rose, Esq.
H. G. Kricheau, Esq. William Sheldon, Esq.
L. Fiorentino, Esq. Lieut.-Colonel C. Napier Sturt, M.P.
William Morris, Esq.
BANKERS—Messrs Glyn, Mills, Currie, and Co.
SOLICITORS.
Messrs Baxter, Rose, Norton, and Co., 6 Victoria street, Westminster.
Messrs Ashurst, Morris, and Co., 6 Old Jewry.
SECRETARY (pro tem.)—H. Glenn.
OFFICES—No. 7 Lothbury, E.C.

This Company is prepared to entertain proposals for Tramways either in the United Kingdom or elsewhere. Address, with full particulars, to the Secretary (pro tem.), as above.

EXTRACTS FROM THE COMPANY'S PROSPECTUS.

This Company has been formed to carry out tramway enterprise in connection with the liberties which have been mainly instrumental in the introduction of Tramways into this country, and the principal cities on the continent, and who will therefore bring to the business great practical experience.

The intention of the Company is generally to invest its whole capital in the construction and development of the Tramways selected by it, and to dispose of the same from time to time when they are in a position to be of actual working, in which way the public will be protected against unsound and merely speculative projects.

The Company is entirely free from any engagements, direct or indirect, with contractors, and will therefore carry out such works as it may undertake on the most possible terms for cash.

The position of the founders of this Company will enable them to secure, on the most favourable terms, concessions from the principal cities on the continent and elsewhere open to Tramway enterprise.—By order of the Board,

J. B. GLENN, Secretary (pro tem.).

MR LEWIS AND SON, 113 Strand.—The Royal Lewisham systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as Taught for upwards of 30 years by Professor Lewis, the real inventor and first teacher of those world-renowned and only infallible systems, ensure perfection after a few easy and instructing lessons. Testimonials to this effect, the lessons may obtain the inventor's works for self-instruction at his only institution 113 Strand.

GRANVILLE COLLEGIATE School, East Cliff, Ramsgate.—The Rev. Dr Tandy has resigned for one of the parishes in Yorkshire kindly permitted to the Rev. John Gilmore, Rector of Trinity, Ramsgate, late Fellow of Trinity College, and of Minster, Priest in Ordinary to the Queen, etc. There are also vacancies in the Granville Preparatory School, which is in connection with, though distinct from, the above

CONSUMPTION.—DR LOCOCK'S WAFERS.—The father of the young lad who was cured sends the following:—Sir,—Having Temple street, Wolverhampton: "Dear Papa—The Dr Locock's wafers you sent me completely cured my chest. I do not think I could have lived had it not been for them. To Mr J. Narman, 39 Bonth street, Warwick. (Signed) Torres Norman." Dr Locock's wafers are sold by all druggists at 1s 1½d and 2s 9d per box.

HOLLOWAY'S OINTMENT AND PILLS.—Hearty and Healthy.—The experience of thousands, both at home and abroad, has amply demonstrated the power possessed by these drugs as purifying remedies of removing cutaneous eruptions, repelling ulcerations, and healing the sinuous and abscesses. These hidden evils frequently rob life of every comfort through the reluctance of the sufferer to expose his infirmity. Holloway's ointment possesses such objectionable publicity, by placing within the reach of all plain instructions for curing themselves without any danger, and without the necessity of mentioning their malady to anyone. The ointment and pills will thus cure bad legs, sores, wounds, and those blemishes which arise from the abuse of mercury, and from the use of other deleterious drugs.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the pneumatic resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufactory,

MR WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 6s 6d, 7s 6d, 10s, and 15s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

SPANISH FLY IS THE ACTING ingredient in ALEX. ROSS'S CANTHARIDES OIL, which speedily produces Whiskers and thickens Hair. 3s 6d, sent by post for 54 stamps.—ALEX. ROSS, 248 High Holborn, London, and all Chemists.

HAIR-CURLING FLUID, 248 HIGH Holborn, London.—ALEX. ROSS'S CURLING FLUID can be had of all Chemists. Half-a-crown only. It is applied. Sold at 3s 6d, sent free for 54 stamps. Had of all Chemists.

GREY HAIR, 248 HIGH HOLBORN, London.—ALEX. ROSS'S HAIR DYE produces a perfect colour in a few days. It is not a dye. It is permanent, and perfectly natural in effect. Price 3s 6d, sent by post for 54 stamps; and all Chemists.

HAIR DESTROYER.—248 HIGH Holborn, London.—ALEX ROSS'S DEPILATORY removes superfluous hair from the face, neck, and arms, without effect to the skin Price 3s 6d, sent for 54 stamps. Had of all Chemists.

HAIR COLOUR WASH.—By changing the hues with this beautifully perfumed Wash, in two days the hair assumes its original colour, and remains so by an occasional using. 3s 6d, sent for stamps. ALEX. ROSS, 248 High Holborn, London, and all Chemists.

TO SHIPPERS AND EXPORTERS.

ABRIDGED PROSPECTUS.

This Company is being formed with the object, firstly, of working and extending the cultivation of the Beechlands Coffee Estate, situate in the district of Coorg, in the East Indies, and of acquiring the Government grant and the buildings and plant upon the estate: and, secondly, of acquiring, when opportunity offers, and cultivating other Estates in the same or neighbouring districts of Coorg, as the second issue being reserved for that purpose.

The coffee crop for the last year, now ad-at to this country, consists of about 48 tons. The crop of last year was about 60 tons, and the consignments to this country have reached in March and June, and in the generally sup-rior quality, about 8 per cent. above the average price of Coorg coffee.

An estimate for the current year, made upon the basis of the figures and the expenditure of the last year, shows fully 5 per cent. available for dividend next spring, and the dividend will considerably increase from year to year, and is likely soon to amount to 20 or 25 per cent. on the capital in about four or five years, when the whole of the suitable land can be fully cultivated.

No promotion money will be paid in the formation of the Company, and if no allotment be made, the money deposited on application will be returned in full.

A copy of the memo a dum and articles of association may be seen at the Offices of the Company's solicitors, of whom, as well as of the Bankers and at the Temporary Offices, prospectuses and forms of applicat on for shares m y be obtained.

NOTICE.—The List of Applications for shares will be CLOSED on Monday, the 3rd July, for London, and on Tuesday, the 4th, for the Country.

Agriculture.

POULTRY BREEDING.

THAT the rural classes who occupy land derive far less advantage from keeping and rearing poultry than they might easily obtain by more care and attention to the subject is notorious. Still of late years the efforts of prize poultry rearers have done much, both in diffusing good breeds, and in showing the benefit of generous feeding. As regards the supply of eggs, various kinds of food, and a sufficiency of food, are the main elements of success. We have also found that in order to obtain large numbers of eggs in the autumn and winter, fowls of various breeds should be kept together, and that as many early pullets as possible should be reared with a special view to the winter's supply of eggs. This of course precludes the improvement of any particular pure breed, which must be left to those who seek to render their poultry yards profitable by the perfection of the birds themselves, and not as layers of eggs. At a recent meeting of the Midland Farmers' Club, the Rev. A. G. Brooke read a good paper on "the Breeding and Management of Poultry," which contains a large fund of information, from which a few propositions of general application may be gathered. Mr Brooke seems, like most exhibitors, to prefer a pure breed of some sort. He said—"As regarded starting with an entirely fresh strain, it would answer their purpose best to keep dark Brahmas.....The dark Brahmas were very hardy, extremely prolific, and good mothers." Pullets hatched in April will lay during the following winter, and with plenty of food the chickens soon become fit for market, "and by no means coarse for the table." Mr Brooke had been very successful with this breed, having "sold most of his birds at the rate of 50s a cockerel and two pullets." He recommended farmers to keep nothing but Brahmas. Possibly this may be deemed a little of the hobby-riding; but we believe that if a farmer would always secure good Brahma cocks, he might usefully keep all or any varieties of hens. We have found Dorkings, Game, and Spanish hens very good for crossing with the dark Brahma cock.

More progress has been made in increasing the weight of ducks and geese than that of fowls. Thus, at the late Birmingham Show, the first prize couple of Aylesbury ducks weighed over 18 lbs; the Rouens, 19 lbs 4 ozs; while geese weighed 58 lbs and 56 lbs the couple. It may be remarked, however, that for many purposes smaller fowls are preferred to the very large sorts. Turkeys are also brought to great weights, the old prize hens reaching 35 lbs and 34 lbs, and the young ones 31 lbs and 29 lbs.

But whatever breed of poultry be used, "they must be careful to infuse fresh blood into them every spring."

The poultry houses must be well ventilated, light, and free from draught, and above all kept clean. We may add the caution that in a country well stocked with poultry, the outlets should be carefully secured at night. And Mr Brooke tells us—"In winter, eight o'clock is almost early enough for fowls to be let out of their house, but before so doing it is a good plan to give them a liberal supply of soft food (warm if possible) as it will teach them to become attached to their abode, and the setting hens will reap the benefit of a regular meal." Mr Wise was a large fowl keeper. He gave them plenty of hot food—such as potatoes, Indian meal, and oats—fed them regularly and well, and found them most profitable. Mr Lort had kept Malays on poor land where he succeeded with no other kind. Mr Masfen strongly supported the advice of the lecturer to introduce a good male bird every year.

CHEESE FACTORIES.

THE success which has attended the cheese factories of America has at length drawn the attention of English farmers to the subject, and it well deserves their attention.

Mr Coleman (Derbyshire) lately dealt with the subject of "English Cheese Factories" at the London Farmers' Club. In Derbyshire such a factory has been established. The price paid to the farmer sending in milk has been 6½d per gallon (of 10 lbs); he has the whey besides after the cream has been taken off for making butter, and any surplus after paying the working expenses is divided *pro rata* with the farmers who supply the milk. To accomplish this a guarantee fund of 4,000*l* was subscribed on the establishment of the factory. A manager, with his implements, was obtained from America, and the concern has worked smoothly. A description of the plan of the factory and the methods of working would prove too long for our columns. It may be mentioned that milk, if cooled before starting, may be sent five miles to the factory in the hottest weather.

The following is Mr Coleman's estimate of the savings effected by the factory system:—"I will take a factory of 750 cows, which is the best number, as far as we at present can judge, to work up together. Now suppose this number made up of 90 dairies of 25 cows each (which is above the average in Derbyshire), one skilled dairy-maid is employed in each dairy—so that 25 are so engaged, or the farmer's wife takes the place; and at any rate it is proper to value the labour of the wife quite as high as that of the hired servant, and therefore the calculation remains the same:—

30 FARM DAIRIES OF 25 COWS EACH.	£	s	d
30 dairy-maids; wages, 15*l* per annum	450	0	0
Board of ditto, 20*l* per annum	600	0	0
	1,050	0	0

FACTORY OF 750 COWS.	£	s	d
1 manager	150	0	0
2 men, 40 weeks, at 1*l* per week	80	0	0
2 lads, 40 weeks, at 12s per week	48	0	0
Extra help	22	0	0
	300	0	0
Gain by factory	750	0	0
	1,050	0	0

This calculation gives 1*l* per cow saved in labour only. Now, I have asked many of our Derbyshire farmers what their cheese, with all hired labour, costs them to make, and their estimate was from 7*s* to 8*s* per cwt, and if we reckon 4 cwt per cow as a good average of cheese for one season, this puts the labour at 30*s* per cow, whereas in the factory it is less than 10*s*." This is a very important element. Then the factory-made cheese commands a better price in the market by about 4*s* per cwt than the average of farm dairies. Some of the farmers join together in sending their milk to the factory, thereby lessening the cost to each. Should the factory system become general, it will induce many farmers who have declined to keep dairy herds on account of the trouble the dairies give in the house, and keep only grazing stock where notoriously the dairy stock would pay better. Eventually there can be no doubt that the local factors, whose trade must be much interfered with by factories, will themselves establish them, and buy milk instead of cheese from the farmers. The mixing of milk of different qualities that takes place in a cheese factory seems to be one cause of the superiority of factory-made cheese.

BRAN AS FOOD FOR CATTLE.

IN feeding cattle there are two requisites on which profit altogether depends. First, judgment in buying or breeding the store animals; secondly, economy in supplying them with feeding provender.

The following statement by the *Elgin Courant* of the proceedings of a Scotch grazier indicates that Mr Mackessack possesses both requisites:—"A feat performed by Mr Mackessack (of Ardiere) in Forres market, recently, is well worthy of special attention. In less than an hour he sold from his own farms 132 fat cattle, at an average of nearly 40*l* a-head, the whole amount realised being 5,125*l* 10*s*. This is an amount of business in cattle which, we venture to say, was never transacted in the North in so short a space of time. Only a few of these 132 animals were bred by Mr Mackessack himself, the rest having been all bought in the local markets, and from farmers in the district. They have been in Mr Mackessack's possession, on an average, barely twelve months, and they have paid very handsomely for their feeding during that time. It is generally said that they have nearly doubled the prices they were bought at, and we have reason to believe this is not far from the truth. Mr Mackessack's winter feeding is straw, turnips, oilcake, and bran. He has for years had great faith in bran as a feeding stuff, and this year he tried an experiment with it that is worth mentioning. He bought ten cattle about 14 months ago, at 18*l* each, and for the last twelve months they had got about half a stone of bran each every day, except in the months of May and June, when they were out on grass. In July they were taken into the court and got nothing but hay, bran, and water, until the end of September. They then began to get turnips and about three pounds of oilcake each a day, with a very little bruised oats, the quantity of bran given along with the other feeding stuffs for the last two months being lessened. These ten cattle were sold at 44*l* a-head."

TEACHING BY WARNINGS.

SOME time since Lord Warwick became very irate with the Warwickshire Chamber of Agriculture, on account of a somewhat free discussion of the Game Laws which took place at a meeting of the Chamber at Coventry, and withdrew, or threatened to withdraw, his name and countenance from the Chamber. Whether his lordship proceeded to the extremity of withdrawal we know not; but whether he did or no the Chamber still flourishes, and the feeling against the Game Laws amongst its farmer members goes on intensifying.

However, the following paragraph from the *Warwick Advertiser* fully explains the source of Lord Warwick's irritation when the code protecting his sacred game is freely handled. Whether Lord Warwick, like a fellow game-

Digitized by Google

preserver, has *understated* the actual results of his Christmas butcheries we have no information; but surely such lists must operate as a warning not only to farmers to avoid game-preserved estates, but also to the public not much longer to permit such flagrant abuses of proprietary rights. The names of his "brother butchers" are given in the paragraph:—"During the week the Earl of Warwick has entertained a shooting party at the Castle, his guests being Earl Somers, the Hon. Colonel Scott, Captain Boultby, Captain Dormer, J. W. R. Repton, Esq., and H. S. Lucy, Esq. The shooting, which commenced on Tuesday and closed yesterday evening, afforded abundant evidence of the success which has attended the efforts of Mr Watts, Lord Warwick's gamekeeper, to stock the noble lord's preserves. During the three days' sport there were bagged 1,097 pheasants, 371 hares, 174 rabbits, 6 partridges, 5 woodcocks, and 2 snipes—the grand total of 'fur and feathers' being 1,655." It would form a very useful statistical inquiry to ascertain how many police constables have been employed during the past year, and for how many hours, in watching this "head of game." Also how many persons have been convicted for game offences on Lord Warwick's estate? and what has been the cost of their maintenance in jail? and what has been the cost to the parochial rates for the maintenance of their wives and children during the fathers' incarceration? Will the chief constable for Warwickshire and the Poor Law auditor afford the information? And in addendum to the above, the following statement made by Mr Snell, a farmer, at the Callington Agricultural Society, may operate as a warning to game-preserving M.P.'s. He said:—"A well-known Member of Parliament for a Western county, notwithstanding all that had been said about the Game Laws, thought proper to sell the right of sporting over certain farms for a few paltry sovereigns, and when the tenant's son shot in one occasion walking over one of these farms, with his dog at his heels, he was accosted by a strange man, was accused of trespassing, although he protested against it, was summoned before the magistrates, and actually fined. Now, can any man say it is right that a landlord should possess such a right as that? The farmers will go to any fair length to give their landlords sport—it is our pride and pleasure to do so; but is it right that the landlord shall have the power of making any coming adventurer superior to the tenant? Public opinion is not strong enough to reach men of that sort. This man is a Member of Parliament, but public opinion does not influence him; and if that is the case, how can you expect that it will influence stay-at-home squires? The fact is that the Legislature must step in between the weak and the strong."

Though many farmers profess to believe that if hares and rabbits are given up to the occupying tenants the rest of the Game Laws may go on as at present, it will be found, the moment the subject begins to be seriously debated in Parliament, that any such sham-reform is absolutely impracticable. To the public morality the preservation of pheasants is at least as noxious as the preservation of hares or rabbits. The system is so rotten that when touched it must be abrogated altogether.

HOW A LANDOWNER MAY IMPROVE.

THE following account of the improvement by the late Lord Walsingham of a tract of poor and thin land ought to convey a lesson to many owners of light land properties, who want nothing but some slight knowledge of their own business—landowning—to be able to follow such a rational example. Probably no such improvement will be generally made until the law and habit of entail have been abrogated. Even landowners who have the necessary funds and knowledge care not to devote their energies (where any) to the improvement of a property all of which must go to one child, and he, perchance, the least worthy of the family. The account is from the *Mark Lane Express*:—"At the time Lord Walsingham succeeded to the Merton property, a considerable portion, about 4,800 acres, was held in large rabbit-warren farms, one consisting of as much as 2,100 acres. His Lordship's first object was to get rid of the warren as the leases fell out, and that was effected in the course of a few years. This step necessitated the building of farm-houses and premises, and the sub-division of the land; and the holdings here now range from about 600 to 700 acres, while pains have been taken of late to reduce the rabbits. The main improvement necessary was to strengthen the staple of the sandy soil by marling or claying, for which there existed every facility. This proceeded slowly in the hands of the tenants, and large tracts were consequently taken in hand by Lord Walsingham himself, who at one time occupied in all about 3,500 acres. Large portions have now been marled or clayed at the rate of from 80 to 100 loads per acre, or, in some instances, much more, and the arable lands divided by fences. Enough already has been effected to show that, by liberal but not necessarily very expensive cultivation and careful farming, good crops may be grown on land where formerly the produce was but little more than rabbits." Does not this statement say to each sluggish landowner—"Go thou and do likewise?"

COMMERCIAL AND MISCELLANEOUS NEWS.

The report of the American whale fishery for 1870, like its predecessors for several years, is a gloomy one. It is said to have been a year of poor returns for those engaged in the fishery, while prices, which at the opening of the year were unremunerative, have steadily declined, closing at the lowest quotations of any year since 1861. Sperm oil has had but limited consumption. Whale oil has been affected by the introduction of cotton-seed oil, and both have felt the effects of a closed foreign market caused by the European war. This also had a depressing influence on whalebone, of which America has been a large exporter. The poor results and low prices have deterred many from fitting out their ships again, and the fleet at home ports on New Year's day was larger than in any former year. The fleet has also declined in numbers, and the future discloses only a gloomy prospect. Fully one-fourth of the smaller number of whaling vessels are now at home idle. On January 1, 1870, there were in the whaling fleet 321 vessels with 73,137 tonnage, which number on January 1, 1871, was reduced to 288 vessels with 69,372 tonnage. The decrease is 33 vessels with 3,765 tons. In the Atlantic fishery the fleet is now reduced below 100 vessels, and the low prices will deter merchants from refitting this year the arriving vessels, the consequence being that the fleet will be still more reduced. There were 48 vessels in the North Pacific fleet last year. One whaler visited the Ochotsk Sea and one Bristol Bay. Coast whaling seems to have been abandoned. In the operations of the Pacific fleet a new feature is reported in the landing of bone at San Francisco, and its shipment across the continent by railway to New Bedford, Massachusetts, the cost being 2c per lb currency. At present the distribution of the fleet is about as follows:—Atlantic, 51 vessels; Indian Ocean, 11; Pacific Ocean, 65, principally sperm whaling; Hudson's Bay, 5; North Pacific, 51 (of the latter those in Behring Sea outward and homeward bound). In 1871 the North Pacific fleet, it is said, will comprise about 40 ships of all nationalities. The total number of vessels now at sea is 213, leaving 75 now at home in port. During 1870 the imports into the United States were 55,183 barrels sperm and 72,691 barrels whale oil, and 708,365 lbs of whalebone, against an importation of 1869 of 47,926 barrels sperm and 85,011 barrels of whale oil, and 600,603 lbs of bone. In 1870 the United States exported 22,773 barrels of sperm oil, 9,872 barrels whale oil, and 347,918 lbs of bone, compared with exports during 1869 of 17,339 barrels of sperm oil, 8,843 barrels whale oil, and 311,605 lbs of bone. In 1870 the home consumption was 28,812 barrels of sperm oil, 64,812 barrels of whale oil, and 226,947 lbs of bone, against a consumption in 1869 of 17,239 barrels sperm oil, 56,256 barrels whale oil, and 197,098 lbs of bone. On January 1, 1871, the stock on hand was 28,659 barrels sperm oil, 36,660 barrels whale oil, and 400,000 lbs of bone. For 1871 the imports are estimated at 50,000 barrels sperm oil, 70,000 barrels whale oil, and 650,000 lbs of bone. The heaviest American tonnage ever engaged in the whale fishery was in 1853, at the close of which year the total was 208,399 tons; on January 1, 1858, it was 203,161 tons, since which time there has been a steady and rapid decline, there now being only 69,372 tons.

The *London and China Telegraph* states that the Great Northern Extension Telegraph Company have chartered the steamer Africa, of about 2,500 tons, for the purpose of carrying the portion of the submarine cable to be laid from Vladiwastok (Possiette) to Nagasaki, while the Great Northern, expected from China in a fortnight, will take on board the section to connect Nagasaki and Shanghai, about 1,200 miles of cable in all. It is expected that these vessels will be despatched about the 15th April, via Suez Canal, calling at Singapore and Hongkong *en route*. Under favourable circumstances the cable will be laid down and communication established about the 15th July. As already announced, the land lines through Russia to Vladiwastok are now in operation, thus affording a direct chain of communication from London to Shanghai. This company are also laying a cable from Shanghai to Hongkong, which will probably be completed on the turn of the monsoon in April. The Telegraph Construction Company, under contract with the China Submarine Company, have despatched vessels to connect Singapore and Hongkong, and this line will, barring accidents, be completed in April. The cable to connect Australia and Java will also be despatched in a few months. The project, started in Hongkong, for connecting Siam, Saigon, Manilla, and Hongkong, the land lines for which were last year despatched to Singapore, is, we believe, likely to be carried out, either on its original footing, or by an amalgamation with another company.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of February, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresponding Week in 1870.
	Adults and Children	Adults.	Children under 16		
West district	5,929	9,873	7,994	23,871	20,372
North district	6,825	13,896	11,281	32,002	34,034

THE WEST POLBREEN TIN MINING COMPANY.

SITUATED IN THE PARISH OF ST AGNES, CORNWALL.

IN 2,500 *SHARES OF* £3 *EACH,*

CONDUCTED ON THE COST-BOOK SYSTEM.

BANKERS—Alliance Bank, London. | MANAGER—Capt. John Nancarrow, Camborne, Cornwall.

OFFICES—11 ROYAL EXCHANGE, LONDON, E.C.

The progressive and now almost perfect success of the operations at the Polbreen Tin Mine have had the effect of attracting attention to an adjoining sett that had long enjoyed a reputation in the St Agnes district for containing within its bounds exceedingly rich stores of Tin ore, which had never been more than very slightly developed. The Polbreen Mine, as is now well known, is on the eve of declaring its First Dividend after barely twelve months' working, and has kept up the established fame of the vicinity for the quality as well as the quantity of its mineral treasures. The quality, indeed, of the Tin now in hand at Polbreen forms an important element in the amount of profit that will be settled by the shareholders, for it has been found to sample equal to any "stuff" raised within the parish of St Agnes, renowned as it is above all others in the county of Cornwall for the excellence of its ore.

Another remarkable peculiarity of the Polbreen Mine has been the facility with which every operation has been carried to the desired result. There has been no difficulty from hard ground; there has been no incursment from water; the lodes are found to run in a regular direction, causing no anxiety as to the possibility of their being thoroughly and continuously worked when their track is once discovered. All these advantages and facilities are very certain to extend into the neighbouring property, which positively touches Polbreen on the western side.

West Polbreen, then, is situated exactly to the west of its namesake, one boundary line separating the two for a considerable distance. This alone is a sure guarantee for the wealth of the westernmost of the pair, as the tin-bearing lodes in the St Agnes district run, almost without exception, from east to west—run, in fact, seawards. As West Polbreen lies between the western cliffs and the great majority of the mines in the district, there is scarcely a lode in the parish that may not be expected to contribute to the wealth of this sett as far as its area extends for their reception—which area, let it be remembered, is full double that of Polbreen.

The highly promising geological formation of the ground included in the West Polbreen boundary has been fully reported on by Capt. John Nancarrow and Capt. James Rowe, and the favoured position of the sett will be seen also by reference to the map that accompanies the prospectus. Wheal Unit and West Wheal Cobb lie immediately to the north, while the Polbreen group, Trevaunance, Wheal Pio, Wheal Kitty, Penhalls, and other celebrated mines, are in close contiguity towards the south-east.

There is no doubt, therefore, that West Polbreen lies in the very richest part of the St Agnes district. As noted on the map, the past profits yielded by Polbreen itself to the workers of days gone-by have been estimated at no less than £40,000, Trevaunance a little plot of three and a half acres, in private hands, has made the magnificent return of £200,000, and still furnishes us 1 cwts to its owners. The sums cleared from the other mines are likewise to be reckoned by thousands of pounds. Wheal Kitty figures, according to the best data at command, for £50,000; Penhalls for £35,000; Bine Hills, £30,000; Wheal Unit, £30,000; Wheal Cobb, £20,000; West Coates, £17,000; Wheal Friendly, £16,000; and Wheal Pio, £4,000. With one or two exceptions these mines are still being worked, and giving income to their owners or dividends to their companies. Penhalls, for instance, paid £4,500 in dividends last year, against £2,875 in 1869; and Wheal Kitty £4,294, against £2,877 in the preceding year. But West Polbreen is almost wholly in "virgin ground"—a repository of mineral not yet rifled by pick or blast.

Just sufficient has been done on West Polbreen by former holders thoroughly to test its productiveness; but the fortunes that have been realised in so many instances from certain mines have not been won to that fashion. The days for the mere scratching of the crust have passed away; and greater returns than ever are now obtained by the union of capital and perseverance with the most practical and experienced engineering skill that can be found.

Former holders of West Polbreen actually met with a good quantity of Tin in simply carrying to surface the stuff dislodged while working a way from the shaft to the adit. The simplicity of this operation is a pledge for the profits that await those who will apply to a sett of such magnificent promise the men, machinery, and science that can be commanded at the present day.

There are no vast expenses to be incurred at West Polbreen. There is no heavy outlay to face in clearing away the rubbish and wreck of former days—no pumping engine required to get rid of a lake of water accumulated from neglect and abandonment.

Six lodes are known to exist in West Polbreen, two at least of which run from the neighbouring Polbreen mine, where they are being worked at this moment with great profit. One of these will, it is thought, be reached with not more than three months' labour.

These considerations fully justify the recommendatory opinions of Captain J. Nancarrow and Captain J. Rowe. The sett is nearly all in virgin ground, and it seems difficult, as the latter states, to conceive how such property could have remained unwrought up to this present time.

Within a very short distance of West Polbreen, Tin was being raised during the past year from an open working, that looked like a mere gravel-pit to the eyes of the passer-by inexperienced in mining matters. Almost as easily, but with, it is believed, unexampled productiveness, will West Polbreen yield up her stores.

Never was there a time when those stores would have returned such excellent profits to the Mining Adventurer as during the year of 1871. The price of Tin is now £70 per ton higher than the average of the last ten years; £13 per ton above the average of the dearest of those years; and £35 per ton higher than the average of the cheapest. Or, in other words, the shareholders in West Polbreen may get £35 per ton for their Tin, whilst, when the former workers ceased operations, the question for their produce was very possibly but £30 per ton. Nor is the present price due to exceptional causes. The world's consumption of Tin treads hard on the supply. Neither commercial nor political influences have had power to check the advance. The United States of America produce no Tin; and in their ever-increasing population and daily-augmenting wealth, England has a customer for this commodity that will long keep the price steadily remunerative. But, as shown above, the cost of raising the ore from West Polbreen will be a singularly moderate; and the profit to the shareholders on the market price must, as a consequence, be singularly good. When brought to dividend some months hence, West Polbreen will stand amongst the highest on the list, with her shares necessarily advanced at least 100 per cent. in value. The possible rise in the quotations for shares in such a mine is something to be wondered at. The money actually called up on a sett in an adjoining parish has been 9s 6d only, and the shares are now selling at £11.

At least of the sett for twenty-seven years has been secured, and will become the property of the shareholders.

The West Polbreen Company is constituted on the Cost-Book principle, which gives the shareholders perfect control over the expenditure, by necessitating an audit of the accounts at short intervals, fixed by the Stannaries Act of 1869, and is a safeguard against the mine being run into debt under any pretence whatever.

The shares, 2,500 in number, will be issued at £3 per share, so as at once and for all to raise a capital amply sufficient for every outlay that can be requisite until the mine pays its own expenses, and is brought to dividend.

Polbreen, the mine immediately contiguous, as we the same management as West Polbreen, will reach the position of paying its expenses and settling the period for the first dividend within the next two months; and as the lodes run from one to the other, the shares of West Polbreen will at once assume a substantial value, and spring to a quotation such as mines less fortunately circumstanced are years in attaining.

Application for shares should be made to Mr Y. CHRISTIAN,
11 Royal Exchange, London, E.C.

INVESTOR'S MONTHLY MANUAL.

OFFICE, 340 STRAND.

TO ADVERTISERS.

The INVESTOR'S MONTHLY MANUAL will be found a valuable medium for advertising Estates, Sales by Auction, Railway Debentures, Limited Liability Companies, and all other investments and transfers of property. It is circulated amongst the commercial world, is subscribed to by all monied classes, and is used as a work of constant reference during the month. Price, 8d and 8½d.

Scale of Price for Advertisements.

	£ s.
Per page	14 14
— half-page	7 10
— quarter-page	4 0
— column	5 0
— line (eight words to a line)	*Ninepence.*
Six lines or under	*Five Shillings.*

Advertisements for next month's number must be sent on or before April 27 to the office, 340 Strand, W.C.

NOTICE TO CORRESPONDENTS.

It is quite out of our power to reply personally to Correspondents asking for information or opinions as to the merits of particular investments.

FINANCIAL RECORD OF THE MONTH.

The war between France and Prussia has become a matter of history, the terms of peace which Count Bismarck dictated in Versailles having been definitely accepted at Bordeaux. The immediate difficulties of the political situation are—the internal Government of France, and the payment of the war indemnity; but according to the view of affairs taken in the monetary world, the arrival of a definite peace has thrown such matters partially into the shade, and a healthy and wide-spread rise in Stock Exchange values has ensued. At the same time, the tendency to embark in home enterprise has comparatively become stronger. Home Railway Stocks, which were flat during February, have been specially buoyant in March, and in Foreign Stocks and Miscellaneous Securities there have been satisfactory movements to record. These changes have not been unaccompanied by a rise in the value of money, though it is recognised that prospective more than the immediate demands have caused this small advance. The Bank is still in a very strong position, and during the past fortnight this strength has again increased; but there have been some large loans and new capital issues for which money has yet to be provided, and the signs are unmistakable of an increased business activity. The *fears* expressed in February of a great derangement of the Money Market have, however, been mostly dispelled. The peaceful settlement of the Eastern Question has added another assurance to the financial world that its operations will be left undisturbed by further political convulsions. In short, the month may be characterised as one of progress, the financial prospect being decidedly more unclouded; and although latterly the news from Paris has been disappointing, its effect in these markets, except in a few instances of stocks in which the French are known to be large holders, has been trifling when compared with the advance which prices generally have sustained during the period under consideration. We are learning in a great measure to do without Paris.

The political events of the month have been—the arrangement of the details of peace (which include the cession of Alsace, part of Lorraine, Metz, and 200,000,000*l* of money); the military occupation of a portion of Paris by the Germans for two days, until the ratifications were received from the Bordeaux Assembly; the gradual withdrawal of the German hosts; the serious insurrectionary movements and massacres in Paris, involving the flight of Government representatives to Versailles; and the landing of the ex-Emperor Napoleon in England. The Conference held in London on the Black Sea question has terminated its labours, and Russia will be permitted to maintain ships of war in the Black Sea. In the Commons there has been a lengthy debate upon the Military Reorganisation Bill, and the Government proposition to abolish the purchase system. Latterly, the news that the revolution in Paris was spreading to other large towns has had its influx upon prices of French Securities.

The movements in the Money Market are indicated by the following figures:—

Bank of England—Last month, Feb. 22, 1871:—	
Bullion	£21,861,798
Deposits, public and private	28,318,972
Loans of all kinds	33,176,157
Rate of discount	2½ per cent.
Bank of England—This month, March 29, 1871:—	
Bullion	£22,358,064
Deposits, public and private	31,028,145
Loans of all kinds	35,893,885
Rate of discount	3 per cent.
Bank of France—Figures not forthcoming.	
Rate of discount	6 per cent.

The new capital commitments of March have been 20,079,300*l*. of which 7,329,300 were subscribed entirely in Great Britain, and 12,750,000*l* partly here and partly on the continent. The actual money payments of the month upon these and previous subscriptions have been 6,343,505*l*, of which £2,293,505 were provided by Great Britain alone, and 4,050,000*l* partly on the continent. During the first three months of 1871 the subscriptions effected solely in Great Britain have been 13,513,200*l* (against 11,300,200*l* in the same months of 1870), and those in which foreign countries participated have been 20,250,000*l* (against 12,500,000*l* in 1870). The money payments during these three months have been 6,697,142*l* by Great Britain alone (against 8,359,360*l* in the same months of 1870), and 16,979,500*l* (against 13,207,432*l*) provided partly on the continent. It would appear from these details that the subscriptions of March have been considerable, while the actual payments on account have not been above the average. Our money commitments have, therefore, increased. The principal issue of the month has been the Russian loan for 12,000,000*l*, which proved a success, although at one time its introduction was protested against by certain members of the Stock Exchange. The Brazilian loan appeared at the end of February. In addition, the Great Western has received subscriptions for 1,000,000*l* preference stock; New South Wales has brought out another debenture loan; and the Atlantic and Great Western, the Grand Trunk, the Dutch-Indian, and the Devon and Somerset Railway Companies have made new issues. There have also been a few new companies of minor importance. In the above statement we have not included the United States 5 per Cent. Funded loan, which is merely issued in substitution of existing "5-20 Bonds" of 1862-64-65.

Consols, which were depressed during February owing to the impression prevailing that money would become dearer, have been more buoyant in March, being influenced favourably by the termination of the war, and by the recent plentitude of money which for the time is largely invested in Consols. The closing price last month was recorded at 92; this month at 92¼; extreme fluctuations, 91⅞ to 93.

March has proved fairly profitable to the holder of Foreign Stocks, notwithstanding some considerable new issues, coupled with the anticipation of additional demands hereafter. United States 5-20 bonds have reached their redeemable value, and the Government is making a first issue of over 40,000,000*l* to effect their replacement next May. The 5-20 bonds of 1867, which have another sixteen months to run, have also improved. Russian and Brazilian stocks have maintained their position, although the new loans of these Governments were effected at comparatively cheaper rates. North German stocks appear now to have obtained almost a maximum price. French 6 per Cents. have considerably advanced during the period under consideration; but latterly prices are lower, French credit being compromised by the serious insurrection in Paris. The 3 per Cent. *Rentes* have, however, been uniformly depressed, yielding, as they continue to do, a lower rate of interest to the buyer. Notwithstanding a slight hitch in the payment of the coupons on the Turkish 1858 loan at the commencement of the month, there has been some improvement in price of most Turkish securities, the April dividends being looked forward to with some certainty. There have been rumours of fresh

Digitized by Google

borrowings on the part of Egypt, but the stocks have not in consequence receded in price. Italian 5 per Cents. have alone fallen in value. Colonial Debentures have not, however, been buoyant, and Indian Stocks and Guarantees have been somewhat depressed. The following indicate the fluctuations of the month in the leading British-Colonial and Foreign Stocks:—

	Closed last month.		Closed this month.
American (United States) 5-20 bonds	91½	.....	92½
Canadian 6 per cent.	105½	.....	105½
Egyptian 7 per cent. 1864	91	.....	91
French 3 per cents.	51.50	.....	50½

Mexican	14	.....	14⅞
North German 5 per cent.	100¼	.....	101⅜
Peruvian 5 per cent.	91	.....	91½
Portuguese 3 per cent.	32½	.....	32⅜
Russian 5 per cent., 1862	86	.....	86½
Spanish 3 per cents., 1867	30½	.....	30⅜
Turkish 6 per cent., 1862	62⅜	.....	63
— 5 per cent., 1865	41⅜	.....	43¼
Venezuela 6 per cent., 1864	17¼	.....	17½
Victoria 6 per cent. Railway Loan	112½	.....	112⅝

There has been a considerable amount of business transacted in Home Railway Securities, and in many instances the original stocks have met with especial favour. The contrast of prices given below appears in cases unfavourable, owing to the fact of nearly the whole of the stocks being now dealt in without the dividend; but Caledonian alone shows any tangible depression, and many stocks, such as the Great Western, "Brighton," South-Eastern, South-Eastern Deferred, Lancashire and Yorkshire, Great Eastern, Manchester and Sheffield, and London, Chatham, and Dover have improved in market price to a large extent. "North-Western," Metropolitan, North British, and North-Eastern stocks have advanced to a less extent. It seems a matter somewhat overlooked by investors, that upon last year's dividend North-Eastern stock returns nearly 5½ per cent. to the buyer at present prices, and that the traffic continues to increase at the rate of 10 per cent. The prices of Great Northern ordinary stocks have not varied considerably. Caledonian ordinary had advanced 2¾ per cent. at one period, but relapsed upon the announcement of a dividend only ¼ per cent. above that of the corresponding period. Railway traffic returns have exhibited more than ordinary expansion, and elasticity has been very general throughout the kingdom. There has also been a remarkable increase in receipts upon Canadian lines, partly attributable to the better understanding arrived at with United States roads; and market quotations have risen in consequence. Indian traffic has been dull, and the values of the guaranteed stocks flat. There is little calling for comment with respect to Foreign Railway Companies. Amongst American, however, Atlantic and Great Western securities have attained much higher prices, as the official reorganisation scheme is likely to become law. The variations of the past month in the prices of Railway Stocks are indicated by the following figures:—

	Closed last month.		Closed this month.
Bristol and Exeter	91	.....	89xd
Caledonian	87⅜	.....	87⅜
East Indian	103¾	.....	107½

South Devon	54	.....	58xd
South-Eastern	78⅜	.....	84½xd

The advance in the rate of discount, as likely to augment returns upon Banking, Discount, and Finance shares, has caused a rise in the market values of those descriptions of securities, in which, however, Colonial and Foreign Companies have only in a few instances participated. During the past few days the market has been quiet as the demand for money has declined. Indian Bank shares have been flat throughout.

There has been a continued improvement in the quotation of North British and Mercantile shares, but there are few other movements to record amongst Insurance Companies. The fluctuations in the leading companies during the past month have been as follows:—

	Closed last month.		Closed this month
Alliance Insurance, British and Foreign	12½	.....	13
British and Foreign Marine	8½xd	.....	8⅞
Caledonian Fire and Life	58	.....	58
Commercial Union	9⅜	.....	8¾xd
Guardian	53	.....	53

Northern Assurance	15⅜	.....	16½
Ocean Marine	18½xd	.....	18⅜
Queen's	1⅜	.....	1⅜
Standard Life	72	.....	72½
Thames and Mersey Marine	5½xd	.....	5½
Union Marine	10½xd	.....	10⅝
Universal Marine	11½xd	.....	11⅜

Some considerable fluctuations have taken place in the Miscellaneous market, mostly of a satisfactory character. Telegraph shares have at times been in demand, and "Construction" shares have met with a good deal of attention. Hudson's Bay shares show a good rise. Machinery and iron companies stand at higher quotations. There have also been movements in steam-ship companies. Altogether, business in this department would appear to be on the increase. The following list indicates some of the principal fluctuations during the month amongst this class of investments:—

	Closed last month.		Closed this month.

NOTICES AND REPORTS.

BRITISH, COLONIAL, AND FOREIGN STOCKS.

Chilian 3 *per Cent. Loan.*—The sum of 9,383*l.* set apart in September, has been employed in the purchase of 10,200*l* bonds.

Danish 4 *per Cent., 1850-61.*—Bonds representing 2,000*l* have been purchased and cancelled.

Danish 5 *per Cent., 1864.*—Bonds representing 1,900*l* have been drawn for repayment at par.

Egyptian—Khedive's 7 *per Cent. Loan, 1870.*—The numbers of 4,375 bonds of 20*l* each have been drawn for redemption at par on the 1st April.

Funded Loan of the United States.—Messrs Baring Brothers and Co.; Messrs Clews, Habicht, and Co.; Messrs Jay, Cooke, McCulloch, and Co.; Messrs J. S. Morgan and Co.; Messrs Morton, Rose, and Co.; and Messrs N. M. Rothschild and Sons, are the agents in this country to carry out the Refunding Act whereby the whole of the 6 per cent. "Five-Twenty bonds" will be replaced by securities carrying a lower rate of interest. Most of the "Five-Twenties" are now redeemable at the option of the State; and the first issue of bonds in substitution will be for 41,000,000*l* at par (102½ per $500 bond), as explained in the following extracts from the prospectus:—

The amount proposed to be issued is $200,000,000, redeemable in coin of the present standard value at the pleasure of the United States, after ten years from the date of issue, and bearing interest at the rate of 5 per cent. per annum from the 1st day of May next, payable quarterly in coin in the United States.

The bonds will be issued in the United States, where the principal will also be reimbursed.

Registered bonds will be issued in amounts of $50, $100, $500, $1,000, $5,000, and $10,000; and coupon bonds of each denomination except the last two.

The bonds and the interest thereon are exempt from the payment of all taxes and dues of the United States.

After maturity, the bonds last issued will be first redeemed.

The price of issue will be par, or at the rate of 102½ 6d sterling (being equivalent of 91 at ex. 4s 6d to the dollar) for each $500.

Subscribers will be required to deposit at the time of application 2*l* on every $500 applied for, and the balance will be payable on the 1st day of May next. The subscriptions will be transmitted to the United States, where the bonds will be delivered.

Payment may be made either in cash or bonds of the United States, known as "Five-Twenty" bonds, also at their par value, allowance being made for accrued interest at the exchange of 4s 1d per dollar.

Guatemala 6 *per Cent. Sterling Loan, 1869.*—Bonds representing 8,200*l* have been drawn for redemption at par on the 1st April.

Honduras Government 10 *per Cent. Loan of 1870.*—In addition to the annual drawing of 3 per cent. on the 31st December next, as provided in the bonds of this loan, the Honduras Government have received to have an additional drawing of 2 per cent. on the 30th of April next, and, if circumstances will admit, another of 2 per cent. on the 30th September next. The bonds drawn on 30th April will be paid off at par with the coupon due on the 1st July next.

Massachusetts 5 *per Cent, Sterling Loan.*—Special settling-day—the 15th March.

Moorish Loan of 1862.—Thirty-five bonds have been drawn for repayment at par on the 3rd April.

New Zealand 5 *per Cent. Consols.*—The third drawing of bonds has taken place, and the 48,200*l* bonds thus drawn will be paid off at par on the 15th April.

Peruvian 5 *per Cent., 1865.*—The bonds for 328,000*l*, which were drawn on the 1st January, will be paid off on the 1st April.

Portuguese 3 *per Cent. Dividends.*—These will henceforth be paid quarterly at the Portuguese Financial Agency, the first quarterly distribution being made on the 1st April.

Russian 5 *per Cent. Consolidated Bonds of* 1871.—Messrs Rothschild, in London, Paris, and Frankfort, and other houses in Berlin, Amsterdam, and St Petersburg, invite subscriptions for this 5 per Cent. Sterling loan for 12,000,000*l* nominal, from the 9th to the 14th instant. The bonds, in sums of 50*l*, 100*l*, 500, and 1,000*l* each, bear interest on the 1st September and 1st March, and a sinking fund provides for the redemption at par by annual drawings in 81 years from March, 1873. The issue price is 81½ per cent., payable by instalments until the 3rd October next. Instalments may be prepaid under discount at the rate of 4 per cent. The money is required to reinforce the railway fund for the completion of State lines and those constructed under concessions.

Swiss 4½ *per Cent. Loan for* 15,000,000 *francs.*—This loan has all been taken up in Switzerland, 105,250,000 francs having been applied for.

Turkish 6 *per Cent. Loan of* 1858.—On the 1st instant the following notice was issued by the agents for this loan:—"Messrs Dent, Palmer, and Co. have received 200,000*l* for the service of the Imperial Turkish loan of 1858; but, inasmuch as the total sum required is 2,2,445*l*, in the absence of official instructions, they can make no payment until the whole amount is received."

Turkish 6 *per Cent. Loan, 1858.*—The balance of 22,445*l* required by Messrs Dent and Palmer for dividends was provided on the 2nd inst.

Turkish 6 *per Cent. Loan, 1869.*—The numbers of 5,875 obligations, which were drawn on the 23rd March in Paris, have been published for redemption on the 1st instant.

FAILURES, EMBARRASSMENTS, & WINDINGS-UP.

Burmah Company, Limited.—A voluntary liquidation has been resolved upon, and Mr J. Waddell is the liquidator.

Constantinople and Alexandria Hotels, Limited.—Mr F. Algar has been appointed official liquidator.

East India Cotton Agency, Limited.—A further dividend of 15s in the pound (making 20s in all) is payable to the creditors by Mr. George T. Hart.

London and County General Agency Association, Limited.—Mr Barrow, of Gresham street, has been appointed official liquidator.

Reinsurance Company, Limited.—Creditors are required to send particulars of claims to the liquidator by the 1st of April.

BRITISH, COLONIAL, AND FOREIGN RAILWAYS.

Arbroath and Forfar.—A 6 per cent. dividend has been announced. It is estimated that if the balance of the liquidation stock be gradually issued, and the mortgage debt paid off, the present dividend could be maintained till 1877, when the permanent dividend would be thereafter 5 5-8ths per cent. per annum.

Blyth and Tyne.—The net revenue for the past half-year, including 369*l* from the previous half, amounted to 23,569*l*, out of which the directors recommend the payments of dividends on the preference stocks, and 10 per cent. per annum on the ordinary stock and shares. In anticipation of the capital required for the Newbiggin and North Shields branches, the directors have made a call of 2*l* per share upon the ordinary shares, and they proposed shortly to call up the balance of 1*l* 10s per share.

Blyth and Tyne.—At the meeting a 10 per cent. per annum dividend was declared.

Brecon and Merthyr Tydfil.—Half-year's gross revenue, 33,824*l*, showing an increase of 3,060*l*. The working expenses, 20,663*l*, have increased 862*l*. The accounts with Messrs Savin and Co. are still unadjusted.

Caledonian.—The railway traffic receipts during the half-year amounted to 995,061*l*, and for the corresponding half to 936,487*l*, showing an increase of 58,574*l*. The receipts on the canal amounted to 46,095*l*, against 48,166*l*, showing a decrease of 2,071*l*. The working expenses on the railway amounted to 454,423*l*, against 421,067*l*. The expenses of working the canal amounted to 12,724*l*, against 11,701*l*. The cost of maintenance and renewal of the permanent way and stations was 96,197*l*, but 103,837*l*, being at the rate of 300*l* per mile per annum, was charged. The difference has been carried to the credit of the renewal of way account, which now amounts to 12,540*l*. The amount charged for the repair and renewal of the rolling stock was 105,389*l*. The net revenue balance is 321,975*l*, and after payment of dividend on the preference stocks, amounting to 211,580*l*, there remains 110,396*l*, out of which the directors recommend a dividend on the ordinary stock at the rate of 4½ per cent. per annum, leaving a balance of 1,177*l*. Capital expended 22,670,745*l*, including 264,619*l* during the half-year. Estimated outlay during the current half 370,311*l*. An agreement has been made with the Glasgow and South-Western and Greenock and Ayrshire Companies for the apportionment of the passenger traffic between Glasgow and Paisley and Greenock. The directors regret that it has been found impossible to come to terms with the directors of the North British.

Cambrian.—There was an advance of 2,830*l* in passenger and of 1,290*l* in merchandise and mineral receipts during the second half of 1870. The net income of the inland section was sufficient to meet all the fixed charges thereon (22,769*l*) and leave a balance of 1,822*l* to be carried forward.

Cork and Bandon.—Traffic receipts, 14,868*l*, showing an increase of 1,172*l*. A dividend at the rate of 2½ per cent. per annum is notified to the ordinary shareholders, leaving 6,048*l*. Capital expended, 343,866*l*.

Cork and Limerick Direct.—At the meeting, a 2½ per cent. per annum dividend was declared; and the Bill for the transfer of the company to the Great Southern and Western was approved. The ordinary shareholders will receive 60 per cent. in Great Southern and Western stock.

Cornwall.—During the half-year the associated companies had to provide 6,353*l* to cover guarantees. The redeemable 5 per cent. preference shares are to be replaced by a 4½ per cent. stock.

Crystal Palace and South London Junction.—The chairman, at the meeting, said that the accounts from the Chatham and Dover Company had only just been received, and they showed the gross traffic at 8,878*l*, and the net profit at 1,784*l*.

Digitized by Google

Danube and Black Sea.—The capital account to the 30th of November, 1870, showed that 567,561*l* had been expended, leaving a balance against the company of 7,950*l*. The revenue account for the year ending the 30th of November, showed that 44,067*l* had been received as compared with 59,378*l* in the preceding year, showing a decrease of 15,311*l*. The expenditure, including 12,160*l* for interest on mortgage bonds, amounted to 44,956*l*, leaving a balance against revenue of 888*l*, as compared with 44,042*l* in the previous year, which left a balance of 15,336*l* in favour of revenue. The war had very seriously interfered with the traffic, and large accumulations of grain in Wallachia had been the result. A convention had been concluded with the Turkish Government, and Kustendjie would henceforth be a free port.

Dublin and Meath.—The net result for the six months showed a balance of 988*l* available, after payment of all debenture interest and current expenses chargeable to revenue. The directors recommend an increased dividend at the rate of 1*l* 5*s* per cent. per annum on the first preference shares, carrying forward a balance of 225*l*.

Dublin, Wicklow, and Wexford.—The half year's traffic amounted to 101,858*l*, against 98,546*l* in the same half of 1869, showing an increase of 3,312*l*. The expenditure amounted to 42,005*l*, against 39,945*l*, showing an increase of 2,060*l*. The balance available was 31,405*l*, out of which the directors recommended payment of a dividend at the rate of 2½ per cent. per annum on the original shares, in addition to the dividends on all the preference shares, leaving a balance of 6,325*l*. The traffic agreement with the London and North-Western Company had been satisfactorily arranged, and they had subscribed 30,000*l* towards the cost of the Wexford Extension.

Edinburgh and Bothkennar.—Dividend announced at the rate of 5 per cent. per annum; surplus, 452*l*. A further payment of 2*s* 6*d* per share was made for arrears of surplus rents.

Erie Bonds.—The coupons due 1st March of the Erie Railway loan of 1865 were paid, on and after that date, at the counting house of Messrs J. S. Morgan and Co.

Furness.—Capital expended to 31st December, 3,055,510*l*. The railway and dock receipts for the half-year were satisfactory, and the directors recommend a dividend at the rate of 9 per cent. per annum. The balance of the revenue account would provide for the transfer of 5,000*l* to the reserve fund, which the directors also recommend, leaving a balance of 5,893*l* to the credit of the current half-year. The increase in the number and the size of the vessels now resorting to Barrow rendered it desirable that additional accommodation should be provided in the docks and harbour.

Glasgow and South-Western.—Half-yearly revenue accounts contrasted:—

	1869-70. £		1870-71. £
Gross receipts	322,557		344,295
Working expenses	131,403		152,753
Net revenue	191,154		191,542
Add previous balance	4,121		2,611
	195,275		194,153
Preference charges	88,467		86,811
Available for dividend	106,808		107,342
—on the ordinary stock at the rate of 5½ per cent. per annum	102,623	(5½ p. c.)	104,216
Surplus	4,185		3,096

Capital Account.

	Expended. £		Received. £
To 31st July, 1870	7,245,784		7,259,796
During the half-year	106,029		187,395
Total, 31st January, 1871	7,351,813		7,349,191

Estimated capital outlay during the current half, 98,406*l*. An exceptional interest item of 4,439*l* in the corresponding period caused the falling off in preference charges shown above. The branches between Cumnock and Ayr and the Dalmellington line are nearly completed; and the joint line to Kilmarnock has been partially opened, as well as a portion of the Glasgow Union railway.

Grand Trunk—International Bridge.—See "New Companies and Capital."

Great North of Scotland.—The half-year's revenue, 97,328*l*; working expenditure, 49,390*l*; net revenue, 47,838*l*; showing an increase of 7,834*l*. After providing for the dividends on the guaranteed stocks in full there remained sufficient for a dividend at the rate of 3*l* per cent. per annum on the 5 per cent. preference stock, and of 2*l* 14*s* per cent. per annum on the 4½ per cent. A preference stock, with a balance of 1,627*l* as compared with dividends at the rate of 1*l* 11*s* and 1*l* 8*s* per cent. per annum respectively, and a balance of 419*l*. Capital expended, 3,066,122*l*.

Great Northern.—At the meeting a dividend at the rate of 8½ per cent. per annum was declared. The directors' proceedings with regard to the coal-rates were approved.

Great Northern and Western, Ireland.—The net receipts for the four months to the 31st October last amounted to 16,356*l*, and the rent under lease to the Midland Great Western from the 1st of November to the 31st of December to 4,763*l*, making together 21,118*l*; the working expenses amounted to 6,019*l*, leaving a balance, after payment of interest, of 11,342*l*. The directors recommend the payment of dividends on the 1st of April.

Great Northern and Western of Ireland.—Dividend declared at the rate of 4½ per cent. per annum.

Great Western.—The last half-yearly revenue accounts, compared with the corresponding six months of 1869-70:—

	1869-70. £		1870-71. £
Gross revenue	2,170,663		2,214,301
Working expenses	1,000,798		1,019,619
Net	1,169,864		1,194,682
Add previous balances	18,099		15,375
	1,178,923		1,210,057
Deduct preference charges	975,363		974,710
Available for dividend	203,561		235,347
—on the ordinary stock at the rate of 3½ per cent. per annum	184,815	(3½ p. c.)	216,315
Surplus	14,746		19,032

The figures for the 1869-70 half-year have been compiled from the old sectional accounts. The ordinary dividend for that half-year was augmented by the distribution of items belonging to the original section only, and the advance made has therefore been more than recorded in the above statement.

Capital Account.

	Expended. £		Received. £
To 31st July, 1870	45,707,799		45,837,698
During the half-year	193,454		165,509
Total, 31st January, 1871	45,903,212		46,003,207

Nearly 200,000*l* in debenture stock has been issued during the six months. The principal increase in revenue was due to goods traffic. As soon as the requisite narrow gauge rolling-stock has been provided it is proposed to convert all the broad guage lines on the South Wales route as far as Swindon. The rolling-stock is to be provided out of revenue, but the 226,000*l* for the alteration of permanent way will be charged to capital. To meet these and other payments it is proposed to issue 1,000,000*l* in 5 per cent. preference stock at par.

Great Western—New 5 per Cent. Consolidated Preference Stock.—The directors have issued 1,000,000*l* of the new stock at par, 20 per cent. is payable on the 31st March, 20 per cent. on the 30th June, 20 per cent. on the 30th September, 20 per cent. on the 30th December, and 20 per cent. on the 30th March, 1872.

Great Western and Brentford.—Dividend declared at the rate of 2½ per cent. per annum. Surplus, 32*l*.

Great Western of Canada.—The dividend is announced at the rate of 6 per cent. per annum for the second half of 1870.

Horncastle.—Net balance, 1,920*l*; dividend announced at the rate of 7½ per cent. per annum.

Isle of Wight.—The profits for the year amounted to 7,750*l*, out of which the interest on the A debenture stock (3,711*l*) had been paid, the balance being applicable for the interest on the B debenture stock, and pressing claims upon capital account.

Kettering, Thrapstone, and Huntingdon.—Net profit, 5,680*l*, from which the directors declare a dividend at the rate of 5½ per cent. per annum on the A stock, and of 1 per cent. on the B or deferred stock.

Llynvi and Ogmore.—A dividend at the rate of 1½ per cent. per annum has been declared on the Llynvi ordinary stock.

London, Chatham, and Dover.—The gross receipts for the half-year amounted to 376,384*l*, as compared with 388,752*l* in the same half of 1869, being a decrease of 12,367*l*. The gross expenses amounted to 206,396*l*, as compared with 213,257*l*, being a decrease of 12,861*l*. The net result of the traffic for the half-year was a balance of 175,988*l*, earned at 53·24 per cent. of the receipts, as compared with 175,495*l* for the corresponding half of 1869 earned at an expense of 54·86 per cent. of the receipts. The continental war very seriously interfered with one of the most important and profitable branches of the traffic. After payment of the full half-year's dividend on the arbitration debenture stock, there remained a balance of 29,762*l* to be carried forward. Under the final award of the arbitrators, the tenure of office of the present board terminated with the half-yearly meeting, and the duty of electing the entire future board of directors and auditors devolves on the meeting. Capital expenditure, 17,542,963*l*.

London, Chatham, and Dover.—The final award of the arbitrators has been issued. By this all voting powers are determined; the number of the directors are fixed at eight; all rights and priorities are determined, together with the sums payable to the Kent Coast, Sevenoaks, and Crystal Palace lines.

London, Tilbury, and Southend.—The receipts for the half-year amounted to 40,296*l*, and the expenses to 27,540*l*, leaving a balance of 12,756*l*. The usual returns of passenger tolls and proportion of goods receipts were, for the Great Eastern, 13,944*l*, and for the North London, 2,337*l*, which, added to the above receipts (40,296*l*), made the gross receipts for Tilbury traffic for the half-year 56,577*l*. The capital account showed that 798,677*l* had been expended.

Madras.—The Toongabudra Bridge has been completed, and

Digitized by Google

an engine has run through to Raichore, where the junction with the Great Indian Peninsula will be effected. The Bellary branch was to be opened on the 1st instant.

Metropolitan District.—Capital expended, 4,677,040*l*; estimated further outlay, 965,000*l*, including the cost of new rolling-stock to be paid for in ten half-yearly instalments. The termination of the agreement with the Metropolitan will necessitate the Company providing this rolling-stock; but the board express themselves willing to issue a thorough service between the two railways. The 300,000*l* debenture stock was all placed at 2 per cent. premium. The Cannon street extension is in progress, and is contracted to be finished by the beginning of July. The agreement with the London and North-Western, by which, in consideration of a contribution of 100,000*l* and certain tolls, the Company will be allowed to run trains to Cannon street is also referred to in the report. The traffic continues to increase.

Midland Great Western of Ireland.—The receipts for the half-year amounted to 154,433*l*. The expenditure in working the railway and canal was 76,960*l*; the rents of other lines, the interest on loans, and loss on working the Athlone and Galway line were 27,725*l*, making together 104,685*l*, which, deducted from the 154,433*l*, left a balance of 49,747*l*. To this was added 11,683*l*, surplus from the preceding half-year, making 61,210*l*, out of which the directors recommended a dividend at the rate of 5 per cent. per annum on the preference stock and 4 per cent. per annum on the ordinary consolidated stock, which would absorb 50,643*l*, and leave 10,566*l* for the next account. There has thus been an advance of ½ per cent. in the dividend. The Enniscorthy and Kingscourt line is in a forward state, and the Great Northern and Western line was handed over to this company on the 1st November.

Monmouthshire.—The report, which showed that the revenue for the half-year amounted to 84,025*l*, as compared with 79,055*l* in the corresponding half of 1869, and the net receipts to 41,019*l*, against 38,399*l* was adopted, and a dividend at the rate of 6 per cent. per annum was declared.

Moscow-Yaroslaw Fire per Cent. Bonds.—The numbers of twenty-seven bonds of 100*l* have been published for redemption.

North British.—The traffic receipts for the half-year amounted to 766,400*l*, and for the corresponding half to 762,400*l*, showing an increase of 4,000*l*. The expenditure amounted to 412,086*l*, and for the corresponding period to 408,262*l*, showing an increase of 3,824*l*. Out of the free revenue, the directors recommend the payment of dividends on the preference stocks, and on the Edinburgh and Glasgow preference (ordinary) stock, at the rate of 2½ per cent., as compared with 1½ per cent., which absorbs 182,337*l*, and leaves 326*l*. The capital expenditure amounted to 20,363,286*l*, including 100,960*l* during the half-year. The standing arbitrator has decided that the North British company had substantial grounds of complaint against the Caledonian, and has awarded damages. On the completion of the Tay bridge the company will be relieved of ferry charges and tolls of nearly 25,000*l* a year, while the dividend of 5½ per cent. on the reduced capital for the bridge of 335,000*l* will not absorb more than 17,587*l*, thus leaving a substantial saving of the company. The Coat bridge separated undertaking was partially opened for passengers on the 23rd of November last, and the traffic passing over it has more than justified the expectations of the directors. By the completion of the Midland line from Settle to Carlisle, the board believe they will be enabled to secure a fair share of the English and Scotch traffic.

North and South-Western Junction.—Capital expended, 126,865*l*. The traffic receipts for the past half-year showed that 7,264*l* had been received, against 7,383*l* for the corresponding half of 1869, showing a decrease of 119*l*. The net result was an available sum of 4,014*l*, from which the directors recommend a dividend at the rate of 6 per cent. per annum, leaving a balance of 161*l*. The negotiations with the London and North-Western, Midland, and North London Companies had resulted in an arrangement for a joint lease of the undertaking to those companies on terms which would secure to this company in perpetuity a net annual dividend of 7 per cent. after providing for necessary expenses.

Ottoman-Smyrna to Aidin.—The gross revenue for the past half-year amounted to 39,667*l*, against 41,156*l* in 1869, and the expenditure to 30,114*l*, against 28,408*l* in 1869, leaving a net profit for the past half-year of 9,554*l*. The rolling stock had been maintained in good order. Two fatal accidents occurred in January last, owing to heavy floods. The directors received from the Ottoman Government last November, on account of the guarantee, 42,953*l* in mandats, with interest added at 12 per cent. per annum. All the mandats falling due up to and inclusive of July last were regularly paid. The mandats maturing in August, September, and October had been settled by payment in cash of one-half, and the renewal with interest of the remaining half. The mandats which have become due since October had not up to the present been provided for.

Pembroke and Tenby.—Half-year's gross traffic, 13,021*l*; net receipts, 7,244*l*. Ordinary dividend recommended at the rate of 1 per cent.

Rhymney.—The receipts for the half-year amounted to 33,969*l*, and for the corresponding half of 1869 to 35,825*l*, showing a decrease of 1,856*l*. The balance of net revenue amounted to 14,843*l*, and the guaranteed and preferential dividends to 11,199*l*, leaving a balance of 3,644*l*, out of which the board recommended that a dividend on the ordinary stock at the rate of 3 per cent. per annum be declared, leaving a balance of 752*l*. The Cardiff and Caerphilly line would be ready for inspection by the end of March, and the Penallta branch by the end of April next.

Scinde Railway.—The vacant seat at the board of the Scinde, Punjaub, and Delhi Railway, caused by the death of the late Sir Herbert Maddock, has been accepted by Sir Donald F. M'Leod, late the Lieutenant-Governor of the Punjaub, who has, at the same time, been elected deputy-chairman of the company.

Stratford-upon-Avon.—Dividend announced at the rate of 6 per cent. per annum, surplus 271*l*.

Swansea Vale.—Dividend on the ordinary shares declared at the rate of 1 per cent. per annum.

Taff Vale.—At the meeting, the 10 per cent. per annum dividend was declared. The chairman referred to the happy increase in the traffic, and to the fact that in three years the redemption payment to the Waggon Company would cease.

Trent, Auchtobhar, and Grinshi.—Dividend declared at the rate of 3½ per cent. per annum.

Waterford and Limerick.—The traffic for the half-year amounted to 51,466*l*, and for the corresponding half of 1869 to 49,755*l*, showing an increase of 1,711*l*. A revision of rates last autumn tended to improve the results. The working expenses were 45½ per cent. of the earnings, as against 46½ per cent. in the same half of 1869. After defraying working expenses and providing for interest on debentures, there remained a disposable balance of 20,546*l*, which, together with 1,098*l* from the preceding half-year, made 21,645*l*, out of which the directors proposed to pay the dividends on the preference shares, and at the rate of 3 per cent. per annum on the ordinary capital (clear of tax), and also to carry to reserve fund 465*l*, leaving a balance of 2,656*l* for renewals.

West Norfolk.—Half-year's revenue, 2,298*l*. After paying debenture interest 432*l* remained to be applied to the reduction of the debt due to bankers.

Whitehaven, Cleator, and Egremont.—A dividend at the rate of 1¼ per cent. per annum has been declared. The half-year's gross revenue was 35,524*l*, and the net balance 23,428*l*.

BANKING COMPANIES.

Bank of Australasia.—At the meeting the year's profits were stated at 100,821*l*, out of which a dividend at the rate of 10 per cent. per annum, free of income tax, was declared.

Bank of England.—The half-year's dividend at the rate of 9 per cent. per annum absorbs 654,885*l*, leaving the "rest" at 3,019,327*l*.

Commercial Banking of Sydney.—At the half-yearly meeting held in Sydney a dividend and bonus, equal to 17 per cent. per annum, were declared, 10,000*l* was added to the reserve fund, increasing it to 130,000*l*, and undivided profit amounting to 4,633*l* was carried over.

Hongkong and Shanghai Banking Corporation.—A telegram from Hongkong announces that the corporation have declared a dividend of 4 per cent. for the past half-year, making, with the previous dividend, 10 per cent. for the year, and leaving a balance of 280,000 dollars.

Ionian.—A dividend at the rate of 8 per cent. per annum is announced.

London Bank of Mexico and South America.—The report shows an available total of 17,419*l*, including a previous balance of 2,612*l*, and recommends a dividend for the half-year of 16s per share, or at the rate of 8 per cent. per annum, which will absorb 14,409*l*, and leave 3,010*l* to be carried forward.

London and Provincial.—A dividend at the rate of 9 per cent. per annum, free of tax, has been declared.

London and San Francisco.—Year's gross profits, 132,749*l*, and after deducting charges and rebate, 102,978*l* remains as net surplus. A dividend of 10 per cent. (the first instalment of which was paid in September) is announced; surplus, 7,978*l*. Of this, 5,000*l* belongs to the founders as bonus, leaving 2,978*l* to be carried forward.

Merchant Banking.—The report shows a gross profit of 56,286*l*, of which sum 20,000*l* is applied to the extinction of the balance upon the amalgamation account, and 11,183*l* to the payment of a dividend at the rate of 6 per cent. per annum.

Royal Bank of Ireland.—A six months' dividend at the rate of 12 per cent. per annum, free of income tax, is recommended.

FINANCE AND DISCOUNT COMPANIES.

Credit Foncier of England.—At the meeting a dividend was declared at the rate of 5 per cent. per annum; surplus, 16,149*l*. The half-year's profit was 27,179*l*.

Digitized by Google

International Financial.—In reply to statements made by Mr Hope, the directors' circular states that the Metropolis Sewage undertaking could not have been carried out without calling up the rest of the society's capital, while the expense of working the project would destroy any chance of profit for an indefinite period. They accordingly decided not to invest any further capital in the sewage scheme, but sought, and still seek, to obtain from the Metropolitan Board of Works such aid as may enable a modified plan to be carried ont.

Leasehold Investment.—Dividend declared at the rate of 5 per cent. per annum.

INSURANCE COMPANIES.

Briton Medical and General Life.—At the annual meeting a dividend was declared of 8 per cent., making a total distribution for the year equal to 16 per cent. The new premiums had amounted to 17,473*l*, and the total income to 246,477*l*.

Commercial Union Assurance.—The directors have resolved upon a dividend of 10*l* per cent., free of of income tax (making with the interim dividend paid last September, 12½ per cent. for the year), and an addition of 30,000*l* to reserve fund, leaving 12,952*l* to be carried forward to this year's profit and loss account.

English and Scottish Law Life Assurance.—At the annual meeting it was announced that 562 new policies had been issued in 1870, insuring 427,722*l*, and yielding 14,085*l* in new premiums. The renewal premiums were 109,751*l*, and the invested funds 760,132*l*.

Equity Law Life Assurance.—The new policies issued in 1870 were 180, for an aggregate of 300,150*l*, yielding in premiums 12,543*l*. Total income, 145,576*l*; expenses, 88,794*l*.

Lancashire Insurance.—Year's fire premiums, 102,283*l*; surplus, 30,639*l*; life income, 47,227*l*; life reserve, 198,804*l*; fire reserve, 82,389*l*.

Liverpool and London and Globe.—The new life policies of the year were stated at 841, for 426,410*l*, yielding in new premiums 16,089*l*. The reserve fund for that department being 2,206,177*l*, showing an increase of 112,000*l*. The fire premiums of the year were 931,727*l*, and losses 528,384*l*. The general profit and loss accont showed an available balance of 317,578*l*, out of which a dividend of 30 per cent. was declared, leaving 200,053*l*. The funds of the company, including 391,752*l* capital, amount to 3,859,392*l*.

London Assurance Corporation.—A dividend of 45s per share, free of income tax, is announced for the past half-year.

Railway Passengers' Assurance.—Total income of the year, 130,024*l*, as compared with 122,360*l* in 1869. The balance to the credit of revenue account on the 31st December last, including that brought forward, was 73,071*l*, which, after the payment of interest on the paid-up capital at the rate of 5 per cent. for the half-year, will admit of a division of 20s per share; 10s will be paid in cash, and the rest be added to the amount paid up on each share.

Rock Life Assurance.—A dividend of 2s 6d per share and a bonus of 1s 6d, both free of income tax, have been declared for the half-year.

MISCELLANEOUS COMPANIES.

Alhambra.—A dividend for the half-eyar at the rate of 25 per cent. per annum, free of income tax, is notified. It is intended to issue 30,000*l* in 10 per cent. debentures (14,300*l* has already been subscribed) to purchase the superior leases of the Alhambra Palace.

Anglo-American Telegraph.—The total receipts for the past year, including 1,258*l* carried over from the last account, were 233,822*l*, while the charges for buildings, purchasing ship and stores, and repairing cables, with the ordinary working and other expenses, and income tax, amounted to 76,121*l*, leaving a balance of 157,700*l*. Out of this amount three interim dividends of 2 per cent. each, free of income tax, have already been paid, absorbing 94,424*l*, and leaving a balance of 63,276*l*. The directors recommend the payment of a further dividend of 3 per cent., also free of income tax, leaving 16,026*l*, which it is proposed to appropriate towards the repair of the 1865 and 1866 cables, in addition to 13,800*l* obtained by the re-sale of 60 miles of cable to the French Company and 9,214*l* appropriated from the reserve.

Berlin Water Works.—The net income of the undertaking for the half-year amounted to 34,052*l*, out of which a dividend was declared at the rate of 10½ per cent. per annum. The report mentioned that the anticipated falling off in the revenue in consequence of the war has not taken place.

Brazilian Street Railway.—The annual meeting was held on the 23rd ult., when it was proposed to make a further issue of shares. The report showed an increase in the receipts of about 14½ per cent. over the previous year, and recommended a dividend of 6½ per cent. for the six months ended the 31st of December (making 12½ per cent. for the year), which absorbed 4,041*l*, and left 744*l* to be carried forward.

British American Land.—The report notifies a dividend of 1*l* per share, which will absorb 6,000*l*, and leave 2,102*l* as surplus. Business has shown improvement.

British Land.—The profit during 1870, after paying an interim dividend of 2½ per cent., was 16,103*l*, and a further distribution of 5 per cent. is now recommended; surplus, 4,103*l*. Depression in the building trade has caused the falling off in profits.

City of Buenos Ayres Tramways.—The whole line, 9.62 miles in extent, was opened on the 18th October last; and all issued capital has been called up. The traffic is stated to be good and increasing rapidly. It is proposed to extend the lines, and to issue the 25,000*l* capital at yet unallotted.

City Offices.—The report announces a dividend of 1s 9d per share. All possible economies have been enforced. Some important additional lettings have recently been effected.

Crystal Palace District Gas.—The usual maximum dividends are announced in the report.

Danubian Navigation.—Half-year's available balance, 1,577*l*, out of which a dividend of 4 per cent. (making 6½ per cent. for the past year) is recommended.

General Steam Navigation.—Half-year's dividend 10 per cent. per annum, with a bonus of 2s 6d per share.

Gray's Chalk Quarries.—Dividend 10 per cent. for the twelve months.

Indo-European Telegraph.—The adopted report stated that the gross revenue of the company amounted to 25,268*l*, and the expenses, including maintenance, to 25,286*l*.

Liverpool Exchange.—Dividend declared at the rate of 5 per cent. per annum.

London General Omnibus.—The report stated that although the gross receipts showed a decrease, the number of passengers carried during the half-year considerably exceeded that of the corresponding half of last year. The account showed a profit, including 6,014*l* brought forward, of 29,600*l*; from which it was proposed to add 2,500*l* to the reserve fund, to write 2,500*l* off the first establishment account, to apply 22,460*l* to the payment of a dividend of 3s per share, equal to 7½ per cent. per annum, free of income tax, and to carry forward 2,140*l*.

London Tavern.—Year's profit 1,346*l*, out of which a dividend of 2½ per cent. was paid.

Mediterranean Extension Telegraph.—At the meeting a dividend at the rate of 3 per cent. per annum, free of income tax, was declared. Surplus, 703*l*.

Milburn and Co.—Dividend 10 per cent., free of income tax.

North British Australasian.—Year's profit, 5,735*l*, making, with the balance brought forward, a total of 7,093*l*. The war between France and Germany has exercised a prejudicial influence upon the realisation of the company's produce.

North British Australasian.—A special meeting was held on the 31st instant, "for the purpose of renewing the authority of the directors to create and issue such portion as has not already been issued of the 32,565*l* Six per Cent. Guaranteed Stock of the company, authorised to be issued by resolutions of the special general meeting held on the 17th day of May, 1864."

Rio de Janeiro City Improvements.—The report announces a half-year's dividend at the rate of 6½ per cent. per annum; surplus, 8,658*l*.

Southampton Docks.—At the meeting a 4 per cent. per annum dividend was declared.

Submarine Telegraph.—At the meeting the chairman said that the war in France had caused a decline in receipts from French messages. A dividend at the rate of 15 per cent. per annum was declared.

Surrey Commercial Dock.—A dividend of 2½ per cent., free of income tax, for the half-year, has been declared. Owing to the war there has been some falling off in revenue.

Telegraph Construction and Maintenance.—The year's report shows an available profit of 170,646*l*, after paying an interim dividend. Of this 44,820*l* is to be divided in cash, being 24s per share, and 112,050*l* as a bonus of 3*l* per share, at present represented by fully-paid shares at par in telegraph companies. With regard to the bonus it is stated "the directors propose to constitute a trust, and to transfer to trustees the 112,050*l* in fully-paid shares above mentioned, each shareholder receiving a certificate to the amount of 3*l* on each of his shares, and which will entitle the holder of the certificate to a rateable proportion of the produce realised by sale and dividends of the trust shares until all those shares are disposed of. It is proposed that the trustees be restricted for three years from selling any shares under par."

Telegraph Construction and Maintenance.—At the meeting the year's dividend of 14 per cent., free of income tax, was declared, and trustees were appointed to distribute a bonus of 3*l* per share ont of shares held in submarine companies.

Van Diemen's Land.—A dividend of 4s 6d per share has been declared, leaving 267*l*.

West India and Pacific Steam Ship.—At the meeting a dividend at the rate of 7 per cent. per annum was declared.

MINING COMPANIES.

Alamillos.—Dividend 2s 6d per share.

Don Pedro North del Rey.—The receipts for the year were 39,394*l*, while the working expenses reached 39,352*l*. During

Digitized by Google

the twelve months a considerable amount of prospective and unproductive work has been executed, and charged against revenue.

East Wheal Lovell.—Three months' profit, 4,389*l*. Dividend, 2*l* per share.

Fortuna.—Dividend 2s 6d per share.

Linares Lead.—Dividend 5s per share.

Minera.—Quarter's dividend, 3*l* 5s per share.

New Wheal Lovell.—Call, 3s per share.

North Levant.—Dividend, 15s per share.

Penhurena United Gold.—The year's produce was 22,399*l*, and a small profit of 661*l* was made.

South Condurrow.—Four months' profit, 1,421*l*; and a dividend of 5s per share absorbed 1,531*l*.

Spearne Moor.—Dividend, 1*l* per share.

Sweetland Creek Gold.—A third dividend of 4s per share, free of income tax, has been paid.

Tuquarel Gold.—A call of 2s per share was payable on the 24th March, in consequence of returns having been less than were anticipated.

West Great Work.—Call, 2s 6d per share.

West Prince of Wales.—Call, 1s per share.

Wheal Margaret.—Quarter's profit, 454*l*. Dividend, 10s per share.

Wheal Orles.—Quarter's profit, 552*l*. A dividend of 7*l* 10s per share absorbed 600*l*.

NEW COMPANIES AND NEW CAPITAL.

Atlantic and Great Western Railway Reorganisation Stock.—Messrs Bischoffsheim and Goldschmidt offered this 400,000*l* 7 per cent. stock for subscription at the price of 75 per cent., of which 5 per cent. was required on application, and 15 on allotment. The remainder to be called up as wanted, but only after the official reorganisation has been duly recognised by the States of New York, Pennsylvania, and Ohio. Should this not be obtained, the present instalments will be returned without deduction on the 1st September next. The half-yearly interest will be payable on the 1st September and 1st March, in London, in sterling; and the bonds will be redeemable in three years at par, or convertible at the holder's option into 7 per cent. first mortgage bonds of the reorganised company at the price of 80 per cent.

As it is probable that only part of the 75*l* per cent. (beyond the 20*l* paid on allotment) may be called up, the trustees for reorganisation, or (if they have ceased to act, the railway having been reorganised) the board of directors, will at any time have the right to consolidate the amounts paid up, plus the bonus of 25 per cent., and cancel the further calls.

The proceeds of this issue will be retained in London, to the order of the trustees, until after the decree of sale has been obtained, and will thereafter be applied in discharge of liabilities, for which first general mortgage bonds of the reorganised company are authorised to be created under the official scheme.

Buenos Ayres National Tramways, Limited.—Capital, 140,000*l*, in 10*l* shares, the whole to be paid up by the 1st September. The existing tramways in Buenos Ayres, a city of over 200,000 inhabitants, have proved very profitable, and this company is started to supply districts as yet unaccommodated. The contractors have engaged to construct the 14 miles of line, and to equip the same by the 30th December next. Goods, as well as passenger traffic, will be carried on, and large profits are expected.

Devon and Somerset Railway—Ordinary Stock.—Messrs Field, Wood, and Haynes have received subscriptions for 235,000*l*, out of 260,700*l* ordinary stock of this line. The line is approaching completion, and will be worked by the Bristol and Exeter. The issue price is 38*l* per 100*l* stock, and 3 per cent. per annum interest on the nominal amount is secured for five years by an investment in Consols.

Dominion of Canada Oils Refinery, Limited.—Capital, 150,000*l*, in 30,000 shares, of 5*l* each, to be fully paid at once. 13,000 shares now offered at par. For the sum of 50,000*l*, of which 38,000*l* is in shares, Messrs Houghton and Howell have agreed to sell their works, patents, and processes to the new company, and it is proposed to greatly extend the works and machinery. The processes of this firm are stated to be unrivalled for the manufacture and purification of Canadian oils, and large profits are looked for.

Dutch-Indian Railway 5 per Cent. Guaranteed Loan.—Messrs Samuel Montague and Co. have received applications for 189,000*l* on 100*l* bonds, at the price of 90*l* 10s per bond. The money is required to complete the Java lines; and the Dutch Government guarantees 64,830*l* to the Company, of which 11,440*l* is unappropriated, and is therefore assigned as security for this loan. The redemption at par will be provided by annual drawings between October next and 1906. Interest payable on the 1st of October and the 1st April.

Grand Trunk Railway of Canada—International Bridge Capital.—Messrs Lawrence, Son, and Pearse invite applications for an issue of 265,000*l* in 6 per cent. mortgage bonds, and 60,000*l* in 6 per cent. preferential stock. Principal and interest are secured by a payment of 20,000*l* a year from the Grand Trunk, and additionally by tolls and general traffic. The issue price of the bonds is nominally 93½ per cent., and of the stock 91½ per cent.; but by prepayment of instalments these prices are reduced to 91½ and 91½ per cent. respectively. The prospectus states:—

As the interest on the bonds and stock now proposed to be issued amounts only to 16,260*l* per annum, the balance of 3,740*l* (of the 20,000*l* per annum to be paid by the Grand Trunk Railway Company of Canada) will, with the additional receipts for tolls, &c., be applied year by year as a sinking fund for the redemption of the bonds at par, increased annually by the interest on the bonds redeemed. What these additional receipts may be cannot at present be accurately defined, but it is expected that the traffic which will pass over the bridge from the Great Western Railway of Canada, the New York and Erie, the New York Central, and other railways, as well as that arising from the use of the bridge as a public highway, both for passengers and vehicles, will yield a further revenue of over 10,000*l* per annum, which sum, with the above-mentioned balance from the Grand Trunk Company, would reimburse both the bonds and preferential stock, now offered, at par within 15 years.

The drawings for redemption (commencing July, 1872) will take place annually, at the offices of the Grand Trunk Railway Company of Canada.

Great Western Railway—New 5 per Cent. Preference Stock.—See "Railways."

*New South Wales 5 per Cent. Loan for 467,100*l.—The Bank of New South Wales offer these debentures in sums of 1,000*l*, 500*l*, or 100*l* each for public tender, to be opened on the 28th instant. The interest is payable in London on the 1st July and 1st January, the principal being redeemable on the 1st July, 1900. 5 per cent. is payable on application, and the balance on the 2nd May.

Pomeranian Central Railway 5 per Cent. Participating Preference Shares.—Messrs Blyth and Co. are offering 552,000*l* of this Prussian railway preference capital, consisting of 18,400 shares of 200 thalers (30*l*) each for subscription, at the price of 24*l* per share, payable by instalments over an extended period. The line is to be ninety-one miles in length, and running through Pomerania, will form the shortest route from Konigsberg and Dantzic to Stettin and Hamburg. The works are to be completed by July, 1872. The capital is 1,100,000*l*, one-half of which, in the shape of ordinary shares, has been subscribed in Prussia, and the balance, or preference shares, are now offered. The prospectus states:—"The shares bear interest at 5*l* per cent. per annum upon the whole nominal amount from the 1st of January, 1871, up to the completion of the works. After that time a dividend will be payable of 5*l* per cent., in priority to that payable upon ordinary shares, yielding to the investor 6*l* per cent. per annum. After satisfying the 5*l* per cent. aforesaid, and the ordinary share dividend, the remaining profit (estimated by the calculations hereunder to produce an additional dividend of over 5*l* per cent. on the whole capital, or, with the preference dividend, upwards of 11*l* per cent. for the preference capital, will be divisible rateably between the preference and ordinary shareholders. Any deficit in the dividends on the preference shares in any one year is chargeable in priority on the earnings of future years, and no further preference or debenture capital can be issued."

Prussian Railway (Magdeburg-Lauitzer)—Ordinary Shares.—An issue of 750,000*l*, out of a total of 1,200,000*l* in 15*l* shares, was offered here and in Paris last year, but owing to the breaking out of the war no allotment was made. Subscriptions are again invited; and the line, 108 miles in length, is stated to supply a populous and enterprising district, and to shorten the distance between portions of East and West Prussia by 67 miles.

Russian New 5 per Cent. Loan.—See "Stocks."

Swiss New 4½ per Cent. Loan.—See "Stocks."

Swedish Central Railway, Limited.—Capital, 165,000*l*, in 10*l* shares, and 495,000*l* in debentures; issue of 150,200 shares. The object is to purchase the concession of a line of 60 miles in length, which has already been commenced, from Frovi to Fahlun and Ludvika, running through a country very rich in iron and other minerals. Large dividends are looked for. The "Grelfe-Fahlu," a neighbouring line, already pays 14 per cent.

Witt and Williams's Brewery, Limited.—Capital, 50,000*l*, in 5*l* shares; payable, 10s on application, 2*l* on allotment, and 2*l* 10s in six months. This new undertaking is formed to purchase the English Brewery, Hohenfelde, Hamburgh. The freehold covers, 25,543 square feet, with buildings and plant on the newest principles. The purchase price is 26,200*l* in shares, and large profits are looked for "free from all risk."

ASSIGNMENTS OF MORTGAGES.

For every 100*l* or fractional part of 100*l* of the principal money secured a duty of 6*l*.

For transfer of stocks and shares at a nominal consideration a stamp of 30s is required.

ISSUE of £552,000 PRUSSIAN RAILWAY PREFERENCE SHARES, being 18,400 Shares of 200 Thalers, or about £30 each of the POMERANIAN CENTRAL RAILWAY COMPANY, constituting the entire Preference Capital of the Company. The ordinary Shares, 18,400 in number, have been subscribed for in Germany, and are being duly paid upon in accordance with the statutes. Price of Issue, £24 per £30 Share of Nominal Capital. £7 payable on application, £5 upon allotment, £8 on the 31st May, 1871, and the remainder by instalments of not more than £20 per cent. of the nominal amount, at intervals of not less than three months. The Shares bear interest at £5 per cent. per annum upon the whole nominal amount from the 1st January, 1871, up to the completion of the works. After that time a dividend will be payable of £5 per cent., in priority to that payable upon Ordinary Shares, yielding to the investor 6½ per cent. per annum. After satisfying the £5 per cent. aforesaid and the Ordinary Share Dividend, the remaining profit (estimated by the calculations hereunder to produce an additional Dividend of over £5 per cent. on the whole Capital, or, with the Preference Dividend, upwards of £11 per cent. for the Preference Capital), will be divisible rateably between the Preference and Ordinary Shareholders. Any deficit in the Dividends on the Preference Shares in any one year is chargeable in priority on the earnings of future years, and no further Preference or Debenture Capital can be issued. The completion of the Railway within three years from the 5th July, 1870, is guaranteed to the German Government by a deposit of 304,700 Thalers, or about £45,705 sterling, which has been made at the Royal General State Treasury in Berlin, in State and Municipal Bonds payable to bearer, and the interest payable during construction will be secured by an investment in Consols of sufficient amount in the names of Trustees. The Contractors are bound by their Contract with the Directors to complete the Railway within two years from the 5th July, 1870, and the works are now in progress.

POMERANIAN CENTRAL RAILWAY.

Concession dated July 5, 1870.

CAPITAL 7,360,000 THALERS, ABOUT £1,104,000.

Divided into 18,400 Preference Shares of 200 Thalers, about £30 each, equal to £552,000, and 18,400 Ordinary Shares of 200 Thalers, about £30 each, equal to £552,000.

Length of Railway about 119 *German Miles, or about* 91 *English Miles.*

DIRECTORS.

PRESIDENT—H. F. W. Wagener, Privy and Chief Counsellor of the Government, Presiding Counsellor in the Ministry of State, Knight P.F., and Member of the Reichstag, Berlin.

H. Schuster, Knight P.F., Bank Director and Landed Proprietor, Berlin.

Baron Von Arnim Heinrichsdorf, of Heinrichsdorf Castle, Pomerania, Knight P.F., Member of the Reichstag and Chamber of Deputies.

Baron Von Mellenthin, Major A.D. Knight P.F., Member of the Chamber of Deputies, Falkenburg Castle, Pomerania.

Baron Von Owen, President of the District, Member of Chamber of Deputies, Knight P.F., Oswowka, Pomerania.

Baron Von Reuss-Waldstatzke, Knight P.F., Waldstatzke, Pomerania.

SOLICITORS IN LONDON—J. and R. Gole, 40 Lime street.

AGENTS—Blyth and Co., 17 Gracechurch street, London.

BANKERS—The London and County Bank, London.

DOMICILE OF THE COMPANY—No. 5 Leipzic place, Berlin.

Applications are invited for 18,400 Preference Shares of 200 thalers each of the Pomeranian Central Railway.

All the Ordinary Shares have been taken up and subscribed for in Germany.

Interest on the Preference Shares at £5 per cent. per annum will accrue from the 1st January, 1871, until the completion of the Railway, which is fixed by the statutes to take place within three years from the 5th July, 1870, and will be payable on the whole nominal amount of the Share.

From the expiration of the half-year after the completion of the Railway the net balance of receipts is to be divided half-yearly in the following proportions—viz., £5 per cent. (charged also upon the profits of subsequent years by way of additional security) on the nominal amount of the Preference Shares. Subject to this payment, a dividend of 6½ per cent. on the nominal amount of the Ordinary Shares will be payable to the holders. The remaining balance will be apportioned at the end of each year between the holders of Preference and Ordinary Shares according to the amounts which they hold. The priority of the above dividend of £5 per cent. over the dividends on Ordinary Shares is further secured by a charge prospectively on the profits of future years.

The Preference Shareholders also have a charge for the amount of their Shares upon the corpus of the undertaking, in priority to Ordinary Shareholders.

The interest will be payable half-yearly at the London and County Bank, London.

The price of the Shares now offered is £24 per share of the nominal amount of £30.

The Pomeranian Central Railway Company, marked on the map accompanying this prospectus, is incorporated by a statute which received the sanction of the King of Prussia on the 5th of July, 1870. It is about 91 English miles in length, and, passing through a country unequalled in agricultural resources, forms the most direct route from the North-East of Germany (including the important towns of Konigsberg and Dantzig) to the West (including Stettin and Hamburg, with their increasing trade). It is being constructed as a first-class Railway, and is intended to form a link between the Eastern Railway of Prussia and the Berlin, Stettin, and Lærgard Railway, its position being most advantageous for the through corn and other traffic passing from East to West.

The remunerative character of railway enterprise in Prussia is well known, and the following facts afford reliable data for the probable returns for this line. The receipts of the Eastern Railway of Prussia (121 German, or 566 English miles in length) average £46 9s. 10½d. per English mile per week, while the receipts of the Berlin, Stettin, and Stargard Railway (29.7 German, or 139 English miles in length) average £46 15s. 4d. per English mile per week. There is not only every reason for believing that the proposed line will be equally profitable, but that as a connecting link between these two important railways, it should, by stimulating their traffic, yield results in excess of the calculation below; assuming that the receipts are an average of the other lines at the present time, this would give £46 12s. 7d. per English mile per week, or for the entire mileage £220,649 4s. 4d. per annum. And after deducting working expenses to the amount of say 50 per cent. would leave a net income of

		£110,324 12 2
For preference dividend, £5 per cent.	£27,600 0 0	
Ordinary shares ...		
Dividend of £6 13s. 4d. per cent.	38,900 0 0	
Yearly sum required by statutes to be reserved	1,747 16 0	66,147 16 0
Leaving		44,176 16 2

to be divided rateably between the Preference and Ordinary Shares, giving a further dividend of over £5 per cent. per annum on the investment at the price of issue. It may be observed, however, that on Prussian lines of a similar character the working expenses do not exceed £40 per cent. of the gross receipts.

The Preference Shares now offered for subscription form a first charge upon the Company's net assets, after deducting working expenses and the necessary payments for creating a reserve fund and renewal fund, as the statutes confer no borrowing powers.

The liability of the Shareholders is limited to the amount subscribed for.

The sum of 304,700 thalers, about £45,705, has been deposited at the Royal General State Treasury in Berlin, in State and Municipal Bonds, for guaranteeing the completion of the line within the specified time, and the interest on the Preference Shares during construction will be secured by an investment in Consols of a sufficient amount in the names of Trustees.

Provisional Certificates to bearer will be issued in exchange for the banker's receipt, to be replaced when fully paid up by Share Certificates of the Company, payable to bearer, distinguished by a number and free of duty.

The share capital of the Company is 7,360,000 thalers, equal at par to £1,104,000 sterling, divided into—

(a) 18,400 Ordinary Shares of 200 thalers, equal to £30 each	3,680,000 thalers, equal to	£552,000
(b) 18,400 Preference Shares of 200 thalers, equal to £30 each	3,680,000 thalers, equal to	552,000
Total	7,360,000 thalers	1,104,000

Copies of the Company's Statutes, and of the Certificates of Deposit of Bonds, and List of Ordinary Shareholders, can be seen at the Offices of the Solicitors, Messrs J. and R. Gole, 40 Lime street, London.

Prospectuses may be had at the London and County Bank and its branches, and at the Offices of the Agents, 17 Gracechurch street, London.

SUBSCRIPTION FOR 18,400 PREFERENCE SHARES OF 200 THALERS EACH OF THE POMERANIAN CENTRAL RAILWAY COMPANY.

FORM OF APPLICATION.—(To be filled in and sent)

To Messrs Blyth and Co., 17 Gracechurch street, London, E.C.

GENTLEMEN,—Having paid to the London and County Bank to a joint account of the Pomeranian Central Railway Company and Messrs Blyth and Co., the sum of £ being £2 per share on my application for shares of 200 thalers each of the Pomeranian Central Railway Company, I request you to have transferred to me that or any less number of the said shares, and I hereby agree to accept such transfer, and to pay the balance in respect of such shares according to the terms of the prospectus.

Dated , 1871.
